

#	Area	Project	Status
1.	<b>Infrastructure</b>	Cloud Migration	In progress and on schedule. System and environment migration and testing activities are nearing completion. Contact Center and Appeals solutions undergoing development to be deployed in the cloud. See Cloud Migration (C2C) Operational Work Plan.
2.		Cloud Application Performance Management	In progress and on schedule. The existing cloud application performance management tool is being tested. See Cloud Application Performance Management Operational Work Plan.
3.	<b>Software - Architecture Modernization</b>	SDLC DevOps	In progress and on schedule. Automated test reports requirements are finalized and testing to begin in next reporting period. See SDLC DevOps Operational Work Plan.
4.		.NET & ORM Upgrade	In progress and on schedule. All .NET frameworks upgraded. ORM upgrade forecasted to be complete in November 2022. See .NET & ORM Upgrade Operational Work Plan.
5.		Rules Engine	In progress and on schedule. The project scope has been clarified and finalized. A draft scope of work is undergoing final review to procure a business rules engine in early November. See Rules Engine Operational Work Plan.
6.		SOA and API Layer	In progress and on schedule. A draft scope of work is undergoing final review to procure an integration platform in early November. See SOA and API Layer Operational Work Plan.
7.		RA Help Center	Project closed out in December 2021.
8.	<b>Software - Procurement</b>	Strategic Planning Office (SPO)	In progress and on schedule. Added a second Project Manager to support the Cloud Migration project.
9.		Oversight (IV&V)	In progress and on schedule.
10.		System and Software Integration (SSI)	In progress and on schedule. Vendor is developing architectural standards. See System and Software Integration Operational Work Plan.
11.	<b>Software – Incremental CX/UX Mobile Responsive Software Transformation, including Business Process Optimization</b>	BPO & Initial Claims	BPO project closed out in October 2022. See Business Process Optimization Operational Work Plan. CX/UX in progress and on schedule. A draft scope of work is undergoing final review to procure mobile-responsive user interface in early November.
12.		BPO & Core Claims and Claim Status	BPO project closed out in October 2022. See Business Process Optimization Operational Work Plan. CX/UX in progress and on schedule. A draft scope of work is undergoing final review to procure mobile-responsive user interface in early November.
13.		BPO & Continued Claims	BPO project closed out in October 2022. See Business Process Optimization Operational Work Plan.

#	Area	Project	Status
			CX/UX in progress and on schedule. A draft scope of work is undergoing final review to procure mobile-responsive user interface in early November.
14.		BPO & Employers and other TPAs	BPO project closed out in October 2022. See Business Process Optimization Operational Work Plan. CX/UX in progress and on schedule. A draft scope of work is undergoing final review to procure mobile-responsive user interface in early November.
15.	<b>Data and Analytics</b>	Data Warehouse	Project closed out in January 2022.
16.		Reporting	In progress and on schedule. 36 federal reports have been generated, submitted to, and accepted by USDOL since project launch. Three reports have been developed and are being tested and validated. See Reporting Operational Work Plan.
17.		Archival and Purge	In progress and on schedule. Work sessions ongoing to develop business and technical requirements. See Archive & Purge Operational Work Plan.
18.		Master Data Management and Interoperability	In progress and on schedule. A Data Dictionary is undergoing review. See Master Data Management and Interoperability Operational Work Plan.
19.	<b>Security</b>	Security Architecture Review	Project closed out in October 2022. See Security Architecture Review Operational Work Plan.
20.		Identity Management and User Authentication	In progress and on schedule. Phase one of three, focused on claimants, was completed in September 2021. Phase two of three, focused on employers and third-party administrators, has not yet started. Phase three, focused on staff, is in progress. A procurement for an Identity and Access Management tool was advertised in September 2022. See Identity and Access Management Operational Work Plan.
21.		Security Architecture Audit	Not started and on schedule. Forecasted start January 2023.

**Are there any scope changes?**

The SOA and API Layer project scope was updated to align with the iSF Final Report, which removed from scope the deployment of three web-based, real-time APIs. This positively impacted the project schedule, which reflects a project end date in May 2023 instead of June 2023, allowing more time for open environment testing with Floridians before July 1, 2023, and helps ensure staff resources are available to facilitate the development of APIs that will be needed to implement the CX/UX solution.

The Master Data Management and Interoperability project scope was revised to officially record the exclusion of API development. The iSF Report provided optional scope to include APIs; the Department will deploy APIs during continuous modernization. This change positively impacts the project timeline and does not impact the project’s overall benefits to the Department.

The Identity and Access Management project scope for the staff phase was modified to place focus on technology-based access management for the existing CONNECT database, PeopleFirst, and the Active Directory. These applications provide

REEMPLOYMENT ASSISTANCE CLAIMS AND BENEFITS INFORMATION SYSTEM MODERNIZATION	PROJECT STATUS REPORT FOR SEPTEMBER 2022	FISCAL YEAR 2021-22 DEPARTMENT OF ECONOMIC OPPORTUNITY
---	---	---

the greatest value to the Department in terms of number of users and volume of data. The access control policies and standard operating procedures will continue encompassing all System-related applications to ensure proper access control is maintained.

**Is the project currently within budget?**

The project is currently under budget. Expenditures from September and October are underreported pending a release of funds from General Revenue (GR) and ARPA sources. The Department requested a \$26 million release (\$6M from GR and \$21 M from ARPA) on September 30 and submitted additional information to facilitate the requested release of funds.

**Do you expect the project to remain within budget?**

Yes

**If the project is not on schedule, briefly explain why and what the agency is doing to bring the project back on schedule.**

The Program is on schedule. The Department has developed proactive measures and continues to mitigate any obstacles that could impact project schedules. For example:

1. The Department has reduced a staffing resources risk previously identified by the Reemployment Assistance Modernization Program’s IV&V vendor as a high-level risk to a medium-level risk. This positive trend is a result of:
  - Proactive outreach with staff augmentation vendors to gain insights into increase both the quality and quantity of specialized information technology professionals;
  - Offering flexibilities for remote work and competitive pay, as needed. The Department initiated full-time remote work for critical IT positions in May 2022 to help promote hiring and retention;
  - Including a staffing requirement in all technology procurements; and
  - Leveraging a resource capacity analysis tool to better understand where existing resources are over-committed and to help identify the most critical vacancies to be filled.
2. The Department has applied lessons-learned to reduce procurement-related delays that the Reemployment Assistance Modernization Program’s IV&V vendor originally classified as either a high or medium risk, though some risks are trending downward or have been subsequently closed. To mitigate these issues, the Department has:
  - Included the Department’s Vendor Core Contract in solicitation documents to ensure vendors are provided the Department’s terms and conditions as early as possible.
  - Established priorities with vendors who are developing project requirements to fast-track procurement development.
  - Developed well-defined scopes of work and detailed project requirements for the remaining technology projects, to ensure vendors are provided clear direction at the outset of each project.
3. The Department has worked closely with other states and the National Association of State Workforce Agencies to apply best-practices and develop innovative solutions to satisfy burdensome regulatory compliance requirements. For example, to comply with IRS Publication 1075:
  - The Department has developed a manual workaround for Appeals cases that contain a Federal Tax Information (FTI).
  - The Department has developed a process where contractors can build a database for FTI that DEO staff can manage.
4. The Department is evaluating each active project’s scope of work to ensure the overall Program’s benefits are achieved by June 30, 2023. This process will allow the Department to leverage an agile approach to focus its efforts on critical path tasks and activities, ensure resources are allocated, and that System users are provided an enhanced mobile-responsive user interface for filing and managing their Reemployment Assistance claims.

**Major Project Tasks and Activities Accepted or In Progress this Reporting Period**

- [Infrastructure] Cloud Migration. This project includes transitioning the System from operating on hardware stored on-premise to a cloud-based environment to ensure all aspects of the System are available to users during periods of high demand for continuous claims processing, including both web-based and call center services.
  - The Department is migrating various components of the System into a cloud-hosted environment, including files, databases, applications, and environment infrastructure. The updates shown below are as of this reporting period:
    - File migration: Completed in May 2022
    - Database migration: Completed in May 2022
    - Application migration: Migration activities are ongoing. The Department has established an isolated environment in the cloud to host data governed by IRS Publication 1075. The Department is applying the necessary security access controls and populating the environment with real data to complete testing in accordance with IRS Publication 1075.
    - Environment Infrastructure migration:
      - Test environments: The Department has established an isolated environment in the cloud to host data governed by IRS Publication 1075. The Department is applying the necessary security access controls and populating the environment with real data to complete testing in accordance with IRS Publication 1075.
      - Pre-production environment: The Department has established an isolated environment in the cloud to host data governed by IRS Publication 1075. The Department is applying the necessary security access controls and populating the environment with real data to complete testing in accordance with IRS Publication 1075.
      - Production environment: Anticipated to be completed in December 2022. Testing is ongoing to ensure successful migration of the System.
  - The Department completed User Acceptance Testing for its cloud-hosted FileNet application upgrade from version 5.2 to version 5.5.7. The FileNet application is used by the Department to manage workflows in the System that ensure files that are provided by claimants, employers, and Third-Party Administrators are merged with the correct claim. The upgrade will be deployed when the System is migrated to the cloud in December 2022.
  - The Digital Appeals Recording Solution (DARS) vendor has begun application development to deploy this technology in a cloud-hosted environment. Development work is anticipated to continue through December 2022. DARS enables the Department to record appeals hearings, which provides due process to employers, third-party administrators, and claimants who have filed an appeal on a Reemployment Assistance claim.
  - The Visual Interactive Voice Response, ChatBot, and WebChat technology vendor continues to develop business and technology requirements, and evaluate security requirements, that will be used to enhance the Department's existing Customer Call Center technology and provide additional self-service options for Reemployment Assistance claimants.
- [Infrastructure] Cloud Application Performance Management. This project includes utilizing a software tool that provides visibility into key System performance indicators, such as numbers of concurrent users, for System monitoring. The tool also allows the Department to set defined thresholds for performance and receive notification if remedial actions are needed to maintain System performance and prevent System downtime.
  - The Department installed the cloud version of the existing application performance management tool and testing has been initiated. Testing will be conducted for several months, and the tool is anticipated to be pushed into production in early June 2023.
- [Software] SDLC DevOps. This project includes improving documentation for the System, including application design documentation, artifacts, and dataflow diagrams. This helps establish a process that sets a standard for maintaining

System documentation and planning the deployment of System enhancements that align and prioritize Reemployment Assistance program requirements with the System's functionality.

- The Department continues to work with the ServiceNow vendor to integrate this software with the new DevOps environment. ServiceNow will serve as a repository for System requirements. Integration of these software tools will sync the System's testing environment and cross-reference requirements with test results. It will also develop an audit trail that can be used to reference changes made to the System over time. The Department anticipates the development work to support this integration will be complete in November 2022.
  - The automated test reports that verify business requirements are met following each System enhancement are finalized and approved. Development and subsequent testing will be initiated in November 2022. These changes will eliminate a currently manual process and increase subject matter experts' efficiency with testing System enhancements.
- [Software] .NET and ORM Upgrade. This project is designed to ensure the Department's .NET framework and Object Relational Mapping (ORM) software receive security fixes, updates, and technical support that align with industry standards. The .NET framework is a platform that is used to create and run software applications. ORM software promotes more efficient System development by translating low-level coding across tables that store data.
  - The Reemployment Claims and Benefits Information System application's ORM software was upgraded from version 3.5 to version 5.8 and successfully deployed into production in November 2022.
- [Software] Rules Engine. This project includes utilizing a software tool that serves as a separate infrastructure environment for managing and executing business rules that govern how Reemployment Assistance claims are processed. By using a rules engine to manage and operate business rules, specifically those rules that are updated periodically to accommodate changes in state or federal law, the Department gains staff efficiency and helps support System performance. A rules engine is more user-friendly and does not require System code changes, which means information technology staff can be repurposed for larger, more complex System enhancements and business rule changes can be deployed faster. Additionally, because the rules engine operates in a separate infrastructure environment, it allows for increased System performance.
  - The Department is conducting final edits to a scope of work for a business rules engine (Rules Engine project), integration platform (SOA and API Layer project), and mobile-responsive user interface (CX/UX project), including services to ensure interoperability. The procurement is scheduled to be advertised in the next reporting period.
  - The Department is developing a catalog of business rules that will be used to develop a continuous modernization plan for the business rules engine. The catalog will identify all business rules that govern the administration of the Reemployment Assistance program, the number of times each rule has changed, the date(s) each rule has changed, and the relative complexity of each rule. This is a labor-intensive process that is anticipated to be complete in May 2023.
- [Software] SOA and API Layer. This project will help promote a more efficient System by creating a layer between various components of the System that serves as the messenger for all data exchanges. This layer helps prevent a downturn in System performance by offloading demand on the System.
  - The Department is conducting final edits to a scope of work for a business rules engine (Rules Engine project), integration platform (SOA and API Layer project), and mobile-responsive user interface (CX/UX project), including services to ensure interoperability. The procurement is scheduled to be advertised in the next reporting period.
- [Software] Reemployment Assistance Help Center. This project created a front-end website that serves as a one-stop shop for System users to get answers to frequently asked questions, view information about their claim, submit inquiries to the Department for assistance, and submit information to the Department that facilitate claims processing.

- This project was completed in December 2021. The Reemployment Assistance Help Center will undergo additional enhancements through continuous modernization efforts to improve internal workflows that ensure users' claims are processed timely.
- [Planning, Coordination, and Oversight] Strategic Planning Office. This project equips the Department with standards, governance, and project management services for the Reemployment Assistance Modernization Program, and oversees the Program's scope, schedule, and budget to promote accountability and alignment with Department priorities.
  - The Strategic Planning Office (SPO) continues to provide overall Program and project management support.
- [Planning, Coordination, and Oversight] Independent Verification and Validation. This project includes leveraging an independent third-party consultant to provide objective and proactive risk identification and assessment to the Department. Observations and risks identified by the consultant are used by the Department to implement the Reemployment Assistance Modernization Program and any necessary mitigating strategies.
  - IV&V continues to attend various Department meetings to support Program and project oversight.
  - IV&V submitted their third Quarterly Assessment Report, which outlines the overall Modernization Program's risks and issues across a set of risk dimensions and categories. All dimensions have the same risk rating as the previous Quarterly Assessment Report.
- [Planning, Coordination, and Oversight] System and Software Integration. This project includes leveraging the expertise of a third-party services provider with experience in strategic planning, System design, System development, and System integration for large multi-component system modernization efforts to ensure the Department's various modernization projects work as intended to deliver an enhanced user experience.
  - The Department is conducting final edits to a scope of work for a business rules engine (Rules Engine project), integration platform (SOA and API Layer project), and mobile-responsive user interface (CX/UX project), including services to ensure interoperability. The procurement is scheduled to be advertised in the next reporting period.
  - The Department anticipates executing a contract amendment in the next reporting period that will allow the Department to maintain an agile approach to maintaining the overall System's architectural standards. As the System's architecture will change with each new technology product installation, this contract amendment will allow the Department's System documentation to evolve with each change and ensure the documentation is current.
- [Software] Business Process Optimization. This project focuses on identifying, cataloging, and reengineering business processes and requirements that are necessary to improve the user experience. These reengineered processes and requirements will support a more efficient claims process for both internal and external System users.
  - This project was successfully closed out this reporting period.
- [Software] Incremental CX/UX Mobile Responsive Software Transformation. This project includes optimizing the existing System and developing a user-friendly front-end for Reemployment Assistance claimants that is also mobile-friendly. The transformation will occur incrementally to ensure all System users benefit from System optimization, with a focus on enhancing the claimant experience first.
  - The Department is conducting final edits to a scope of work for a business rules engine (Rules Engine project), integration platform (SOA and API Layer project), and mobile-responsive user interface (CX/UX project), including services to ensure interoperability. The procurement is scheduled to be advertised in the next reporting period.
- [Data and Analytics] Data Warehouse. This project established a separate infrastructure environment for storing and reporting Reemployment Assistance data. The data warehouse enhances System performance by conducting reporting activities in a separate infrastructure environment.
  - This project was completed in January 2022.

- [Data and Analytics] Reporting. This project includes migrating all System reports from the System to the Data Warehouse and developing and validating all federally mandated Reemployment Assistance reports. The data warehouse provides the Department with standardized data and reduces the need for staff intervention for future reporting activities.
  - Of the 39 reports in-scope for this project, 36 are complete and three are currently being validated.
- [Data and Analytics] Archival and Purge. This project establishes a process for archiving and purging appropriate Reemployment Assistance data. These activities will reduce the Department’s data storage costs and greatly impact the efficiency and stability of the System, because it will purge any data that is no longer required to be maintained by the Department and allow for the secure storage in a separate environment of any data that the Department must maintain for a period of time.
  - Work sessions with various Reemployment Assistance business units are being held to develop project requirements.
  - The Department’s Records Management Policy is undergoing routine review and is anticipated to be finalized by the next reporting period. This policy will provide the latest guidance to the project team about data to be archived or purged.
  - The project’s scope of work is anticipated to be finalized by the next reporting period.
- [Data and Analytics] Master Data Management and Interoperability. This project focuses on creating a data catalog and data dictionary for the Department. These efforts promote data standardization and data sharing among information technology systems that exchange information with the Reemployment Assistance program.
  - A draft Data Dictionary has been prepared and is undergoing review with the Bureau of Workforce Statistics and Economic Research.
  - A draft Data Catalog has been developed and is undergoing internal review.
- [Security] Security Architecture Review. This project includes assessing the proposed modernized System to strengthen System security, reduce risk for all System users, and to define and implement enhanced security practices that meet or exceed modern security standards.
  - This project was successfully closed out this reporting period.
- [Security] Identity and Access Management. This project includes updating all Departmental identity management and access control policies and implementing enhanced front-end security measures to authenticate System users. These efforts ensure the individuals who have access to the System are provided the appropriate amount of access for their need.
  - The Department advertised a Request for Quote for an IAM tool and services for System user role-based access and customized reports and dashboards to enhance System security and user oversight. See Procurement Status below for the anticipated procurement schedule.
- [Security] Security Architecture Audit. This project includes a technical audit that will be provided by an independent third-party to review and test all technical aspects of the System for improved System security.
  - This project is forecast to start in January 2023.

## SECTION 1 — OVERALL PROJECT PLAN

### I. Project Charter

The Reemployment Assistance Claims and Benefits Information System (System) and supporting middleware software is currently deployed on physical, on-premises servers managed exclusively in-house. Most of the physical infrastructure is from the original go-live in 2013, is at the end of its life cycle, and is due for replacement by 2020. As the Department of Economic Opportunity (DEO) continues to assess and develop an understanding for choosing, managing, governing, and securing cloud services and tools; the realization is that cloud computing is the foundation that enables Workforces Services to transform, differentiate, and continuously improve.

A cloud first strategy plays a central role in next-generation business initiatives. These initiatives include digital business transformation, automation, and Artificial Intelligence (AI). Cloud computing offers enhanced disaster recovery and high availability, optimized operations and maintenance costs, and built-in scalability.

As part of the modernization initiatives, DEO is undertaking a project to complete the planning for remaining migration, readiness activities, and migration of Reemployment Assistance infrastructure from the State Data Center and Winter Haven Disaster Recovery sites, as well as moving the System to a Cloud Service Provider using an IaaS hosting model. Included within the migration project is an improved document storage solution and the transition to a cloud-based IVR solution. Once the migration is completed, focus on assessment of additional, long term, cloud costs, performance, and maintainability considerations such as utilization of pay-as-you-go models, and potential utilization of Platform as a Service (PaaS) as the long-term development and delivery model.

#### A. Scope Statement

Complete planning for remaining migration, readiness activities, and migrate Reemployment Assistance infrastructure from the State Data Center and Winter Haven Disaster Recovery (DR) sites, as well as moving the System to a Cloud Service Provider using an IaaS hosting model; implement an improved document and generation management solution; transition to a cloud-based IVR solution and implement additional Reemployment Assistance Contact Center enhancements.

## B. Project Objectives and Business Benefits

Project Objective	Business Benefit
Complete migration plan and all application and database layer remediation and readiness modifications	<ul style="list-style-type: none"> <li>Mitigate technical risks and unknowns associated with migration</li> </ul>
Migrate all System infrastructure to the Cloud using an IaaS hosting model	<ul style="list-style-type: none"> <li>Cloud deployment and delivery models offer on demand resource acquisition and auto-scaling.</li> <li>Cloud deployment and delivery models reduce or eliminate Cap-Ex and offer pay-as-you-go Op-Ex resource costs</li> <li>Cloud deployment and delivery models provide cost and operational efficiencies</li> </ul>
Determine and implement improvements to document storage and workflow in IaaS ( <i>FileNET, content management which includes in BRAVA functionality and document management system</i> )	<ul style="list-style-type: none"> <li>Cloud deployment and delivery models provide cost and operational efficiencies</li> </ul>
Determine and implement improved document management solution and select and implement IVR solutions in IaaS	<ul style="list-style-type: none"> <li>Cloud deployment and delivery models provide cost and operational efficiencies</li> </ul>

## C. Critical Success Factors

- Migration of all System infrastructure to an IaaS hosting model
- Implementation of improved document storage and workflow solutions
- Implementation of improved document management solution
- Upgrade IVR solution in IaaS
- DR cloud migration solution and DR Plan
- Contingency Plan for non-cloud ready applications

## D. Key Dates

Key Date	Importance and Relevance to the Project
November 10, 2021	Cloud Migration – Connect to Cloud Kick-Off
November 18, 2021	IVR – Kick-Off
November 30, 2021	ULA Vendor under contract / PO issued
December 2, 2021	<del>FileNet RFQ submitted for Bid</del> ( <i>package pulled</i> )
December 17, 2021	<del>FileNet Proposals Due</del> ( <i>package pulled</i> )
December 26, 2021	Data Intensity Contract Executed
December 27, 2021	<del>Fairfax Proposal Received</del> ( <i>package pulled</i> )
January 2, 2022	Oracle Upgrade from 12 to 19C Complete

Key Date	Importance and Relevance to the Project
January 11, 2022	2022 Session begins
January 27, 2022	FileNet Change in Approach
February 1, 2022	Data Intensity / Database Migration Kick-Off
March 11, 2022	2022 Session ends
May 9, 2022	.NET Upgrade
May 9, 2022	Database Migration
October 1, 2022	Object Relational Model
June 30, 2022	GTS / IVR Go Live
June 30, 2022	Phase I - FileNet Lift and Shift
September 30, 2022	Full System Testing in PreProd
September 30, 2022	Visual IVR and Chat Bot Plan in Place
October 28, 2022	Interfaces
November 1, 2022	Full Production Testing
December 1, 2022	Visual IVR and Chat Bot Go Live
December 31, 2022	DARS
December 31, 2022	Phase II - FileNet

### E. Major Deliverables

Major Deliverable	Deliverable Description
Upgrade Network	Implement Palo Alto Firewalls
Oracle Upgrade	Oracle upgrade from 12 to 19C
IBM FileNET Upgrade	Upgrade to latest version 5.5.7
Remediate IBM FileNet	Move workflow and document management functionality to native cloud-based application
Object Relational Model	Upgrade to latest version and migrate to Azure environment
Database Migration	Migrate Oracle and SQL Databases to Azure environment
Application	Complete necessary refactoring and upgrade .NET framework from 4.0 to 4.6 and migrate to Azure environment
Active Directory	Complete deployment of AD in IaaS
Contact Center / IVR	Replace IVR system with cloud-based market leader
Defect Tracking and Load Runner	Upgrade/migrate HP ALM to Azure environment and implement Load Runner Cloud SaaS solution
Correspondence	Upgrade OpenText Blazon version and migrate to Azure environment; explore native cloud-based solutions to integrate Brava Viewer
Interfaces	Migrate SFTP server to Azure environment
Batch Management	Complete upgrade and migration of the UC4 servers to Azure environment
Testing Data Management	Select and implement COTS product

## F. Major Milestones

	Major Milestone	Milestone Description
1.	Execution of Vendor Contracts	Execution of multiple vendor contracts vital for the success of the project
2.	Network Upgrade	Implement Palo Alto Firewalls
3.	Oracle Upgrade	Upgrade to the latest version 19C
4.	IBM FileNET Upgrade	Upgrade to latest version 5.5.7
5.	Contact Center / IVR	Upgrade IVR to a cloud-based system
6.	Database Migration	Migrate 66 application servers VM's
7.	UAT Testing	Completion of User Acceptance Testing

## G. Procurement

Procurement	Description	Justification	Needed By
C2191-A10 GTS Amendment	This amendment adds E911 functionality to the existing Genesys system	To be compliant, all users must have the ability to call 911	Complete
RFQ for AUTOMIC Migration	Automic Automation Upgrade and Migration to Azure Professional Services	UC4 is a critical component of the System, which handles batch job scheduling and automation. Migration support services are required to upgrade UC4 and migrate to the Azure platform.	Complete

## H. Key Stakeholders

Key Stakeholder	Project Interest
Dane Eagle	Secretary, Department of Economic Opportunity
Adrienne Johnston	Deputy Secretary, Workforce Services, DEO
Domenic DiLullo	Chief Technology Officer, DEO
Allyce Moriak	Chief Financial Officer, DEO
Wendy Castle	RA Modernization Program Owner - Business
Paul Forrester	RA Modernization Program Owner – Information Technology
David Sinclair	Project Manager
Peraton	System and Software Integrator

## I. Significant Project Assumptions and Constraints

### Project Assumptions

- All identified funding is available.
- The identified System requirements are correct and complete.

- The assigned IT resources possess relevant knowledge and skills to complete the identified tasks.
- Members of the project team will have access to the necessary tools, hardware, and materials necessary to complete the identified tasks.
- All relevant stakeholders will attend required status meetings. However, there may be instances where some stakeholders are unavailable to attend.
- The project sponsor will be responsive and prepared to make decisions regarding the project cost, scope, and schedule.
- Key contracts are sequenced in relation to the project schedule.

### Project Constraints

- SMEs are over allocated to this, other Reemployment Assistance projects, and regular business activities.
- DEO continues to be challenged with securing staff resources.

## II. Work Breakdown Structure

Task Name	Duration	Start	Finish
Initiation Risk & Complexity Assessment - FINAL - Cat 2	0.25 days	Mon 11/15/21	Mon 11/15/21
Planning Risk & Complexity Assessment - FINAL - Cat 2	0.25 days	Mon 1/10/22	Mon 1/10/22
<b>Deliverable: Project Charter</b>	<b>10 days</b>	<b>Mon 10/11/21</b>	<b>Fri 10/22/21</b>
Develop Project Charter	8 days	Mon 10/11/21	Wed 10/20/21
Review/Update Project Charter	0.5 days	Thu 10/21/21	Thu 10/21/21
Approve Project Charter	1 day	Fri 10/22/21	Fri 10/22/21
<b>Project Kickoff Meetings</b>	<b>78.25 days</b>	<b>Wed 11/3/21</b>	<b>Mon 2/21/22</b>
<b>Connect to Cloud Kick-Off</b>	<b>6 days</b>	<b>Wed 11/3/21</b>	<b>Wed 11/10/21</b>
Prepare presentation	6 days	Wed 11/3/21	Wed 11/10/21
Schedule Kickoff meeting	0.13 days	Fri 11/5/21	Fri 11/5/21

Genesys Project Complete	321.63 days	Tue 9/7/21	Wed 11/30/22
<b>DARS (GENESYS)</b>	<b>323.48 days</b>	<b>Mon 10/4/21</b>	<b>Thu 12/29/22</b>
SOW Written	143.75 days	Mon 10/4/21	Fri 4/22/22
SOW Compliance	164.75 days	Mon 10/4/21	Fri 5/20/22
SOW Complete	169.63 days	Mon 10/4/21	Fri 5/27/22
Project Kick Off	2 days	Mon 8/29/22	Tue 8/30/22
DARS Project Complete	150.75 days	Wed 6/1/22	Thu 12/29/22
<b>Conduct Lessons Learned Meeting</b>	<b>6 days</b>	<b>Fri 6/16/23</b>	<b>Fri 6/23/23</b>
Schedule Lessons Learned meeting	6 days	Fri 6/16/23	Fri 6/23/23
Conduct Lessons Learned meeting	1 day	Fri 6/23/23	Fri 6/23/23
Record Lessons Learned	1 day	Fri 6/23/23	Fri 6/23/23
Execution Phase complete	320 days	Mon 10/4/21	Fri 12/23/22
<b>UAT Testing - Pre-production</b>	<b>15 days</b>	<b>Mon 5/30/22</b>	<b>Fri 6/17/22</b>
Test Blazon functionality	15 days	Mon 5/30/22	Fri 6/17/22
Test Crystal Reports functionality	15 days	Mon 5/30/22	Fri 6/17/22
Test FileNet functionality	15 days	Mon 5/30/22	Fri 6/17/22
Test UC4 Batch Scheduler functionality	15 days	Mon 5/30/22	Fri 6/17/22
Test OpenText Exstream functionality	15 days	Mon 5/30/22	Fri 6/17/22
<b>Monitoring and Controlling</b>	<b>220 days</b>	<b>Fri 2/25/22</b>	<b>Fri 12/30/22</b>
Manage Project Schedule	219 days	Fri 2/25/22	Wed 12/28/22
Manage Project Costs	219 days	Fri 2/25/22	Wed 12/28/22
Manage Project Scope	219 days	Fri 2/25/22	Wed 12/28/22
Manage Project Risks	219 days	Fri 2/25/22	Wed 12/28/22
Manage Project Issues	219 days	Fri 2/25/22	Wed 12/28/22
Manage Decisions	219 days	Fri 2/25/22	Wed 12/28/22
Manage Action Items	219 days	Fri 2/25/22	Wed 12/28/22
Manage Cybersecurity	217 days	Fri 2/25/22	Mon 12/26/22
Record Lessons Learned	217 days	Fri 2/25/22	Mon 12/26/22
Prepare Regularly scheduled Status Reports	219 days	Fri 2/25/22	Wed 12/28/22
Conduct Regularly scheduled Status Meetings	219 days	Fri 2/25/22	Wed 12/28/22
Monitoring and Controlling Phase Complete	0 days	Fri 12/30/22	Fri 12/30/22
<b>UAT Testing - Production</b>	<b>16 days</b>	<b>Mon 10/3/22</b>	<b>Mon 10/24/22</b>
Test Blazon functionality	16 days	Mon 10/3/22	Mon 10/24/22

Test Crystal Reports functionality	16 days	Mon 10/3/22	Mon 10/24/22
Test FileNet functionality	16 days	Mon 10/3/22	Mon 10/24/22
Test UC4 Batch Scheduler	16 days	Mon 10/3/22	Mon 10/24/22
Test OpenText Exstream	16 days	Mon 10/3/22	Mon 10/24/22
<b>Project Closeout</b>	<b>6 days</b>	<b>12/23/22</b>	<b>Fri 12/30/22</b>
Schedule Project Closeout Meeting	1 day	12/30/22	12/30/22
<b>Deliverable: Project Closeout Report</b>	<b>1 day</b>	<b>12/23/22</b>	<b>12/30/22</b>
Develop Project Closeout Report	1 day	12/23/22	12/26/22
Review/Update Project Closeout Report	1 day	12/28/22	12/28/22
Approve Project Closeout Report	1 day	12/28/22	12/28/22
Project Closeout Report complete	0 days	12/29/22	12/29/22
Conduct Knowledge Transfer	5 days	12/30/22	1/6/23
Conduct Project Closeout meeting	1 day	1/6/23	1/6/23
Closeout Phase complete	0 days	1/6/23	1/6/23
<b>Conduct Lessons Learned Meeting</b>	<b>6 days</b>	<b>1/6/23</b>	<b>1/9/23</b>
Schedule Lessons Learned meeting	1 day	1/6/23	1/6/23
Conduct Lessons Learned meeting	1 day	1/9/23	1/9/23
Record Lessons Learned	1 day	1/9/23	1/9/23

### III. Resource Loaded Project Schedule

Task Mode	Task Name	Duration	Start	Finish	Predecessors	Resource Names
<b>Auto Scheduled</b>	<b>C2C</b>	<b>468.98 days</b>	<b>Tue 9/7/21</b>	<b>Fri 6/23/23</b>		<b>David Sinclair</b>
<b>Auto Scheduled</b>	<b>Initiation</b>	<b>101.18 days</b>	<b>Fri 10/1/21</b>	<b>Mon 2/21/22</b>		<b>David Sinclair</b>
<b>Auto Scheduled</b>	<b>Risk and Complexity Assessment</b>	<b>60.18 days</b>	<b>Mon 10/18/21</b>	<b>Mon 1/10/22</b>		
Auto Scheduled	Pre-Charter Risk & Complexity Assessment - FINAL - Cat 3	0.18 days	Mon 10/18/21	Mon 10/18/21		
Auto Scheduled	Initiation Risk & Complexity Assessment - FINAL - Cat 2	0.18 days	Mon 11/15/21	Mon 11/15/21	4	
Auto Scheduled	Planning Risk & Complexity Assessment - FINAL - Cat 2	0.18 days	Mon 1/10/22	Mon 1/10/22		
<b>Auto Scheduled</b>	<b>Deliverable: Project Charter</b>	<b>9.98 days</b>	<b>Mon 10/11/21</b>	<b>Fri 10/22/21</b>		
Auto Scheduled	Develop Project Charter	7.86 days	Mon 10/11/21	Wed 10/20/21		
Auto Scheduled	Review/Update Project Charter	0.36 days	Thu 10/21/21	Thu 10/21/21		
Auto Scheduled	Approve Project Charter	0.98 days	Fri 10/22/21	Fri 10/22/21		

<b>Auto Scheduled</b>	<b>Project Kickoff Meetings</b>	<b>78.18 days</b>	<b>Wed 11/3/21</b>	<b>Mon 2/21/22</b>		
<b>Auto Scheduled</b>	<b>Connect to Cloud Kick-Off</b>	<b>5.89 days</b>	<b>Wed 11/3/21</b>	<b>Wed 11/10/21</b>		
Auto Scheduled	Prepare presentation	5.89 days	Wed 11/3/21	Wed 11/10/21		
Auto Scheduled	Schedule Kickoff meeting	0.09 days	Fri 11/5/21	Fri 11/5/21		
Auto Scheduled	Conduct Kickoff meeting	0.18 days	Wed 11/10/21	Wed 11/10/21		
<b>Auto Scheduled</b>	<b>Database Migration Kick-Off</b>	<b>20.98 days</b>	<b>Tue 1/4/22</b>	<b>Tue 2/1/22</b>		
Auto Scheduled	Prepare presentation	0.98 days	Tue 1/4/22	Tue 1/4/22		
Auto Scheduled	Schedule Kickoff meeting	0.98 days	Tue 1/4/22	Tue 1/4/22		
Auto Scheduled	Conduct Kickoff meeting	0.98 days	Tue 2/1/22	Tue 2/1/22		
<b>Auto Scheduled</b>	<b>IVR / GTS Kick-Off</b>	<b>7.98 days</b>	<b>Tue 11/9/21</b>	<b>Thu 11/18/21</b>		
Auto Scheduled	Prepare presentation	0.98 days	Tue 11/9/21	Tue 11/9/21		
Auto Scheduled	Schedule Kickoff meeting	0.98 days	Tue 11/9/21	Tue 11/9/21		
Auto Scheduled	Conduct Kickoff meeting	0.98 days	Thu 11/18/21	Thu 11/18/21		
<b>Auto Scheduled</b>	<b>FileNet Kick-Off</b>	<b>0.18 days</b>	<b>Mon 2/21/22</b>	<b>Mon 2/21/22</b>		
Auto Scheduled	Prepare presentation	0.09 days	Mon 2/21/22	Mon 2/21/22		
Auto Scheduled	Schedule Kickoff meeting	0.09 days	Mon 2/21/22	Mon 2/21/22		
Auto Scheduled	Conduct Kickoff meeting	0.18 days	Mon 2/21/22	Mon 2/21/22		
Auto Scheduled	Initiation Phase complete	0 days	Mon 11/15/21	Mon 11/15/21		David Sinclair
<b>Auto Scheduled</b>	<b>Conduct Lessons Learned Meeting</b>	<b>1.98 days</b>	<b>Fri 10/1/21</b>	<b>Mon 10/4/21</b>		
Auto Scheduled	Schedule Lessons Learned meeting	1.96 days	Fri 10/1/21	Mon 10/4/21		
Auto Scheduled	Conduct Lessons Learned meeting	0.55 days	Mon 10/4/21	Mon 10/4/21

### C. Project Management Methodology

DEO will use the PMBOK project management methodology in compliance with the project management standard rule 60GG-2 F.A.C. Predictability, accountability, and flexibility are key elements that will be embraced by the overall project management approach to ensure DEO’s satisfaction and project success. Successful project management must include active and visible leadership, multiple controls and checkpoints with measurable outcomes, and engagement with all stakeholders. DEO believes strong project management is critical throughout the life of any successful project.

For this project, DEO's project management will include the following specific elements, in addition to our standard methodology:

- The project management team will advise leadership on areas of concern and will propose solutions to mitigate risk.
- Vendors will respond to inquiries or requests from DEO within one business day from receipt.
- In the case where additional time is needed for a task, vendors will provide an estimate, which must be approved by the DEO Project Manager.
- At the end of the contract, vendors will provide final copies of all reports in electronic format for archive purposes.

DEO's project management approach will utilize the technical skills, tools, and techniques needed to succeed, as well as the dedication to accountability, resource commitment, and organizational focus. Project success will be the result of active communication among all individuals, understanding everyone's role in the project, and clear delineation of responsibilities.

DEO believes successful project management hinges on the following:

- Clearly established project goals and requirements
- Ongoing assessment of quality against established standards
- Constant measurement of success against established deliverables and milestones
- Personal presence and commitment of key project leadership
- Proactive identification and communication of risks and issues

## **VI. Business Process Organizational Change Management Plan**

This project intends to improve the delivery, execution, security, or convenience of DEO's lines of business through the implementation of modern processes and tools based on industry best practices and frameworks.

The project team aims to maximize communication, engagement, adoption, and performance of these new processes, roles, and responsibilities through a combination of tools, templates, and techniques such as:

- Stakeholder identification and engagement plans
- Process identification and improvement plans
- Educational assessment and training plans
- Change risk assessment
- Change Advocate networks
- Change Management
- Business Relationship Management
- IT Service Management

## VII. Project Risk Management Plan

Risk management will be an ongoing process conducted throughout the project. The process begins with identifying and assessing significant risks, then developing an appropriate mitigation strategy to address the risk(s). It continues with regular risk monitoring, ongoing identification of new risks, and timely implementation of risk response plans.

The project's Risk Management Process, which is defined and maintained within the PMP, will address identified risks that may negatively impact the project and may require visibility by leadership.

The Risk Management Process involves:

- Identifying and categorizing project risks (Identify),
- Validating and logging the risk (Validate / Log) assessing and prioritizing the risks so they are manageable (Analyze),
- Developing a response strategy and assigning responsibility (Plan),
- Tracking the risks by reviewing them at key project milestones (Monitor/Track), and most importantly,
- Communicating the risks and strategies on an ongoing basis throughout the life of the project (Communicate).

The Risk Management Processes address internal risks - those under the control or influence of the project team, such as quality of deliverables, cost, schedule, or technical risks; as well as external risks - those outside the control of the project team such as governmental legislation.

The PM, along with the project team will validate any identified risk to make sure the information is complete, and the risk is not a duplicate. Once verified the risk information will be logged into the Risk Log and given a unique identifier.

Risk Description/Impact	Probability of Occurrence (high, medium, low)	Risk Tolerance (high, medium, low)	Mitigation Strategy	Assigned Owner
Hurricane impacting the state delays the schedule	Low	High	Adjust schedule accordingly	PM
Necessary tools, hardware, or materials need to be procured for the successful completion of the project.	Medium	Medium	Identify needs early on and involve management and budget staff throughout engagement	PM
Insufficient knowledge transfer of new process	Medium	Medium	Involve impacted staff throughout engagement to increase participation and knowledge of new processes	PM

### VIII. Capacity Plan

This project does not involve the purchase/lease, configuration, and installation of significant computer hardware. For purposes of capacity planning, computer hardware includes servers, storage, and network infrastructure. Accordingly, a Capacity Plan is not required. Once the claim volume starts to go down as the claims volume decreases, capacity can be reduced. Also moving to an auto-scaling configuration will additionally reduce needed capacity.

## SECTION 1 — OVERALL PROJECT PLAN

### I. Project Charter

The Reemployment Assistance Claims and Benefits Information System (System) and supporting middleware software is currently deployed on physical, on-premises servers managed exclusively in-house. Most of the physical infrastructure is from the original go-live in 2013, is at the end of its life cycle, and was due for replacement in 2020. As the Department of Economic Opportunity (DEO) continues to assess and develop an understanding for choosing, managing, governing, and securing cloud services and tools; the realization is that cloud computing is the foundation that enables Workforces Services to transform, differentiate, and continuously improve.

A cloud-first strategy plays a central role in next-generation business initiatives. These initiatives include digital business transformation, automation, and Artificial Intelligence (AI). Cloud computing offers enhanced disaster recovery and high availability, optimized operations and maintenance costs, and built-in scalability.

As part of the modernization initiatives, DEO is undertaking a project to complete the planning for remaining migration, readiness activities, and migration of Reemployment Assistance infrastructure from the State Data Center and Winter Haven Disaster Recovery sites, as well as moving the System to a Cloud Service Provider using an IaaS hosting model. Included within the migration project is an improved document storage solution and the transition to a cloud-based IVR solution. Once the migration of the System to a cloud-hosted environment is completed, a focus on performance baselines and metrics will be available for evaluation and consideration for enhanced System monitoring and management.

#### A. Scope Statement

Change System monitoring from reactive to proactive by establishing metrics that are indicative of upcoming problems rather than those that have already occurred. Design visualizations that make metrics and thresholds easily visible, including trend analysis to support proactive action. Ensure that metrics capture inputs which would drive automatic scaling. Identify and procure a solution, if needed, and then implement the solution.

## B. Project Objectives and Business Benefits

Project Objective	Business Benefit
System of alerts to identify any noteworthy activity and approaching thresholds	Proactively working to prevent performance issues prior to the end users' experience being affected.
Dashboards to assist in proactive monitoring of key performance indicators	Another way to be proactive in monitoring and finding system trends
Optimized performance	Better end user experience
Rendering of topology maps and system application networks	Visual overview of the System will assist in faster response time when network or hardware issues occur

## C. Critical Success Factors

- Ensure all currently monitored System actions or events can be monitored in the cloud environment.
- Ensure processes and procedures are in place for actions that need to be taken based on event type.
- Establish performance baselines and tools to manage to those levels.
- Develop a visual monitoring intuitive interface.

## D. Key Dates

Key Date	Importance and Relevance to the Project
July 1, 2022	CAPM Project Kick-Off
July 15, 2022	Project Initiation Phase Completed
August 2, 2022	Requirements Traceability Matrix completed
September 6, 2022	Planning Phase Completed
September 30, 2022	Solution Determined
November 11, 2022	Testing Solution Complete
December 16, 2022	Solution in place in the Cloud
January 27, 2023	Full Baselines in Production Determined
February 24, 2023	Tweaks to system Monitoring Completed
March 17, 2023	Final System Monitoring Review
March 31, 2023	Project Complete

## E. Major Deliverables

Major Deliverable	Deliverable Description
Requirements Traceability Matrix Approved	All requirements for monitoring established and approved
Software selection Completed	Decision on what tool or tools will be used for monitoring. (Using AppDynamics)
Software Testing Underway	Start of software testing

Major Deliverable	Deliverable Description
Monitoring Baselines	Established Monitoring Baselines
Software live in Production	System is live and being monitored in the cloud
Final Baseline Numbers	Tweaks to monitoring complete and new baselines established
Project Complete	Live with full monitoring in place

## F. Major Milestones

	Major Milestone	Milestone Description
1.	Software selection Completed	Decision on what tool or tools will be used for monitoring
2.	Software Testing Underway	Start of software testing
3.	Software live in Production	System is live and being monitored in the cloud

## G. Procurement

Procurement	Description	Justification	Needed By
N/A	None at this time		

## H. Key Stakeholders

Key Stakeholder	Project Interest
Dane Eagle	Secretary, Department of Economic Opportunity
Adrienne Johnston	Deputy Secretary, Workforce Services, DEO
Domenic DiLullo	Chief Technology Officer, DEO
Allyce Moriak	Chief Financial Officer, DEO
Wendy Castle	RA Modernization Program Owner - Business
Paul Forrester	RA Modernization Program Owner – Information Technology
David Sinclair	Project Manager
Peraton	System and Software Integration

## I. Significant Project Assumptions and Constraints

### Project Assumptions

- All identified funding is available.
- The identified business and technical requirements are correct and complete.
- The assigned information technology resources possess relevant knowledge and skills to complete the identified tasks.
- Members of the project team will have access to the necessary tools, hardware, and materials necessary to complete the identified tasks.

- All relevant stakeholders will attend required status meetings. However, there may be instances where some stakeholders are unavailable to attend.
- The Chief Technology Officer will be responsive and prepared to make decisions regarding the project cost, scope, and schedule.
- Key contracts are sequenced in relation to the project schedule.

### Project Constraints

- Subject Matter Experts (SME) time is spread out and not dedicated

## II. Work Breakdown Structure

Task Name	Duration	Start	Finish
Initiation Risk & Complexity Assessment - FINAL - Cat 2	0.25 days	7/1/22	7/1/22
Planning Risk & Complexity Assessment - FINAL - Cat 2	0.25 days	7/11/22	7/11/22
<b>Deliverable: Project Charter</b>	<b>5 days</b>	<b>7/1/22</b>	<b>7/5/22</b>
Develop Project Charter	4 days	7/1/22	7/4/22
Review/Update Project Charter	0.5 days	7/5/22	7/5/22

### C. Project Management Methodology

DEO will use the PMBOK project management methodology in compliance with the project management standard rule 60GG-2 F.A.C. Predictability, accountability, and flexibility are key elements that will be embraced by the overall project management approach to ensure DEO’s satisfaction and project success. Successful project management must include active and visible leadership, multiple controls and checkpoints with measurable outcomes, and engagement with all stakeholders. DEO believes strong project management is critical throughout the life of any successful project.

For this project, DEO’s project management will include the following specific elements in addition to our standard methodology:

- The project management team will advise leadership on areas of concern and will propose solutions to mitigate risk.
- Vendors will respond to inquiries or requests from DEO within one business day from receipt.
- In the case where additional time is needed for a task, vendors will provide an estimate, which must be approved by the DEO Project Manager.

- At the end of the contract, vendors will provide final copies of all reports in electronic format for archive purposes.

DEO's project management approach will utilize the technical skills, tools, and techniques needed to succeed, as well as the dedication to accountability, resource commitment, and organizational focus. Project success will be the result of active communication among all individuals, understanding everyone's role in the project, and clear delineation of responsibilities.

DEO believes successful project management hinges on the following:

- Clearly established project goals and requirements.
- Ongoing assessment of quality against established standards.
- Constant measurement of success against established deliverables and milestones.
- Personal presence and commitment of key project leadership.
- Proactive identification and communication of risks and issues.

## **VI. Business Process Organizational Change Management Plan**

This project intends to improve the delivery, execution, security, or convenience of DEO's lines of business through the implementation of modern processes and tools based on industry best practices and frameworks.

The project team aims to maximize communication, engagement, adoption, and performance of these new processes, roles, and responsibilities through a combination of tools, templates, and techniques such as:

- Stakeholder identification and engagement plans.
- Process identification and improvement plans.
- Educational assessment and training plans.
- Change risk assessment.
- Change Advocate networks.
- Change Management.
- Business Relationship Management.
- IT Service Management.

## **VII. Project Risk Management Plan**

Risk management will be an ongoing process conducted throughout the project. The process begins with identifying and assessing significant risks, then developing an appropriate mitigation strategy to address the risk(s). It continues with regular risk monitoring, ongoing identification of new risks, and timely implementation of risk response plans.

The project's Risk Management Process, which is defined and maintained within the PMP, will address identified risks that may negatively impact the project and may require visibility by leadership.

The Risk Management Process involves:

- Identifying and categorizing project risks (Identify).
- Validating and logging the risk (Validate / Log) assessing and prioritizing the risks so they are manageable (Analyze).
- Developing a response strategy and assigning responsibility (Plan).
- Tracking the risks by reviewing them at key project milestones (Monitor/Track), and most importantly.
- Communicating the risks and strategies on an ongoing basis throughout the life of the project (Communicate).

The Risk Management Processes address internal risks - those under the control or influence of the project team, such as quality of deliverables, cost, schedule, or technical risks; as well as external risks - those outside the control of the project team such as governmental legislation.

The PM, along with the project team will validate any identified risk to make sure the information is complete, and the risk is not a duplicate. Once verified the risk information will be logged into the Risk Log and given a unique identifier.

Risk Description/Impact	Probability of Occurrence (high, medium, low)	Risk Tolerance (high, medium, low)	Mitigation Strategy	Assigned Owner
Hurricane impacting the state delays the schedule	Low	High	Adjust schedule accordingly	PM
Necessary tools, hardware, or materials need to be procured for the successful completion of the project.	Medium	Medium	Identify needs early on and involve management and budget staff throughout engagement	PM
Insufficient knowledge transfer of new process	Medium	Medium	Involve impacted staff throughout engagement to increase participation and knowledge of new processes	PM

### VIII. Capacity Plan

This project does not involve the purchase/lease, configuration, or installation of significant computer hardware. For purposes of capacity planning, computer hardware includes servers, storage, and network infrastructure. Accordingly, a Capacity Plan is not required. Once the claim volume starts to go down as the claims volume decreases, capacity can be reduced. Also moving to an auto-scaling configuration will additionally reduce needed capacity.

## SECTION 1 — OVERALL PROJECT PLAN

### I. *Project Charter*

The Department lacks current Reemployment Assistance Claims and Benefits Information System (System) application design documentation to facilitate the efficient and effective modification of the System and to ensure that changes to the original application design continue to align with Department business requirements.

The Final Report for Improved Delivery of Reemployment Assistance Benefits recommended that the Department document all System functional, technical, and non-technical requirements. System requirements would provide the level of details necessary for prospective partners to plan and estimate efforts the Department needs.

This project seeks to rectify the lack of System design documentation and the ongoing maintenance of said design documentation by improving the completeness and correctness of the application design documentation, related artifacts, and dataflow diagrams for the System, and ensuring that a SDLC process is in place that aligns System functionality with management’s business requirements.

#### A. **Scope Statement**

##### **In Scope**

- Implement Agile/Scrum processes for managing and tracking all System development work and documentation in DevOps.
- Update current Reemployment Assistance program business process and System documentation to establish the baseline for future state enhancements.
- Enter, track, and prioritize all in-progress and planned work items in DevOps.
- Build an initial release plan focusing on the implementation of immediate enhancements to be completed by current Scrum teams.
- Support the requirements gathering and planning for the incremental mobile-friendly modernization.

##### **Out of Scope**

- Software development work

#### B. **Project Objectives and Business Benefits**

<b>Project Objective</b>	<b>Business Benefit</b>
Updated system documentation is necessary prior to beginning analysis of new requirements needs.	Provides the level of detail necessary for prospective partners to plan and estimate the efforts the Department needs
Standardization of process leads to work and resource efficiencies	Allows for a more agile development process

Utilization of a single tool provides a single source of truth for work tracking and documentation	Allows for better resource and capacity planning of development work
Opportunity exists to utilize DevOps for improved operational efficiencies.	An agile DevOps process will improve the time to production by allowing better planning of development work
Support the requirements gathering and planning for the incremental mobile-friendly modernization	Allows for an improved customer service experience using mobile devices

### C. Critical Success Factors

- Artifacts from this project are living documents to be utilized during software development.
- Utilization of this SDLC produces a more measurable and efficient way of software development.

### D. Key Dates

Key Date	Importance and Relevance to the Project
02/22/2022	Procurement of Software & Services
05/6/2022	Configuration Azure DevOps Services
10/28/2022	Complete Business Process/Technology Specifications
10/28/2022	Migrate from TFS to DevOps
10/28/2022	Azure DevOps ServiceNow integration
11/22/2022	Implementation

### E. Major Deliverables

Major Deliverable	Deliverable Description
Procurement of Software & Services	Procure Azure DevOps services and Visual Studio 2019 software licenses. Procure two technical writers and a DevOps Engineer.
Configuration Azure DevOps Services	A software development environment that is both agile and secure
Migrate from TFS to DevOps	Import work backlog to new environment.
Create System/Process Documentation/Templates	Update the current software development workflow process. Create templates for system documentation. Update System documentation.
Developer Training	Provide training on new SDLC process and environment.
Implementation	System development environment is live

## F. Major Milestones

Major Milestone	Milestone Description
Initiation Phase Complete	All initiation activities completed
Planning Phase Complete	All planning activities completed
Execution Phase Complete	In progress
Monitor and Controlling Phase Complete	In progress
Closing Phase Complete	

## G. Key Stakeholders

Key Stakeholder	Project Interest
Dane Eagle	Secretary, Department of Economic Opportunity
Adrienne Johnston	Deputy Secretary, Division of Workforce Services
Domenic DiLullo	Chief Technology Officer
Allyce Moriak	Chief Financial Officer
Wendy Castle	RA Modernization Program Owner – Business
Paul Forrester	RA Modernization Program Owner – Information Technology
Nicole Sanislow	RA Modernization Program Manager - Business
Thomas Richardson	RA Modernization Program Manager - Strategic Planning Office
Garrick Wright	RA Modernization Program Manager – Information Technology
Alvin Sellers	Reemployment Assistance Operations Project Owner
Jim Sparks	Project Manager
Quinton Lightfoot	Application Development Lead
Sushma Kavarthapu	Application Developer

## H. Significant Project Assumptions and Constraints

### Project Assumptions

- The project will have access to the appropriate state management, staff, and related Program stakeholders (internal and external) and other resources as required and as needed without delay.
- DevOps infrastructure will be available as needed (hardware and software).
- There will be integration between the ITBM tool and the SDLC DevOps environment.
- System documentation is completed prior to start of requirements analysis for modernization.
- The project experiences no delays in schedule.

### Project Constraints

- Software developers and subject matter experts (SMEs) have competing operational tasks and have limited time to devote to the project.

## II. Work Breakdown Structure

▾ SDLC Dev Ops	Thu 12/9/21	Tue 11/22/22
▸ Initiation	Thu 12/9/21	Tue 1/18/22
▸ Planning	Mon 12/20/21	Tue 2/22/22
▾ Execution	Thu 1/6/22	Thu 11/17/22
▸ Procurement	Thu 1/6/22	Fri 4/29/22
▸ Documentation	Tue 6/7/22	Fri 10/7/22
▾ ServiceNow Development	Tue 8/30/22	Thu 11/17/22
▸ Process Flow	Tue 8/30/22	Tue 8/30/22
▸ Field List	Wed 8/31/22	Fri 9/23/22
▸ Statuses	Wed 9/7/22	Fri 10/28/22
▸ User Story Review	Tue 9/6/22	Mon 9/19/22
▸ Define SN User Groups	Fri 9/2/22	Tue 10/4/22
▸ Front End Design	Mon 9/12/22	Fri 10/28/22
▸ ServiceNow to Azure DevOps Integration	Tue 8/30/22	Fri 10/28/22
▸ Data Conversion	Wed 9/21/22	Fri 10/28/22
▸ ADO Development	Mon 9/19/22	Mon 10/3/22
▸ Import into ADO	Tue 10/4/22	<u>Tue 10/4/22</u>
▸ ADO Environment	Wed 9/28/22	Mon 10/31/22
▸ UAT Testing	Tue 9/13/22	Mon 11/14/22
▸ Training	Mon 10/17/22	Mon 10/24/22
▸ Deploy	Thu 11/17/22	Thu 11/17/22
▸ Project Closeout	Wed 11/9/22	Tue 11/22/22

## III. Resource Loaded Project Schedule

Task Name	Start	Finish	Resource Names
<b>SDLC Dev Ops</b>	<b>Thu 12/9/21</b>	<b>Tue 11/22/22</b>	
<b>Initiation</b>	<b>Thu 12/9/21</b>	<b>Tue 1/18/22</b>	
<b>Risk and Complexity Assessment</b>	<b>Fri 12/10/21</b>	<b>Mon 12/13/21</b>	
Complete Pre-Charter Risk & Complexity Assessment and determine Project Level	Fri 12/10/21	Fri 12/10/21	Monique Emmanuel
Complete Initiation Gate Risk & Complexity Assessment	Sat 12/11/21	Mon 12/13/21	Monique Emmanuel
<b>Deliverable: Project Charter</b>	<b>Sat 12/11/21</b>	<b>Wed 12/15/21</b>	
Develop Project Charter	Sat 12/11/21	Mon 12/13/21	Monique Emmanuel
Review/Update Project Charter	Sun 12/12/21	Mon 12/13/21	Monique Emmanuel

Approve Project Charter	Wed 12/15/21	Wed 12/15/21	Monique Emmanuel, Garrick Wright, Thomas Richardson, Nicole Sanislow
Project Charter complete	Mon 12/13/21	Mon 12/13/21	Monique Emmanuel, Garrick Wright, Thomas Richardson, Nicole Sanislow
<b>Project Kickoff Meeting</b>	<b>Thu 12/9/21</b>	<b>Fri 1/14/22</b>	
Prepare presentation	Thu 1/6/22	Thu 1/6/22	Monique Emmanuel
Schedule Kickoff meeting	Thu 12/9/21	Thu 12/9/21	Monique Emmanuel
Conduct Kickoff meeting	Fri 1/14/22	Fri 1/14/22	Monique Emmanuel
<b>Conduct Lessons Learned Meeting</b>	<b>Fri 1/14/22</b>	<b>Mon 1/17/22</b>	
Schedule Lessons Learned meeting	Fri 1/14/22	Fri 1/14/22	Monique Emmanuel
Conduct Lessons Learned meeting	Mon 1/17/22	Mon 1/17/22	Monique Emmanuel
Record Lessons Learned	Mon 1/17/22	Mon 1/17/22	Monique Emmanuel
Initiation Phase complete	Tue 1/18/22	Tue 1/18/22	Monique Emmanuel
<b>Planning</b>	<b>Mon 12/20/21</b>	<b>Tue 2/22/22</b>	
<b>Deliverable: Resource Plan</b>	<b>Mon 12/20/21</b>	<b>Wed 2/2/22</b>	
Resource Plan Complete	Wed 2/2/22	Wed 2/2/22	Monique Emmanuel
<b>Deliverable: Project Schedule</b>	<b>Tue 12/21/21</b>	<b>Fri 1/28/22</b>	
Prepare Work Breakdown Structure	Tue 12/21/21	Wed 1/26/22	Monique Emmanuel
Develop Project Schedule	Fri 12/24/21	Wed 1/26/22	Monique Emmanuel
Review/Update Project Schedule	Wed 1/26/22	Wed 1/26/22	Thomas Richardson, Garrick Wright, Nicole Sanislow
Approve Project Schedule	Wed 1/26/22	Fri 1/28/22	Thomas Richardson, Garrick Wright, Nicole Sanislow
Project Schedule complete	Sun 12/26/21	Sun 12/26/21	Monique Emmanuel
<b>Deliverable: Project Management Plan</b>	<b>Mon 12/27/21</b>	<b>Wed 2/2/22</b>	
Develop Project Management Plan	Mon 12/27/21	Wed 1/26/22	Monique Emmanuel

Review/Update Project Management Plan	Mon 1/31/22	Wed 2/2/22	Thomas Richardson, Garrick Wright, Nicole Sanislow, Quinton Lightfoot, Robin Hodge-Carey
Approve Project Management Plan	Wed 2/2/22	Wed 2/2/22	Monique Emmanuel
Project Management Plan complete	Wed 2/2/22	Wed 2/2/22	Monique Emmanuel
<b>Deliverable: Project Budget</b>	<b>Fri 12/31/21</b>	<b>Thu 1/27/22</b>	
Prepare Project Budget	Fri 12/31/21	Wed 1/26/22	Monique Emmanuel
Review/Update Project Budget	Sat 1/1/22	Wed 1/26/22	Monique Emmanuel
Approve Project Budget	Thu 1/27/22	Thu 1/27/22	Monique Emmanuel
Project Budget complete	Fri 1/28/22	Fri 1/28/22	Monique Emmanuel
<b>Deliverable: Project Spending Plan</b>	<b>Mon 1/3/22</b>	<b>Fri 1/28/22</b>	
Prepare a Project Spending Plan	Mon 1/3/22	Wed 1/26/22	Monique Emmanuel
Review/Update Project Spending Plan	Thu 1/27/22	Thu 1/27/22	Monique Emmanuel
Approve Project Spending Plan	Fri 1/28/22	Fri 1/28/22	Monique Emmanuel
Project Spending Plan complete	Fri 1/7/22	Fri 1/28/22	Monique Emmanuel
<b>Requirements:</b>	<b>Tue 2/1/22</b>	<b>Mon 2/21/22</b>	
<b>Gather requirements</b>	<b>Tue 2/1/22</b>	<b>Mon 2/21/22</b>	
Schedule JAD Sessions	Tue 2/1/22	Tue 2/1/22	Monique Emmanuel
Conduct JAD sessions	Thu 2/3/22	Mon 2/21/22	Benjamin Beha
Finalize requirements	Mon 2/21/22	Mon 2/21/22	Benjamin Beha
<b>Deliverable: Requirements Traceability Matrix</b>	<b>Mon 2/14/22</b>	<b>Wed 2/16/22</b>	
Develop RTM	Mon 2/14/22	Mon 2/14/22	Benjamin Beha
Review RTM	Tue 2/15/22	Tue 2/15/22	Monique Emmanuel
Approve RTM	Wed 2/16/22	Wed 2/16/22	Monique Emmanuel

Requirements Traceability Matrix complete	Wed 2/16/22	Wed 2/16/22	Monique Emmanuel
Complete the Planning Gate R&C Assessment	Thu 2/17/22	Thu 2/17/22	Monique Emmanuel
<b>Conduct Lessons Learned Meeting</b>	<b>Thu 2/3/22</b>	<b>Mon 2/21/22</b>	
Schedule Lessons Learned meeting	Thu 2/3/22	Thu 2/3/22	Monique Emmanuel
Conduct Lessons Learned meeting	Fri 2/18/22	Fri 2/18/22	Monique Emmanuel
Record Lessons Learned	Mon 2/21/22	Mon 2/21/22	Monique Emmanuel
Planning Phase complete	Tue 2/22/22	Tue 2/22/22	Monique Emmanuel
<b>Execution</b>	<b>Thu 12/9/21</b>	<b>Tue 11/22/22</b>	
<b>Procurement</b>	<b>Thu 1/6/22</b>	<b>Fri 4/29/22</b>	
Procure Azure DevOps services	Thu 1/6/22	Fri 2/18/22	Quinton Lightfoot
Procure Visual Studio licenses upgrade to 2019	Thu 1/6/22	Fri 2/18/22	Quinton Lightfoot
Procure technical writer	Thu 1/6/22	Fri 2/11/22	Quinton Lightfoot
Procure DevOps Engineer	Thu 1/6/22	Fri 4/29/22	Quinton Lightfoot
Provision Virtual Desktops	Mon 4/4/22	Fri 4/8/22	Roland Solvik

**Project Management Methodology**

DEO will use a project management methodology in compliance with project management standard rule 60GG-2 F.A.C., project requirements and department experience with similar engagements. Predictability, accountability, and flexibility are key elements that must be embraced by the overall project management approach to ensure DEO’s satisfaction and project success. Successful project management must include active and visible leadership, multiple controls and checkpoints with measurable outcomes, and engagement with all stakeholders. DEO believes strong project management is critical throughout the life of any successful project.

For this project, DEO’s project management will include the following specific elements, in addition to our standard methodology:

- The project management team will advise leadership on areas of concern and will propose solutions to mitigate risk.
- Vendors will respond to inquiries or requests from DEO within one business day from receipt.
- In the case where additional time is needed for a task, vendors will provide an estimate, which must be approved by the DEO Project Manager.
- At the end of the contract, vendors will provide final copies of all reports in electronic format for archive purposes.

DEO’s project management approach will utilize the technical skills, tools, and techniques needed to succeed, as well as the dedication to accountability, resource commitment, and organizational focus. Project success will be the result of active communication among all

individuals, understanding everyone's role in the project, and clear delineation of responsibilities.

DEO believes successful project management hinges on the following:

- Clearly established project goals and requirements
- Ongoing assessment of quality against established standards
- Constant measurement of success against established deliverables and milestones
- Personal presence and commitment of key project leadership
- Proactive identification and communication of risks and issues

### **Quality Management Plan**

The Quality Management Plan ensures work is complete and meets or exceeds an adequate level of quality of the deliverables. All members of the project team will play a role in quality management, and it is critical the team ensures work is completed according to DEO standards for quality acceptance.

Project Quality Management activities will ensure project documents meet agreed upon standards, work is performed efficiently, project practices conform to recommended project standards and deficiencies are identified and corrective action taken.

### **Quality Management Approach**

Managing quality includes four major processes:

- **Quality planning (QP):** Completeness and correctness criteria define what it means for a project document to be complete and correct. The project team will establish completeness and correctness criteria. Specific criteria for the quality of Contract Deliverables will be documented in the contract and managed by the Contract Manager, program team and Project Manager.
- **Quality assurance (QA)** refers to the process used to create project documents, not the deliverables themselves. The Project Team will perform QA activities for the project weekly. The project manager may make changes to processes as necessary; changes will be communicated to the appropriate stakeholders.
- **Quality control (QC):** Performing Quality Control (QC) involves monitoring specific project results to determine whether they comply with relevant quality standards and identifying ways to eliminate causes of unsatisfactory results. The Strategic Planning Office (SPO) will perform (QC) activities to verify project management and documents are of high quality. If the SPO determines a project document to be complete, it will be presented to the Project Team at the following Status Meeting.
- **Quality improvement (QI):** The Project Manager is responsible to implement corrective actions based on the results of the quality management processes. These may include changes to project management processes; required training for stakeholders; updating performance metrics, etc.

### **Communication Management Plan**

This project will follow the communications processes outlined in the RA Modernization Program Communications Management Plan.

The master copy of this document is available in the [RA Modernization Program Library](#) in the Central Repository

The communication matrix below identifies the key project stakeholders and the detail of communications for this project.

Item	Purpose	Format	When/ Frequency	Type	Initiator	Recipient	Feedback
Project Meeting	Provide and discuss project tasks, issues, risks, action items	Meeting/Face to face or virtual)	Daily/ Weekly as needed	Mandatory	Project Manager	Project Team	Meeting Minutes
Status Report	Provide detailed information on the progress of the project against the plan	Email	Weekly/ Monthly/ Quarterly	Mandatory	Project Manager	Project Team/SPO Program Manager	Verbal and follow-up email
SPO Status Meeting	Review the status report, resolve issues, and make decisions	Meeting	Weekly	Mandatory	Project Manager	SPO Program Manager	Verbal and follow-up email
Project Deliverables	Provide deliverables to DEO for review	Email	Per project schedule	Mandatory	Project Manager	SPO Program Manager/ Project Team members	Written vetted, consolidated, and actionable comments
Deliverable Review Feedback	Provide vetted, consolidated, and actionable written comments	Email	Per project schedule	Mandatory	SPO Program Manager	Project Manager/ Project Team Members	Written/ email follow-up using Deliverable Review Comment Form
Deliverable Review Walkthrough	Confirm mutual understanding of desired deliverable changes	Meeting	As needed	Informational	Project Manager	Program Managers/ Project Owners	Verbal or written

Work Session	Gather information from subject matter experts	Meeting	Per project schedule	Mandatory	Project Manager	Update subject matter experts (only if the SPO Project Manager has the approved communication)	Verbal and follow-up email
Work Session Follow-up	To answer questions or clarify information gathered	Email	As needed	Informational	Project Manager	Provide subject matter experts (only if SPO Project Manager has approved the communication)	Verbal or email follow-up
Online Survey	Gather information from subject matter experts (former providers)	Email	Per project schedule	As needed	Project Manager	Subject matter experts (only if SPO Project Manager has approved the communication)	Verbal or email follow-up
Project Issues	Documentation of project issues	Issue Log Entry	As needed	Mandatory	Any Stakeholder	Project Owner/ Project Manager	Written/ email follow-up
Project Issues Escalation	To resolve project issues	Email	As needed	Mandatory	Project Manager	SPO Program Manager	Written/ email follow-up
Change Requests	Document project changes to scope of work	Change Request Form	As needed	Mandatory	Change Initiator	Project Manager/ Change Owner/ Change Analyst/ CCB	Written/ email follow-up
Project Closeout and Lessons Learned	Formal project closeout meeting	Email	Per project schedule	Mandatory	SPO Project Manager	All Stakeholders	Written/ email follow-up

### Weekly Status Reporting

Vendors will be required to submit status reports throughout the project at several levels. The primary source of status information is the weekly written status report, which will communicate at minimum, the following information.

- **Project Status.** This section depicts the project status at a summary level using a red/yellow/green method supported by two to three essential questions that are answered to determine summary status. The red/yellow/green method is not meant to be a grading system but instead it is a way to easily identify the areas of the project that need the most attention to make the project successful.
- **Overview of Project Progress.** This section describes significant accomplishments achieved in the reporting period.
- **Overall Status.** This section provides a high-level overview of whether the project is on schedule, on budget, and on scope. A yellow or red status should be explained here in detail.

- **Project Milestones, Deliverables, and Latest Tasks.** This section contains the major deliverables of the project, their planned and actual completion dates, and their status.
- **Risks, Action Items, Issues, and Decisions.** This section will link to the project risk, action item, issue, and decision tracking tool. The project tracking tool contains all items tracked during the project.

**Project Tracking**

This section describes the “RAID” methodology for tracking risks, action items, issues, and decisions. DEO will follow a centralized approach that minimizes miscommunication or misinformation among project stakeholders. The Department will diligently maintain a project tracking log for each project, and a master log for the System Modernization project overall, a Microsoft Excel workbook with multiple tabs intended to capture the details and the latest attributes of items tracked by Project Managers.

**VI. Business Process Organizational Change Management Plan**

This project will follow the organizational change processes outlined in the RA Modernization Program Organizational Change Management Plan.

The master copy of this document is available in the [RA Modernization Program Library](#) in the Central Repository.

The role of the Organizational Change Management plan (OCM) within an individual project under the RA Modernization Program is to help plan for and manage the people side of the project. OCM focuses on identifying, preparing and managing a wide array of internal and external stakeholders, employees and customers that will be impacted by the new solution. It is good for those stakeholders to feel informed, prepared, trained and ready to participate in a successful implementation. It is beneficial for employees to adopt new skills and develop new capabilities and to value and appreciate the features that the new technology offers.

**VII. Project Risk Management Plan**

**Risk & Complexity Assessment**

The Risk & Complexity Assessment will be completed at the end of every Phase in the Project lifecycle. The Project Manager is responsible to complete this assessment with the assistance of project team members.

Risk & Complexity Assessments	Category
Pre-Charter Risk & Complexity Category	2
Initiation Gate Risk & Complexity Category	1
Planning Gate Risk & Complexity Category	1
Event Driven Risk & Complexity Category	

### Project Risk Management

This project will follow the risk management processes outlined in the RA Modernization Program Risk Management Plan.

The master copy of this document is available in the [RA Modernization Program Library](#) in the Central Repository.

The risk management process helps the project team anticipate and respond to emerging risks throughout the duration of the project. The risk management process occurs throughout all phases of the project, from planning through execution and closeout. Project risks are logged and tracked in the Project Log Workbook (RAID Logs).

Figure 2 below illustrates the major activities associated with the key risk management process.

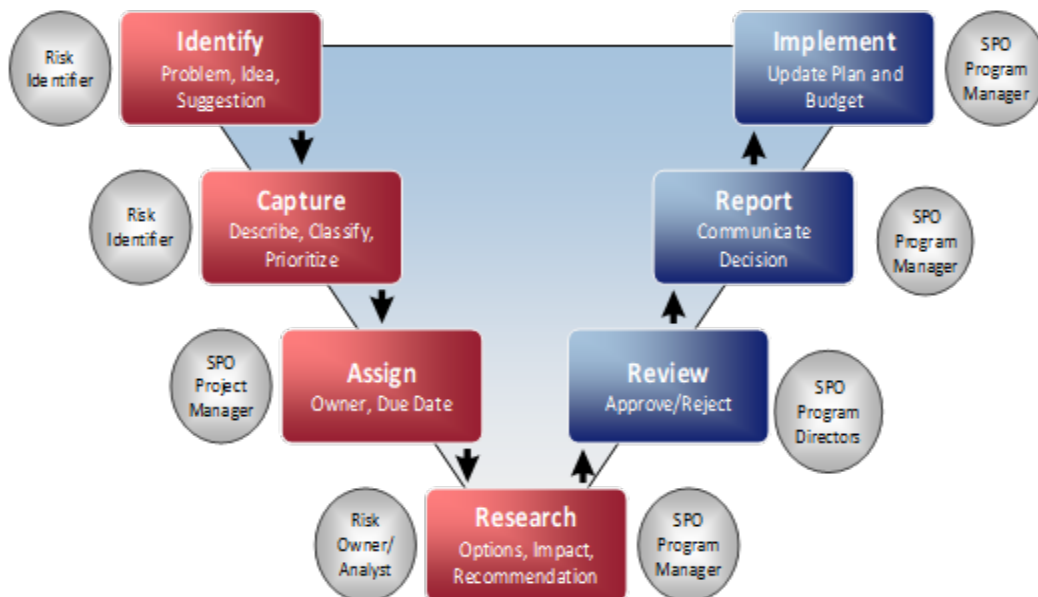

Figure 2: RA Modernization Program Risk Management Process

### Action Items

Action items are unplanned tasks that occur during a project that are too small to be added to the schedule. These items must be within the scope of the project and are often tasks that support scheduled tasks, issue resolution, risk management, or some other aspect of the project. The action item log is created and maintained as part of the project tracking log.

Action items will be managed in the following manner:

- During status meetings, any stakeholder can raise an action item for discussion.
- The Project team will discuss the action item and determine if it warrants being monitored in the action item log.
- The project manager will enter the item in the log.
- The team will set the priority for the action item (high/medium/low), assign an action item owner, and set a planned completion date.

- At each subsequent status meeting, the action item(s) will be reviewed until they can be closed.

### Issue Management

This project will follow the issue management processes outlined in the RA Modernization Program Issue Management Plan.

The master copy of this document is available in the [RA Modernization Program Library](#) in the Central Repository.

An issue is an immediate problem that needs resolution. Acknowledging and addressing issues quickly ensures that they do not impact the scope of the project. Project issues are logged and tracked in the Project Log Workbook (RAID Logs).

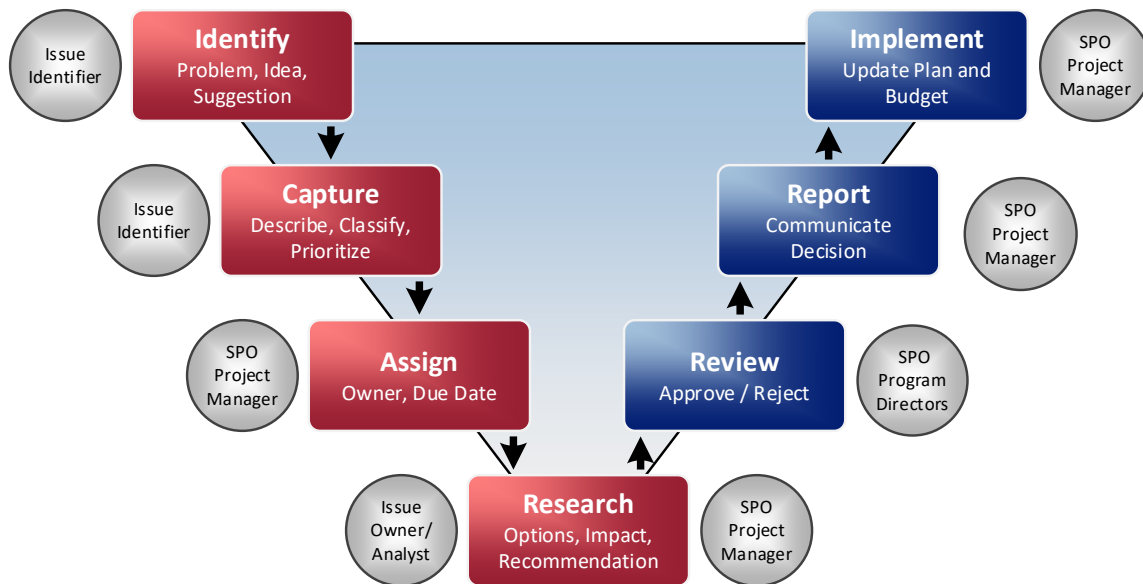

Figure 3: RA Modernization Program Issue Management Process

### Decisions

Decisions are leadership answers to questions that arise during the project. The decision log is created and maintained as part of the project tracking log.

Decisions will be managed in the following manner:

- During status meetings, any stakeholder can raise a question that requires a decision.
- If the team determines a decision needs to be made, the project manager will enter it in the decision log.
- The team will discuss the impact to the project, assign a decision maker, and set a date for when the decision is needed.
- At each subsequent status meeting, the decision item(s) will be reviewed until they can be closed.

### Change Management

This project will follow the change processes outlined in the RA Modernization Program Change Management Plan.

The master copy of this document is available in the [RA Modernization Program Library](#) in the Central Repository.

The *RA Modernization Change Management Plan*, defines the approach and provides the processes for initiating, defining, researching, evaluating, reviewing, prioritizing, managing cost, approving or rejecting the change requests (CRs), and communicating the status of the change that may affect the success of the SDLC DevOps project.

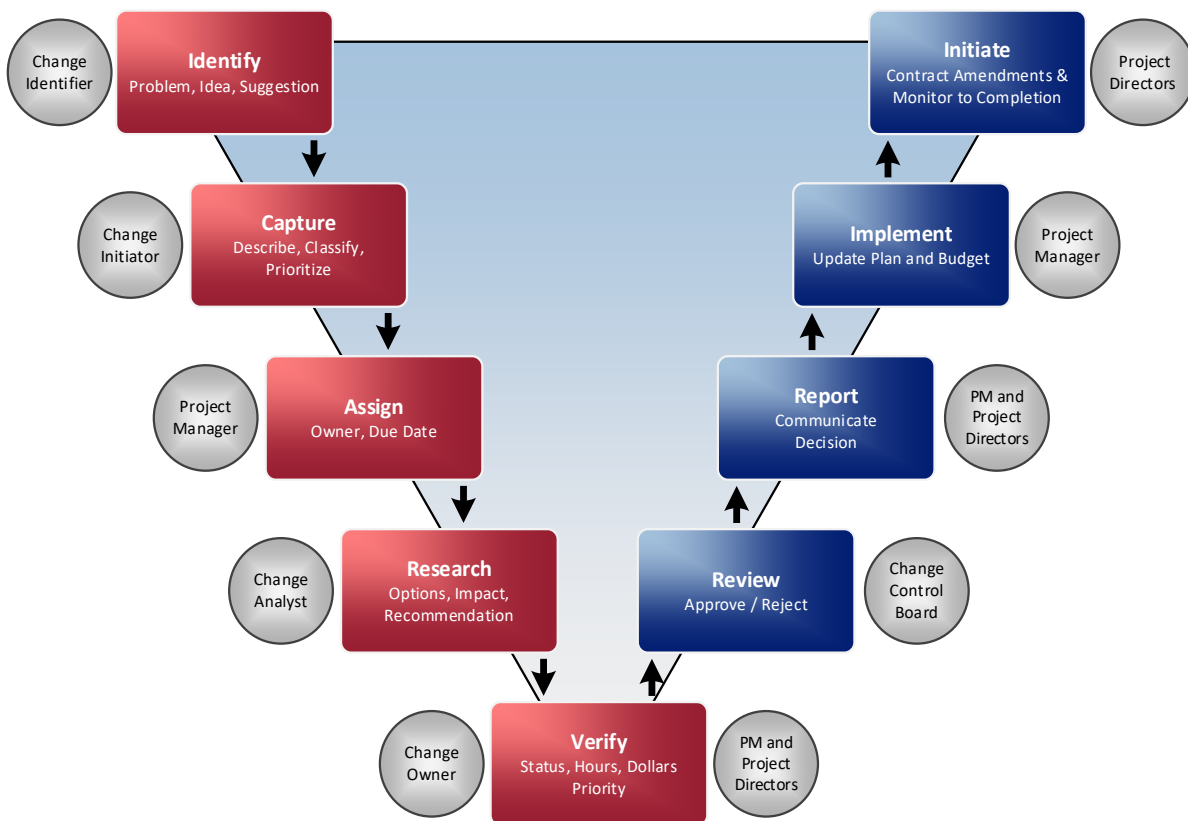

Figure 4: RA Modernization Program Change Management Process

### Schedule Management

The project schedule for this project will be stored in the Central Repository 03 SDLC DevOps Project Deliverables folder.

### Schedule Maintenance

The project schedule maintenance is an on-going activity that tracks the work performed, the timeframes for when the work has been or will be completed and progress against the baseline

work estimates and timelines. To effectively track the program progress, the project schedule is kept current, and reflects all work that needs to be performed, in accordance with the RA Modernization Program Schedule Management Plan.

If a change to the project schedule or scope is needed, the Project Manager may pursue a change request as described in the [RA Modernization Change Management Plan](#).

### Procurement Management

The Procurement Management Plan seeks to outline how the project will procure resources necessary to complete the project objectives. It defines the procurement methodology for this project, lays out the process for managing procurement throughout the life of the project, and will be updated if project needs change. This plan identifies and defines the goods and services to be procured, the types of contracts to be used in support of this project, the contract approval process, and the decision criteria. The importance of coordinating the procurement activities, establishing firm contract deliverables, and metrics in measuring procurement activities is included in the following subsections.

### Procurement Management Approach

The DEO Purchasing Office and any vendors contracted for procurement assistance will provide oversight and management along with the Project Manager for all procurement activities under this project. The Project Manager will work with the project team to identify all items to be procured for the successful completion of the project. The Department Strategic Planning Office (SPO) will then review any procurement requests prior to approving the development of procurement documentation.

### Procurement Definition

The following table will be completed to record any procurement goods and/or services determined to be essential for any RA Modernization project’s completion and success. The Project Manager and/or SPO must approve any procurement before inclusion in this table.

Procurement	Description	Justification	Needed By
Azure DevOps services	An integrated set of services and tools to manage your software projects, from planning and development through testing and deployment	Needed to support RA Modernization Program software development activities	2/28/2022
Virtual Desktops for Developers (VDI farm)	Virtual Desktops for developers	Needed due to network latency between the cloud and on-premise devices	2/28/2022
Visual Studio licenses upgrade to 2019	Microsoft Visual Studio is an integrated development environment (IDE). It is used to develop computer programs, as well as	Needed to support RA Modernization Program software development activities	1/31/2022

	websites, web apps, web services, and mobile apps.		
Staff Augmentation Technical Writer	Two resources needed for the following tasks: 1) Creating and maintaining IT documentation. 2) Translating technical and/or complicated information into clear, concise documents appropriate for various target audiences. 3) Working with Developers, Quality Assurance, and Architects to produce a wide variety of technical specifications, technical manuals, and product documentation. 4) Interviewing subject matter experts and technical staff to collect information, prepare written text, and coordinate layout and material organization. 5) Researching information such as drawings, design reports, equipment, and test specifications to fill any gaps. 6) Reviewing, critiquing, and editing documentation including design documents, programmer notes, and system overviews. 7) Maintaining an internal documentation library, providing and/or coordinating special documentation services as required, and providing oversight of special projects. 9) Documenting requirements and traceability in tools to include ALM, TFS, and ServiceNow. 10) Developing technical specifications templates.	Skill needed for documentation not available in development team	2/28/2022
Staff Augmentation DevOps Engineer	A DevOps Engineer is needed to configure/build Azure/DevOps Environment		

**Cost Management**

The tables below will be completed and used to define and track project costs during the SDLC DevOps Project.

Cost Management Plan				
Category	Description	Frequency	Deliverable	Cost

--	--	--	--	--

Column	Definition
Category	Type of expense
Description	Description of expense
Frequency	Describe whether the expense is annual or recurring or a one-time expense
Deliverable	List the deliverable associated with the expense
Cost	List the total expense in dollars, e.g., \$0.00

### Staffing Management

The purpose of this section is to outline how the project is to manage staffing requirements and resource tasks appropriately. This project plans to procure additional staffing through Staff Augmentation contracts. The needs for each individual project have been estimated before the project and will be refined during requirements gathering and procurement of services.

### VIII. Capacity Plan

Utilization of a single tool for software development provides a single source of truth for work tracking and resource allocation which can then be utilized for capacity planning for the development environment, tools, and developers.

#### Project Capacity Planning

- Establish Cross-Functional Team: To collaborate and communicate about production capacity and resource management, you want a cross-functional team with different levels and different functions.
- Calculate Resource Capacity: Before you can create a production capacity plan, you need to have an idea of your current capacity and your available resources.
- Determine Resource Requirements: For each project, look at the scope and what resources are required to do the task for the project.
- Prioritize Projects: Which projects are most important, and which can be put aside for the time being? You can't do everything at once.
- Allocate Resources Based on Project Priority: Now allocate those prioritized projects and make sure that they are aligned with the goals of the organization.
- Keep the Lines of Communications Open: Communicate between executives, project management leaders and stakeholders.
- Document Known Risks: Monitor risks such as union strikes, weather, government regulations that stop a project or create new ones unexpectedly.
- Plan for How to Handle Too Much Capacity: Understand where it is and how to resolve it (such as reassigning), or not enough capacity (again, where/how).

## SECTION 1 — OVERALL PROJECT PLAN

### I. Project Charter

The .NET and ORM Upgrade project will establish a solid architectural basis in support of the Reemployment Assistance Claims and Benefits Information System’s (System) continuous modernization by upgrading the Reemployment Assistance application to the latest version of the .NET Framework and defining a new architecture based on .NET Core and Web API framework for the modernized System. This project also upgrades the Object Relational Mapping (ORM) software to the most current version.

#### A. Scope Statement

Complete planning for the .NET upgrade to Framework 4.8, readiness activities, and migrate Reemployment Assistance infrastructure from the State Data Center and Winter Haven Disaster Recovery sites to a Cloud Service Provider using an IaaS hosting model; implement an improved document and generation management solution; transition to a cloud-based IVR solution.

#### B. Project Objectives and Business Benefits

Project Objective	Business Benefit
Upgrade the .NET framework from the current level to .NET 4.8.	<ul style="list-style-type: none"> <li>Mitigate technical risks and issues associated with the older framework</li> </ul>
Migrate all older .NET framework to the newer framework.	<ul style="list-style-type: none"> <li>The updated .NET 4.8 framework will allow the continuous moderation of the .NET core and the API framework.</li> </ul>
Upgrade the ORM to the most current software	<ul style="list-style-type: none"> <li>The updated ORM will allow improved object mapping in incompatible and compatible systems.</li> </ul>

#### C. Critical Success Factors

- Migration to the updated .NET 4.8 framework
- Implementation of the upgraded ORM

#### D. Key Dates

Key Date	Importance and Relevance to the Project
6/12/2022	Upgrade .NET framework for the System
6/12/2022	Upgrade .NET framework for FIRRE
6/12/2022	Upgrade Utilities Projects (High Priority)
6/12/2022	Upgrade Utilities Projects (Low Priority)
11/07/2022	Upgrade ORM

### E. Major Deliverables

Major Deliverable	Deliverable Description
Upgrade .NET framework for the System	Implement new .NET 4.8 framework
Upgrade .NET framework for FIRRE	Implement new .NET 4.8 framework
Upgrade Utilities Projects (High Priority)	Implement new .NET 4.8 framework
Upgrade Utilities Projects (Low Priority)	Implement new .NET 4.8 framework
Test for compatibility with upgraded .NET framework (LLBLGen)	Implement new .NET 4.8 framework
Upgrade the ORM	Implement the new ORM

### F. Major Milestones

Major Milestone	Milestone Description
Initiation Phase Complete	All initiation activities completed
Planning Phase Complete	All Planning activities completed
Execution Phase Complete	In Progress
Monitoring and Controlling Phase Complete	In Progress
Closing Phase Complete	Pending

### G. Key Stakeholders

Key Stakeholder	Project Interest
Dane Eagle	Secretary, Department of Economic Opportunity
Adrienne Johnston	Deputy Secretary, Division of Workforce Services
Domenic Dilullo	Chief Technology Officer
Ed Wynn	Chief Information Officer
Allyce Moriak	Chief Financial Officer
Wendy Castle	RA Modernization Program Owner – Business
Paul Forrester	RA Modernization Program Owner – Information Technology
Nicole Sanislow	RA Modernization Program Manager - Business
Thomas Richardson	RA Modernization Program Manager - Strategic Planning Office
Garrick Wright	RA Modernization Program Manager - Information Technology
Jim Sparks	Project Manager
Quinton Lightfoot	Application Development Lead
Sushma Kavarthapu	Application Developer
Alvin Sellers	Reemployment Assistance Operations Project Owner
Amitkumar Kanaiyalal	Business Analyst

## H. Significant Project Assumptions and Constraints

### Project Assumptions

1. All identified funding is available.
2. The identified system requirements are correct and complete.
3. The assigned development resources possess relevant knowledge and skills to complete the identified tasks.
4. All the people involved at the beginning of the project will remain working on the project until the project is completed.
5. Members of the project team will have access to the necessary tools, hardware, and materials necessary to complete the identified tasks.
6. All relevant stakeholders will attend required status meetings. However, there may be instances where some stakeholders are unavailable to attend.
7. The project sponsor will be responsive and prepared to make decisions regarding the project cost, scope, and schedule.

### Project Constraints

1. None at this time

## II. Work Breakdown Structure

WBS	Task Name
<b>1</b>	<b>.NET upgrade to 4.8 framework- ORM upgrade</b>
<b>1.1</b>	<b>Initiation</b>
1.1.1	Determine Azure Environment
<b>1.1.2</b>	<b>ORM</b>
1.1.2.1	Purchase ORM licenses
1.1.2.2	Update, Deploy, and Test
<b>1.1.3</b>	<b>.NET Framework</b>
1.1.3.1	Initiate a review of the current .NET Framework
1.1.3.2	Review and Approve Final Proposal to .NET 4.8 Framework
1.1.3.3	Upgrade Plan
1.1.3.4	License Update and Upgrade
<b>1.1.4</b>	<b>ORM</b>
1.1.4.1	Decide on Development timeline
1.1.4.2	Conversion & Upgrade
1.2	Determine Staff Aug Resources
<b>1.3</b>	<b>Planning</b>
1.3.1	Determine the upgrade of the .NET framework
<b>1.3.3</b>	<b>Application, .NET Framework</b>
1.3.3.1	Determine level of refactoring

<b>1.3.5</b>	<b>ORM</b>
1.3.5.1	Meet with Vendors to Discuss Options for the upgrade
1.3.6	Procure Staff Aug Resources
<b>1.4</b>	<b>Execution</b>
<b>1.4.2</b>	<b>Application</b>
1.4.2.1	Upgrade .NET framework from 4.0 to 4.8 for the System
1.4.2.2	Upgrade .NET framework from 4.0 to 4.8 for FIRRE
1.4.2.3	Upgrade utilities projects (high priority)
1.4.2.4	Upgrade utilities projects (low priority)
1.4.2.5	Test for compatibility with upgraded .NET framework (LLBLGen)
<b>1.4.3</b>	<b>ORM</b>
1.4.3.1	Upgrade the ORM to the latest version
<b>1.4.4</b>	<b>Testing .NET and ORM Upgrades</b>
1.4.4.1	Implement Testing of the new .NET Framework
1.4.4.2	Implement testing of the new ORM software

### III. Resource Loaded Project Schedule

Task Name	Start	Finish
<b>.NET -ORM Upgrade</b>	<b>Tue 8/3/21</b>	<b>Mon 10/24/22</b>
<b>Initiation</b>	<b>Tue 8/3/21</b>	<b>Wed 2/2/22</b>
<b>Risk and Complexity Assessment</b>	<b>Tue 8/3/21</b>	<b>Thu 1/20/22</b>
Complete Pre-Charter Risk&Complexity Assessment and determine Project Level	Tue 8/3/21	Thu 1/20/22
Complete Initiation Gate Risk & Complexity Assessment	Wed 8/4/21	Thu 1/20/22
<b>Deliverable: Project Charter</b>	<b>Wed 8/4/21</b>	<b>Fri 12/17/21</b>
Develop Project Charter	Wed 8/4/21	Fri 11/19/21
Review/Update Project Charter	Mon 11/22/21	Mon 11/29/21
Approve Project Charter	Mon 12/6/21	Fri 12/17/21
Project Charter complete	Tue 12/21/21	Wed 12/22/21
<b>Project Kickoff Meeting</b>	<b>Tue 1/18/22</b>	<b>Tue 1/25/22</b>
Prepare presentation	Tue 1/18/22	Tue 1/25/22
Schedule Kickoff meeting	Tue 1/25/22	Tue 1/25/22
Conduct Kickoff meeting	Tue 1/25/22	Tue 1/25/22
<b>Conduct Lessons Learned Meeting</b>	<b>Wed 1/26/22</b>	<b>Mon 1/31/22</b>
Schedule Lessons Learned meeting	Wed 1/26/22	Wed 1/26/22
Conduct Lessons Learned meeting	Mon 1/31/22	Mon 1/31/22
Record Lessons Learned	Mon 1/31/22	Mon 1/31/22
Initiation Phase complete	Wed 2/2/22	Wed 2/2/22
<b>Planning</b>	<b>Tue 8/24/21</b>	<b>Mon 2/14/22</b>
<b>Execution</b>	<b>Sat 9/11/21</b>	<b>Thu 10/20/22</b>

Prepare Operations and Maintenance Plan (only required for Level 2-4 projects)	Sat 9/11/21	Mon 2/28/22
Required Project Development	Tue 9/14/21	Fri 3/4/22
<b>Conduct Lessons Learned Meeting</b>	<b>Wed 9/15/21</b>	<b>Thu 3/31/22</b>
Schedule Lessons Learned meeting	Wed 9/15/21	Fri 3/25/22
Conduct Lessons Learned meeting	Thu 9/16/21	Thu 3/31/22
Record Lessons Learned	Fri 9/17/21	Thu 3/31/22
<b>Upgrade .NET -ORM</b>	<b>Mon 11/1/21</b>	<b>Thu 10/20/22</b>
1.1.2 Analysis for .NET Connect	Mon 11/1/21	Fri 11/5/21
1.1.5 Technical Debt for .NET Connect	Mon 12/27/21	Thu 3/31/22
1.2.1 Code Merge for .NET Framework FIRRE	Mon 1/24/22	Fri 3/18/22
1.2.2 Analysis .NET Framework for FIRRE	Mon 1/10/22	Fri 1/21/22
1.2.3 Development of .NET Framework for FIRRE (Lower Environment)	Mon 1/24/22	Fri 2/18/22
1.2.4 Deployment of .NET Framework FIRRE SysTest	Mon 2/21/22	Fri 3/4/22
1.2.5 Technical Debt .NET Framework for FIRRE	Mon 3/7/22	Fri 3/18/22
1.3.1 DB Tests for .NET Framework for TOP	Mon 2/14/22	Fri 3/11/22
1.3.2 Batch Tests for .NET for TOP	Mon 2/21/22	Fri 3/11/22
1.3.3 Regression and Smoke Tests for .NET for TOP	Mon 2/28/22	Fri 3/11/22
1.4.1 .NET Framework for DARS	Mon 3/14/22	Mon 3/21/22
1.5.1 Upgrade Utilities for .NET \Utilities\PageFlow GUI	Mon 1/31/22	Mon 2/21/22
1.5.2 Upgrade Utilities for .NET (High Priority)	Mon 11/1/21	Tue 11/2/21
1.5.3 Upgrade Utilities for .NET (High Priority) \Utilities\LLBLHelper	Wed 11/3/21	Thu 11/4/21
1.5.4 Upgrade Utilities for .NET (High Priority) \Utilities\LDAPHelper	Thu 11/4/21	Fri 11/5/21
1.5.5 Upgrade Utilities for .NET (High Priority) \Utilities\CorresGUI	Mon 3/7/22	Mon 3/14/22
1.5.6 Upgrade Utilities for .NET (High Priority) \Utilities\LanguageCustomLibrary	Mon 11/8/21	Tue 11/9/21
1.5.7 Upgrade Utilities for .NET (High Priority) \Utilities\IvrTester	Wed 11/10/21	Thu 11/11/21
1.5.8 Upgrade Utilities for .NET (High Priority) \Utilities\RegisterCustomCulture	Fri 11/12/21	Mon 11/15/21
1.6.1 Upgrade Utilities for .NET (Low Priority)	Mon 3/14/22	Mon 3/21/22
1.7.1 Upgrade ORM Strategy and Analysis for .NET (LLBLGen)	Wed 12/22/21	Thu 3/3/22
1.7.2 Deployment of VM and software installation for ORM (LLBLGen)	Mon 3/21/22	Fri 4/1/22
<b>1.7.3 Upgrade ORM for .NET to 5.x (LLBLGen)</b>	<b>Mon 4/4/22</b>	<b>Fri 6/24/22</b>
<b>Sprint 12</b>	<b>Mon 4/4/22</b>	<b>Fri 4/15/22</b>
<b>Sprint 13</b>	<b>Mon 4/18/22</b>	<b>Fri 4/29/22</b>
<b>Sprint 14</b>	<b>Mon 5/2/22</b>	<b>Fri 5/13/22</b>
<b>Sprint 15</b>	<b>Mon 5/16/22</b>	<b>Fri 5/27/22</b>
<b>Sprint 16</b>	<b>Mon 5/30/22</b>	<b>Fri 6/10/22</b>

<b>Sprint 17</b>	<b>Mon 6/13/22</b>	<b>Fri 6/24/22</b>
<b>1.7.4 Testing of ORM generation against Oracle 19C DB (LLBLGen)</b>	<b>Mon 6/27/22</b>	<b>Thu 10/20/22</b>
1.8.4 LLBLGen Upgrade Automation	Mon 6/27/22	Wed 8/3/22
1.8.5 LLBLGen Upgrade Testing	Thu 8/4/22	Mon 9/12/22
1.8.6 LLBLGen UAT	Tue 9/13/22	Thu 10/20/22
Execution Phase complete	Thu 10/20/22	Thu 10/20/22
<b>Monitoring and Controlling</b>	<b>Tue 8/3/21</b>	<b>Tue 10/18/22</b>
<b>Weekly Status Meeting</b>	<b>Tue 8/3/21</b>	<b>Tue 10/18/22</b>
Monitoring and Controlling Phase Complete	Tue 10/18/22	Tue 10/18/22
<b>Project Closeout</b>	<b>Wed 10/19/22</b>	<b>Mon 10/24/22</b>
<b>Lessons Learned</b>	<b>Wed 10/19/22</b>	<b>Fri 10/21/22</b>
Schedule Lessons Learned meeting	Wed 10/19/22	Wed 10/19/22
Conduct Lessons Learned meeting	Thu 10/20/22	Thu 10/20/22
Record Lessons Learned	Fri 10/21/22	Fri 10/21/22
<b>Deliverable: Project Closeout Report</b>	<b>Wed 10/19/22</b>	<b>Fri 10/21/22</b>
Develop Project Closeout Report	Wed 10/19/22	Wed 10/19/22
Review/Update Project Closeout Report	Thu 10/20/22	Thu 10/20/22
Approve Project Closeout Report	Fri 10/21/22	Fri 10/21/22
Project Closeout Report complete	Fri 10/21/22	Fri 10/21/22
Conduct Project Closeout meeting	Mon 10/24/22	Mon 10/24/22
Closeout Phase complete	Mon 10/24/22	Mon 10/24/22

#### ***IV. Project Spending Plan***

Planned cost is \$560,550 and \$248,002 is the actual cost.

## V. Project Organization and Methodology

### A. Project Organizational Chart

### I. Project Roles and Responsibilities

Project Role	Resource Name	Responsibilities
<b>Executive Sponsor</b>	Adrienne Johnston	<ul style="list-style-type: none"> <li>Provide guidance on overall strategic direction</li> <li>Advise the Strategic Planning Office and project manager of risks that may impact the project</li> <li>Facilitate resolution of significant issues in the project</li> <li>Review and sign off on key milestones</li> </ul>

Project Role	Resource Name	Responsibilities
<b>CTO</b>	Domenic DiLullo	<ul style="list-style-type: none"> <li>• Provide guidance on overall strategic direction</li> <li>• Advise the Strategic Planning Office and project manager of risks that may impact the project</li> <li>• Facilitate resolution of significant issues in the project</li> <li>• Review and sign off on key milestones</li> </ul>
<b>Strategic Planning Office</b>	Vendor	<ul style="list-style-type: none"> <li>• Monitor project progress</li> <li>• Provide guidance and support to project manager and project team members</li> </ul>
<b>Project Manager</b>	Jim Sparks	<ul style="list-style-type: none"> <li>• Manage all aspects of the project and ensure compliance with PMP</li> <li>• Monitor project progress and schedule adherence</li> <li>• Complete all documents related to the project</li> <li>• Identify and manage risks according to the PMP</li> </ul>
<b>Business Lead</b>	Wendy Castle	<ul style="list-style-type: none"> <li>• Review deliverables and project documents, identifying any deficiencies</li> <li>• Review and approve deliverables</li> <li>• Review and approve RFCs</li> </ul>
<b>Technical Lead</b>	Quinton Lightfoot	<ul style="list-style-type: none"> <li>• Review deliverables and project documents, identifying any deficiencies</li> <li>• Review and approve deliverables</li> <li>• Review and approve RFCs</li> </ul>
<b>Functional Team</b>	Quinton Lightfoot Alvin Sellers Amit Kanaiyalal	<ul style="list-style-type: none"> <li>• Contribute subject matter expertise</li> <li>• Complete assigned project tasks in accordance with the Project Schedule</li> <li>• Identify risks and issues to the Project Managers in accordance with the Risk and Issue Management section of this PMP</li> <li>• Assist the Project Managers in responding to risks and issues</li> <li>• Assist the Project Manager in evaluating change requests</li> </ul>

Project Role	Resource Name	Responsibilities
Technical Team	Sushma Kavarthapu	<ul style="list-style-type: none"> <li>• Contribute subject matter expertise</li> <li>• Complete assigned project tasks in accordance with the Project Schedule</li> <li>• Identify risks and issues to the Project Managers in accordance with the Risk and Issue Management section of this PMP</li> <li>• Assist the Project Managers in responding to risks and issues</li> <li>• Assist the Project Manager in evaluating change requests</li> </ul>

### J. Project Management Methodology

DEO will use a project management methodology in compliance with project management standard rule 60GG-2 F.A.C., project requirements and department experience with similar engagements. Predictability, accountability, and flexibility are key elements that must be embraced by the overall project management approach to ensure DEO’s satisfaction and project success. Successful project management must include active and visible leadership, multiple controls and checkpoints with measurable outcomes, and engagement with all stakeholders. DEO believes strong project management is critical throughout the life of any successful project.

For this project, DEO’s project management will include the following specific elements, in addition to our standard methodology:

- The project management team will advise leadership on areas of concern and will propose solutions to mitigate risk.
- Vendors will respond to inquiries or requests from DEO within one business day from receipt.
- In the case where additional time is needed for a task, vendors will provide an estimate, which must be approved by the DEO Project Manager.
- At the end of the contract, vendors will provide final copies of all reports in electronic format for archive purposes.

DEO’s project management approach will utilize the technical skills, tools, and techniques needed to succeed, as well as the dedication to accountability, resource commitment, and organizational focus. Project success will be the result of active communication among all individuals, understanding everyone’s role in the project, and clear delineation of responsibilities.

DEO believes successful project management hinges on the following:

- Clearly established project goals and requirements

- Ongoing assessment of quality against established standards
- Constant measurement of success against established deliverables and milestones
- Personal presence and commitment of key project leadership
- Proactive identification and communication of risks and issues

### **Quality Management Plan**

The Quality Management Plan ensures work is complete and meets or exceeds an adequate level of quality of the deliverables. All members of the project team will play a role in quality management, and it is critical the team ensures work is completed according to DEO standards for quality acceptance.

Project Quality Management activities will ensure project documents meet agreed upon standards, work is performed efficiently, project practices conform to recommended project standards and deficiencies are identified and corrective action taken.

### **Quality Management Approach**

Managing quality includes four major processes:

- **Quality planning (QP):** Completeness and correctness criteria define what it means for a project document to be complete and correct. The project team will establish completeness and correctness criteria. Specific criteria for the quality of Contract Deliverables will be documented in the contract and managed by the Contract Manager, program team and Project Manager.
- **Quality assurance (QA)** refers to the process used to create project documents, not the deliverables themselves. The Project Team will perform QA activities for the project weekly. The project manager may make changes to processes as necessary; changes will be communicated to the appropriate stakeholders.
- **Quality control (QC):** Performing Quality Control (QC) involves monitoring specific project results to determine whether they comply with relevant quality standards and identifying ways to eliminate causes of unsatisfactory results. The Strategic Planning Office (SPO) will perform (QC) activities to verify project management and documents are of high quality. If the SPO determines a project document to be complete, it will be presented to the Project Team at the following Status Meeting.
- **Quality improvement (QI):** The Project Manager is responsible to implement corrective actions based on the results of the quality management processes. These may include changes to project management processes; required training for stakeholders; updating performance metrics, etc.

### **Communication Management Plan**

Communication management seeks to provide a comprehensive framework for all communication necessary to keep stakeholders informed about the project's direction and status. The project communication plan is to clearly identify the status of compliance efforts and to communicate the progress made in achieving a successful project outcome. The purpose of this plan is to

communicate pertinent information related to discovery, design, and documentation in a clear and concise manner to the client, stakeholders, and the project team.

### Communication Plan

The communication plan is designed to provide the right information, at the right level, to the right audience, at the right time. The plan addresses key audiences, messages, frequency, and methods of communication.

This plan, depicted in Table 1 below, describes the various forms of communication, appropriate channels of communication, and target audiences for this project. The communication matrix identifies the different tools that will be used to guide the planning for communication about the project to various audiences and purposes. It should be considered a general guide for the effective dissemination of information that is received, understood, and utilized by the target audiences for successful completion of the project. This communication matrix will be customized for each project to reflect the various communication forms, frequencies, and audiences that will be used during the course of the project and to ensure communication channels are properly maintained throughout the project and updated if communication needs to change.

Item	Purpose	Format	When/ Frequency	Type	Initiator	Recipient	Feedback
Project Meeting	Provide and discuss project tasks, issues, risks, action items	Meeting/Face to face or virtual)	Daily/ Weekly as needed	Mandatory	Project Manager	Project Team	Meeting Minutes
Status Report	Provide detailed information on the progress of the project against the plan	Email	Weekly/ Monthly/ Quarterly	Mandatory	Project Manager	Project Team/SPO Program Manager	Verbal and follow-up email
SPO Status Meeting	Review the status report, resolve issues, and make decisions	Meeting	Weekly	Mandatory	Project Manager	SPO Program Manager	Verbal and follow-up email
Project Deliverables	Provide deliverables to DEO for review	Email	Per project schedule	Mandatory	Project Manager	SPO Program Manager/ Project Team members	Written vetted, consolidated, and actionable comments
Deliverable Review Feedback	Provide vetted, consolidated, and actionable written comments	Email	Per project schedule	Mandatory	SPO Program Manager	Project Manager/ Project Team Members	Written/ email follow-up using Deliverable Review Comment Form
Deliverable Review Walkthrough	Confirm mutual understanding of desired deliverable changes	Meeting	As needed	Informational	Project Manager	Program Managers/ Project Owners	Verbal or written

Work Session	Gather information from subject matter experts	Meeting	Per project schedule	Mandatory	Project Manager	Update subject matter experts (only if the SPO Project Manager has the approved communication)	Verbal and follow-up email
Work Session Follow-up	To answer questions or clarify information gathered	Email	As needed	Informational	Project Manager	Provide subject matter experts (only if SPO Project Manager has approved the communication)	Verbal or email follow-up
Online Survey	Gather information from subject matter experts (former providers)	Email	Per project schedule	As needed	Project Manager	Subject matter experts (only if SPO Project Manager has approved the communication)	Verbal or email follow-up
Project Issues	Documentation of project issues	Issue Log Entry	As needed	Mandatory	Any Stakeholder	Project Owner/ Project Manager	Written/ email follow-up
Project Issues Escalation	To resolve project issues	Email	As needed	Mandatory	Project Manager	SPO Program Manager	Written/ email follow-up
Change Requests	Document project changes to scope of work	Change Request Form	As needed	Mandatory	Change Initiator	Project Manager/ Change Owner/ Change Analyst/ CCB	Written/ email follow-up
Project Closeout and Lessons Learned	Formal project closeout meeting	Email	Per project schedule	Mandatory	SPO Project Manager	All Stakeholders	Written/ email follow-up

### Weekly Status Reporting

Vendors will be required to submit status reports throughout the project at several levels. The primary source of status information is the weekly written status report, which will communicate at minimum, the following information.

- **Project Status.** This section depicts the project status at a summary level using a red/yellow/green method supported by two to three essential questions that are answered to determine summary status. The red/yellow/green method is not meant to be a grading system but instead it is a way to easily identify the areas of the project that need the most attention to make the project successful.
- **Overview of Project Progress.** This section describes significant accomplishments achieved in the reporting period.
- **Overall Status.** This section provides a high-level overview of whether the project is on schedule, on budget, and on scope. A yellow or red status should be explained here in detail.
- **Project Milestones, Deliverables, and Latest Tasks.** This section contains the major deliverables of the project, their planned and actual completion dates, and their status.

- **Risks, Action Items, Issues, and Decisions.** This section will link to the project risk, action item, issue, and decision tracking tool. The project tracking tool contains all items tracked during the project.

## **Project Tracking**

This section describes the “RAID” methodology for tracking risks, action items, issues, and decisions. DEO will follow a centralized approach that minimizes miscommunication or misinformation among project stakeholders. The Department will diligently maintain a project tracking log for each project, and a master log for the System Modernization project overall, a Microsoft Excel workbook with multiple tabs intended to capture the details and the latest attributes of items tracked by Project Managers.

## ***VI. Business Process Organizational Change Management Plan***

This project will follow the organizational change processes outlined in the RA Modernization Program Organizational Change Management Plan.

The master copy of this document is available in the [RA Modernization Program Library](#) in the Central Repository.

The role of the Organizational Change Management plan (OCM) within an individual project under the RA Modernization Program is to help plan for and manage the people side of the project. OCM focuses on identifying, preparing and managing a wide array of internal and external stakeholders, employees and customers that will be impacted by the new solution. It is good for those stakeholders to feel informed, prepared, trained and ready to participate in a successful implementation. It is beneficial for employees to adopt new skills and develop new capabilities and to value and appreciate the features that the new technology offers.

## ***VII. Project Risk Management Plan***

### **Project Risk Management**

This project will follow the risk management processes outlined in the RA Modernization Program Risk Management Plan.

The master copy of this document is available in the [RA Modernization Program Library](#) in the Central Repository.

The risk management process helps the project team anticipate and respond to emerging risks throughout the duration of the project. The risk management process occurs throughout all phases of the project, from planning through execution and closeout. Project risks are logged and tracked in the Project Log Workbook (RAID Logs).

Figure 2 below illustrates the major activities associated with the key risk management process.

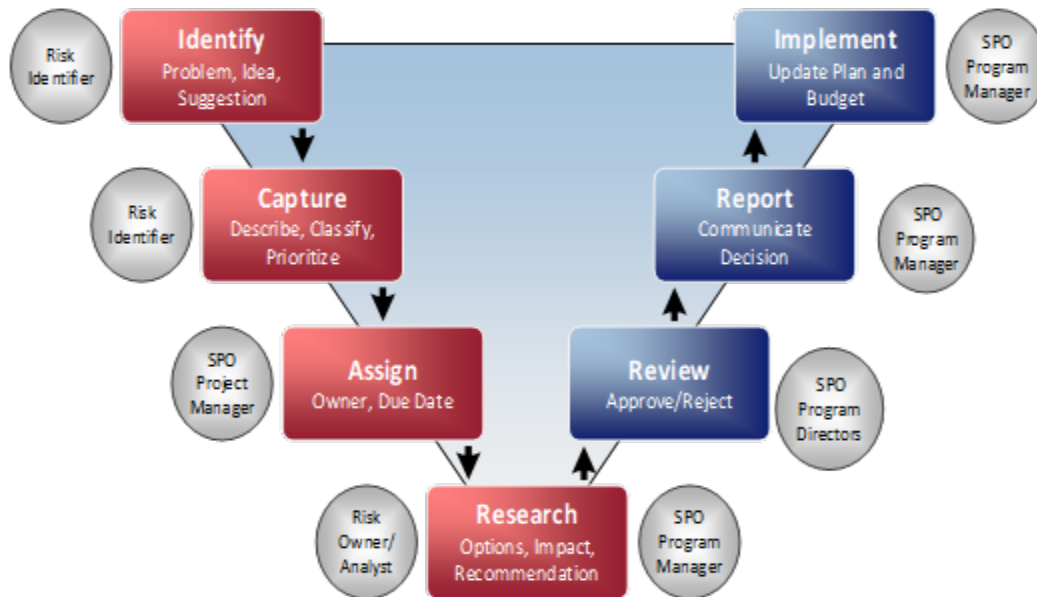

Figure 2: RA Modernization Program Risk Management Process

### Action Items

Action items are unplanned tasks that occur during a project that are too small to be added to the schedule. These items must be within the scope of the project and are often tasks that support scheduled tasks, issue resolution, risk management, or some other aspect of the project. The action item log is created and maintained as part of the project tracking log.

Action items will be managed in the following manner:

- During status meetings, any stakeholder can raise an action item for discussion.
- The Project team will discuss the action item and determine if it warrants being monitored in the action item log.
- The project manager will enter the item in the log.
- The team will set the priority for the action item (high/medium/low), assign an action item owner, and set a planned completion date.
- At each subsequent status meeting, the action item(s) will be reviewed until they can be closed.

### Issue Management

This project will follow the issue management processes outlined in the RA Modernization Program Issue Management Plan.

The master copy of this document is available in the [RA Modernization Program Library](#) in the Central Repository.

An issue is an immediate problem that needs resolution. Acknowledging and addressing issues quickly ensures that they do not impact the scope of the project. Project issues are logged and tracked in the Project Log Workbook (RAID Logs).

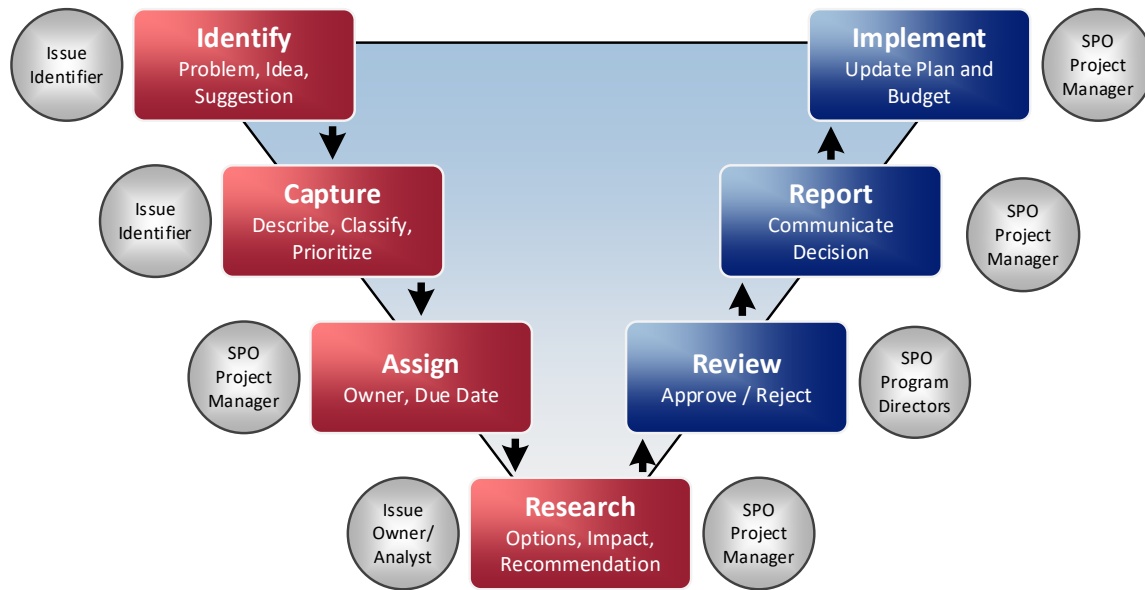

Figure 3: RA Modernization Program Issue Management Process

### Decisions

Decisions are leadership answers to questions that arise during the project. The decision log is created and maintained as part of the project tracking log.

Decisions will be managed in the following manner:

- During status meetings, any stakeholder can raise a question that requires a decision.
- If the team determines a decision needs to be made, the project manager will enter it in the decision log.
- The team will discuss the impact to the project, assign a decision maker, and set a date for when the decision is needed.
- At each subsequent status meeting, the decision item(s) will be reviewed until they can be closed.

### Change Management

This project will follow the change processes outlined in the RA Modernization Program Change Management Plan.

The master copy of this document is available in the [RA Modernization Program Library](#) in the Central Repository.

The *RA Modernization Change Management Plan*, defines the approach and provides the processes for initiating, defining, researching, evaluating, reviewing, prioritizing, managing cost, approving or rejecting the change requests (CRs), and communicating the status of the change that may affect the success of the SDLC DevOps project.

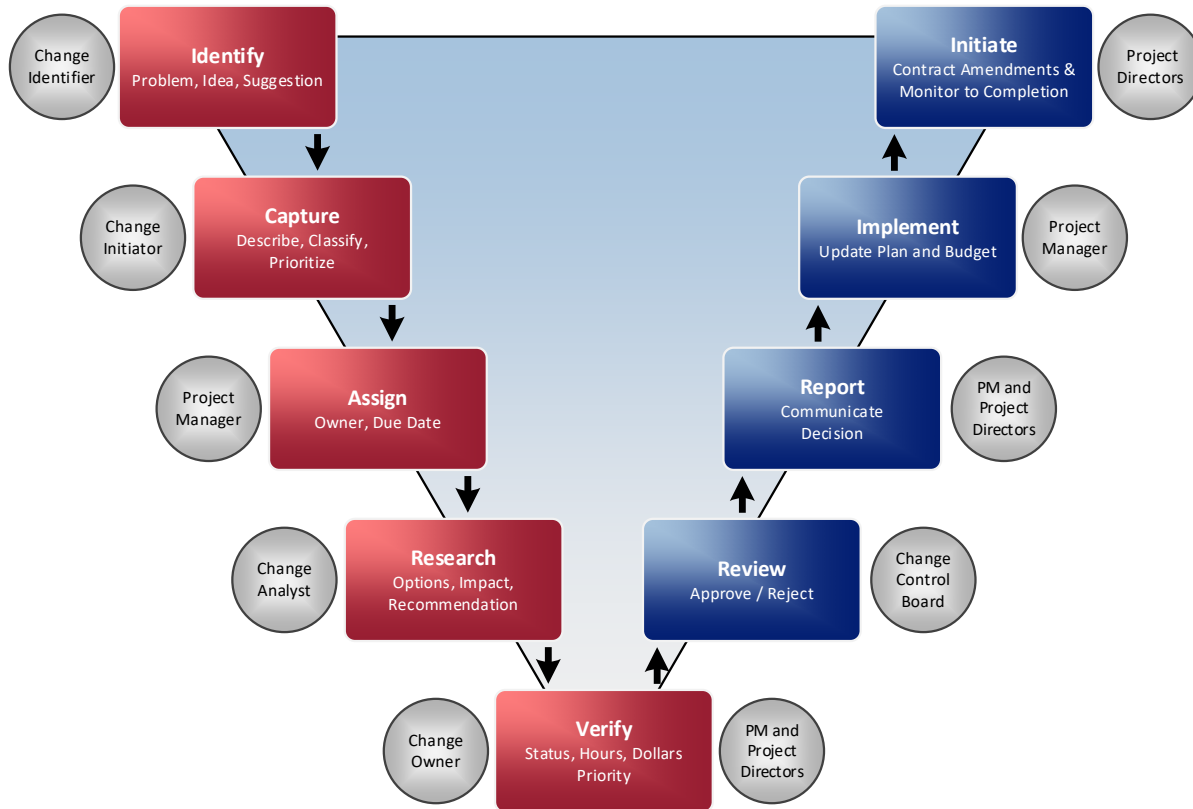

Figure 4:RA Modernization Program Change Management Process

### Schedule Maintenance

The project schedule maintenance is an on-going activity that tracks the work performed, the timeframes for when the work has been or will be completed and progress against the baseline work estimates and timelines. To effectively track the program progress, the project schedule is kept current, and reflects all work that needs to be performed, in accordance with the RA Modernization Program Schedule Management Plan.

If a change to the project schedule or scope is needed, the Project Manager may pursue a change request as described in the [RA Modernization Change Management Plan](#).

### Procurement Management

The Procurement Management Plan seeks to outline how the project will procure resources necessary to complete the project objectives. It defines the procurement methodology for this project, lays out the process for managing procurement throughout the life of the project, and will be updated if project needs change. This plan identifies and defines the goods and services to be procured, the types of contracts to be used in support of this project, the contract approval process, and the decision criteria. The importance of coordinating the procurement activities, establishing firm contract deliverables, and metrics in measuring procurement activities is included in the following subsections.

**Procurement Management Approach**

The DEO Purchasing Office and any vendors contracted for procurement assistance will provide oversight and management along with the Project Manager for all procurement activities under this project. The Project Manager will work with the project team to identify all items to be procured for the successful completion of the project. The Department Strategic Planning Office (SPO) will then review any procurement requests prior to approving the development of procurement documentation.

**Procurement Definition**

The following table will be completed to record any procurement goods and/or services determined to be essential for any RA Modernization project’s completion and success. The Project Manager and/or SPO must approve any procurement before inclusion in this table.

Procurement	Description	Justification	Needed By

**Cost Management**

The tables below will be completed and used to define and track project costs during each specific RA Modernization Project.

Cost Management Plan				
Category	Description	Frequency	Deliverable	Cost

Column	Definition
Category	Type of expense
Description	Description of expense
Frequency	Describe whether the expense is annual or recurring or a onetime expense
Deliverable	List the deliverable associated with the expense
Cost	List the total expense in dollars e.g. \$0.00

**Staffing Management**

The purpose of this section is to outline how the project is to manage staffing requirements and resource tasks appropriately. This project plans to procure additional staffing through “Staff Augmentation” contracts. The needs for each individual project have been estimated before the project and will be refined during requirements gathering and procurement of services.

**Quality Management**

Quality Management details the processes to ensure quality services and deliverables. DEO will

use disciplined processes and inspections to confirm quality throughout the life of the project. These inspections are performed at key points in the creation and review of documents and confirmation of the value of services the Project Team provides. Quality Management includes two components, Deliverable Quality Control and Services Quality. The purpose of this section is to provide instructions on these processes. DEO commits to the highest quality in project execution and project team members’ performance. To achieve a positive outcome, these processes will be carried out, so expectations are understood, aligned, and met.

**VIII. Business Process Organizational Change Management Plan**

This project intends to improve the delivery, execution, security, or convenience of DEO’s lines of business through the implementation of modern processes and tools based on industry best practices and frameworks.

The project team aims to maximize communication, engagement, adoption, and performance of these new processes, roles, and responsibilities through a combination of tools, templates, and techniques such as:

- Stakeholder identification and engagement plans
- Process identification and improvement plans
- Educational assessment and training plans
- Change risk assessment
- Change Advocate networks
- Change Management
- Business Relationship Management
- IT Service Management

**IX. Project Risk Management Plan**

Identified in above Project Management Approach section.

<b>Risk Description/Impact</b>	<b>Probability of Occurrence (high, medium, low)</b>	<b>Risk Tolerance (high, medium, low)</b>	<b>Mitigation Strategy</b>	<b>Assigned Owner</b>
Hurricane impacting the state delays the schedule	Low	High	Adjust schedule accordingly	PM
Necessary tools, hardware, or materials need to be procured for the successful completion of the project.	Medium	Medium	Identify needs early on and involve management and budget staff throughout engagement	PM
Insufficient knowledge transfer of new process	Medium	Medium	Involve impacted staff throughout engagement to	PM

Risk Description/Impact	Probability of Occurrence (high, medium, low)	Risk Tolerance (high, medium, low)	Mitigation Strategy	Assigned Owner
			increase participation and knowledge of new processes	

***X. Capacity Plan***

This project does not involve the purchase/lease, configuration, and installation of significant computer hardware. For purposes of capacity planning, computer hardware includes servers, storage, and network infrastructure. Accordingly, a Capacity Plan is not required. Once the claim volume starts to go down as the claims volume decreases, capacity can be reduced. Also moving to an auto-scaling configuration will additionally reduce needed capacity.

## SECTION 1 — OVERALL PROJECT PLAN

### I. Project Charter

As a part of the Reemployment Assistance (RA) Modernization Program, the Rules Engine project will move business rules from the existing Reemployment Assistance Claims and Benefits Information System (System) into a user-visible and user-maintainable business rules engine. This will allow both maintaining and developing business rules without requiring code changes and subsequent deployments.

#### A. Scope Statement

##### In Scope

- Procure a business rules engine product.
- Inventory and identify a subset of business rules to validate suitability.
- Migrate the selected subset of business rules implemented in the System to the business rules engine.
- Perform regression testing to ensure the rules have migrated successfully.
- Complete documentation for technical debt for remaining rules.
- Utilize the business rules engine for all remaining modernization efforts.

##### Out of Scope

- Complete the integration of the remaining business system rules into the Rules Engine product.

#### B. Project Objectives and Business Benefits

Project Objective	Business Benefit
Reduce development effort	Effort required to establish and maintain the System will be reduced.
Consolidate a subset of business rules into the business rules engine	Rules will be more readily accessible to facilitate both auditing and troubleshooting.

#### C. Critical Success Factors

- Timely and high-quality achievement of major milestones/deliverables.
- Ability for remaining modernization efforts to utilize the business rules engine for continuous modernization efforts.

#### D. Key Dates

Key Dates	Importance and Relevance to the Project
04/2022	Contract executed with Peraton for System and Software Integration (SSI) services
06/2022	Identification and prioritization of business systems rules.
11/2022	Anticipated procurement for business rules engine advertised

### E. Major Deliverables

Major Deliverable	Deliverable Description
Project Charter	Complete and submit a detailed project charter to DEO.
Project Management Plan	Complete and submit a detailed project management plan to DEO.
Weekly Status Meetings	Host weekly status meeting with DEO project team.
Identification of Business System Rules	Project team identifies business systems rules for implementation into the Business Rules Engine. Remaining rules will be addressed as part of continuous modernization.
Procurement of Rules Engine	Procurement of a Business Rules Engine product.
Communication and Training	Communication of process documentation and workflows to all stakeholders.

### F. Major Milestones

Major Milestone	Milestone Description
Procurement of Business Rules Engine	Procure Business Rules Engine product to use for business systems rules
Identification and prioritization of business systems rules	Completed
Execution Phase	In progress
Monitor and Controlling Phase	In progress

### G. Key Stakeholders

Key Stakeholder	Project Interest
Dane Eagle	Secretary, Department of Economic Opportunity
Adrienne Johnston	Deputy Secretary, Division of Workforce Services
Ed Wynn	Chief Information Officer
Allyce Moriak	Chief Financial Officer
Wendy Castle	Program Owner
Paul Forrester	Program Owner
Nicole Sanislow	RA Modernization Program Manager - Business
Thomas Richardson	RA Modernization Program Manager - Strategic Planning Office
Garrick Wright	RA Modernization Program Manager - Information Technology
Alvin Sellars	Project Sponsor & Project Owner
Nicole Cain	Project Manager

### H. Significant Project Assumptions and Constraints

#### Project Assumptions

1. System documentation detailing current business rules are readily available and accessible.
2. Technical support resources will be available as needed, to support the project as needed.

**Project Constraints**

1. Limited time and capacity of individuals assigned to assist and test the product.

**II. Work Breakdown Structure**

With the approval of Change Request 009, the Work Breakdown Structure is currently being updated. Once updated, it will be reflected in the OWP.

 <b>WBS</b>			
Task	Dura	Start	End
<b>Internal Rule Identification</b>	<b>303</b>	<b>4/6/2022</b>	<b>2/2/2023</b>
Document Rules	18	4/6/2022	4/23/2022
<b>Requirements Traceability</b>	<b>58</b>	<b>5/3/2022</b>	<b>6/29/2022</b>
Develop RTM	45	5/3/2022	6/16/2022
Approve RTM	1	6/29/2022	6/29/2022
<b>Procurement</b>	<b>3</b>	<b>1/10/2023</b>	<b>1/12/2023</b>

Close-Out Report	8	6/20/2023	6/27/2023
Close-Out Meeting	1	6/29/2023	6/29/2023

**III. Resource Loaded Project Schedule**

05-Rules\_Engine\_Schedule\_20221031.pdf

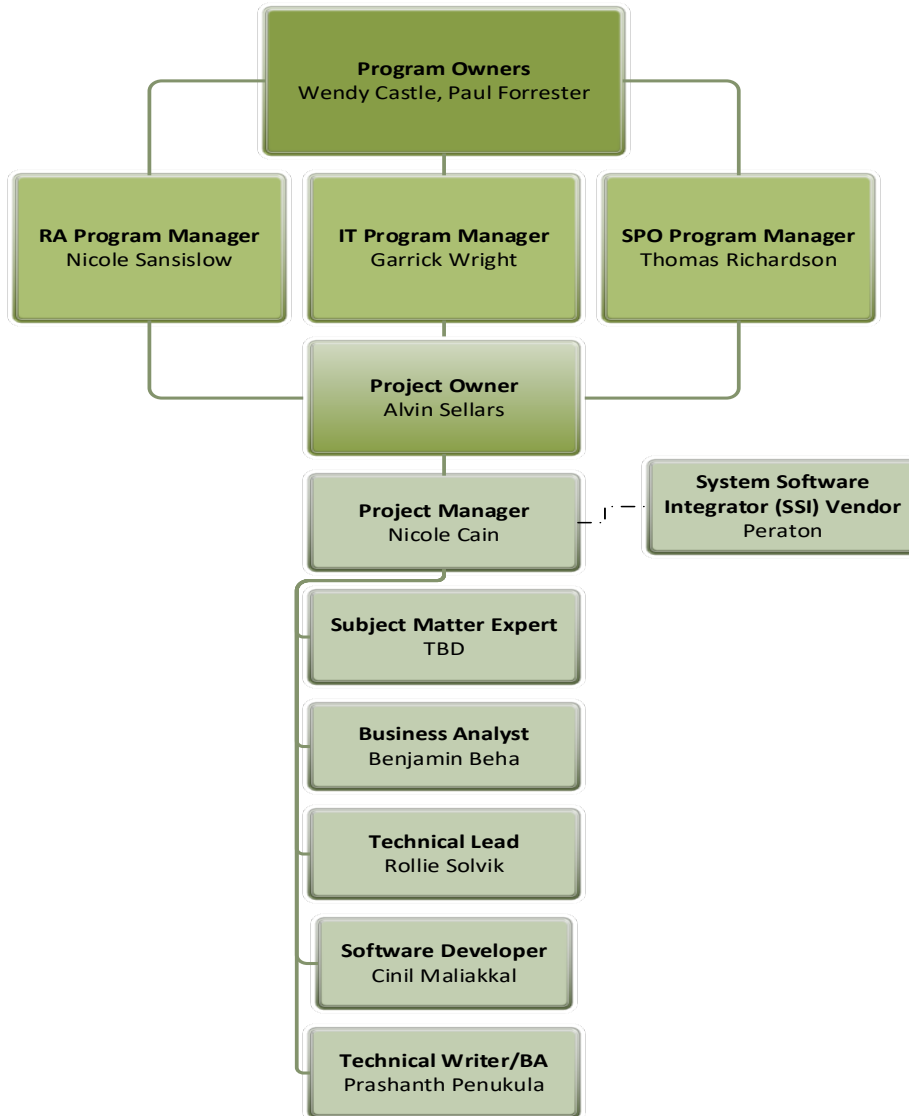

**IV. Project Spending Plan**

The Project Spending Plan will be updated once the Vendor Contract is awarded and signed, approving the costs of services. The information captured below, is as detailed in the Schedule IV-B Report, detailing cost estimates.

<b>Total</b>	<b>FY 2022/23</b>	<b>FY2023/24</b>
\$794,533.70	693,848.85	\$100,684.85

**V. Project Organization and Methodology**

**Project Organizational Chart**

**VI. Project Roles and Responsibilities**

Project Role	Resource Name	Responsibility
<b>Executive Sponsor</b>	Adrienne Johnston	<ul style="list-style-type: none"> <li>Provide guidance on overall strategic direction</li> </ul>

<b>CTO</b>	Domenic DiLullo	<ul style="list-style-type: none"> <li>• Provide guidance on overall strategic direction</li> <li>• Advise the Strategic Planning Office (SPO) and project manager of risks that may impact the project</li> <li>• Facilitate resolution of significant issues in the project</li> <li>• Review and sign off on key milestones</li> </ul>
<b>Business Lead</b>	Alvin Sellars	<ul style="list-style-type: none"> <li>• Ensure project aligns with department strategy</li> <li>• Responsible for making final decisions for project changes and closure</li> <li>• Primary point of contact</li> <li>• Review and approve deliverables</li> <li>• Review and approve RFCs</li> </ul>
<b>Project Manager</b>	Nicole Cain	<ul style="list-style-type: none"> <li>• Manage all aspects of the project and ensure compliance with PMP</li> <li>• Monitor project progress and schedule adherence</li> <li>• Complete all documents related to the project</li> <li>• Identify and manage risks according to the PMP</li> </ul>
<b>Subject Matter Expert</b>	TBD	<ul style="list-style-type: none"> <li>• Contribute subject matter expertise</li> <li>• Complete assigned project tasks in accordance with the project schedule</li> <li>• Identify risks and issues to the Project Manager</li> <li>• Lead Business Unit testing</li> </ul>
<b>Technical Team</b>	Roland Solvik Prashanth Penukula Benjamin Beha Cinil Maliakkal	<ul style="list-style-type: none"> <li>• Creating requirements</li> <li>• Creating system documentation</li> <li>• Guides the technical development of the product and overseeing the design</li> <li>• Review deliverables and project documents, identifying any deficiencies</li> <li>• Review and approve deliverables</li> <li>• Responsible for the design and integration of the system rules into the product</li> </ul>

<b>Organizational Change Management Manager</b>	Thomas Hoverman	<ul style="list-style-type: none"> <li>• Advisory role, providing guidance on organizational change</li> </ul>
<b>Program Managers</b>	Thomas Richardson  Garrick Wright  Nicole Sanislow	<ul style="list-style-type: none"> <li>• Monitor project progress</li> <li>• Provide guidance and support to project manager and project team members</li> <li>• Provide allocation of resources</li> </ul>
<b>SSI Vendor</b>	Peraton	<ul style="list-style-type: none"> <li>• Provide recommendations for technology selections for rules engine product procurement</li> <li>• Assist with drafting the scope of work and deliverables for the rules engine product procurement</li> <li>• Assist in evaluating vendor responses for the procurement of the rules engine product</li> </ul>

**I. Project Management Methodology**

DEO will use a project management methodology in compliance with project standard rule 60GG-2 F.A.C., product requirements, and DEO experience with similar engagements. Predictability, accountability, and flexibility are key elements that must be embraced by the overall project management approach to ensure DEO’s satisfaction and project success. Successful project management must include active and visible leadership, multiple controls and checkpoints with measurable outcomes, and engagement with all stakeholders. DEO believes strong project management is critical throughout the life of any successful project.

For this project, DEO’s project management will include the following specific elements, in addition to our standard methodology:

- The project management team will advise leadership on areas of concern and will propose solutions to mitigate risk.
- Vendors will respond to inquiries or requests from DEO within one business day from receipt.
- In the case where additional time is needed for a task, vendors will provide an estimate, which must be approved by the DEO Project Manager.
- At the end of the contract, vendors will provide final copies of all report sin electronic format for archive purposes.
- DEO’s project management approach will utilize the technical skills, tools, and techniques needed to succeed, as well as the dedication to accountability, resource

commitment, and organizational focus. Project success will be the result of active communication among all individuals, understanding everyone's role in the project, and clear delineation of responsibilities.

DEO believes successful project management hinges on the following:

- Clearly established project goals and requirements
- Ongoing assessment of quality against established standards
- Constant measurement of success against established deliverables and milestones
- Personal presence and commitment of key project leadership
- Proactive identification and communication

## ***VI. Business Process Organizational Change Management Plan***

This project intends to move System business rules into a business rules engine, that can be maintained by internal staff. The implementation of this business rules engine will reduce the need for subsequent system releases and downtime. In order to initiate this change, this project will follow the organizational change processes outlined in the RA Modernization Program Organizational Change Management Plan, which is in the RA Modernization Program Library Central Repository.

The role of the Organizational Change Management Plan (OCM) within the Rules Engine project is to assist in planning for and managing the people side of the project. OCM focuses on identifying, preparing, and managing a wide array of internal and external stakeholders, employees, and customers that will be impacted by the new solution. It is useful for those stakeholders to be informed, prepared, trained, and ready to participate in a successful implementation. It is beneficial for employees to adopt new skills and develop new capabilities and to value and appreciate the features that the new technology offers.

## ***VII. Project Risk Management Plan***

This project will follow the [Risk Management Plan](#), captured within the Reemployment Assistance Program Management Plan. The Reemployment Assistance Modernization Program team follows a standard method for logging and categorizing issues, researching solutions, and communicating options and final recommendations. Project team members should actively contribute, as it is critical to timely decisions and moving past roadblocks. The buy-in of the project team, key team members and technical staff is critical to the success and ensures that the project team delivers a product in line with the project goals.

Key activities of the risk management process include:

- **Risk Identification** – Identifying risks that could potentially impact the project.
- **Risk Analysis** – Prioritize risks and assess the probability and consequence of the risk.
- **Risk Response Planning** – Prepare action plans to enhance opportunities or minimize threats to the program.

- **Risk Monitoring** – Execute action plans and evaluate their effectiveness, tracking, and reviewing residual risks and identifying new risks.

<b>Risk Description/Impact</b>	<b>Probability of Occurrence (high, medium, low)</b>	<b>Risk Tolerance (high, medium, low)</b>	<b>Mitigation Strategy</b>	<b>Assigned Owner</b>
Hurricane impacting the state delays the schedule	Low	High	Adjust schedule accordingly	PM
Necessary tools, hardware, or materials need to be procured for the successful completion of the project.	Medium	Medium	Identify needs early on and involve management and budget staff throughout engagement	PM
Insufficient knowledge transfer of new process	Medium	Medium	Involve impacted staff throughout engagement to increase participation and knowledge of new processes	PM

### ***VIII. Capacity Plan***

*The Rules Engine Project will procure a Business Rules Engine. The utilization of this tool, will provide a single location for maintaining, auditing, and troubleshooting business rules. It will decrease the need for changes to go through the system development life cycle and allow business units to maintain business rules, in a decreased timeframe.*

#### **Project Capacity Planning**

- Establish Cross-Functional Team: To collaborate and communicate about production capacity and resource management, you want a cross-functional team with different levels and different functions.
- Calculate Resource Capacity: Before you can create a production capacity plan, you need to have an idea of your current capacity and your available resources.
- Determine Resource Requirements: For each project, look at the scope and what resources are required to do the task for the project.
- Prioritize Projects: Which projects are most important, and which can be put aside for the time being? You can't do everything at once.
- Allocate Resources Based on Project Priority: Now allocate those prioritized projects and make sure that they are aligned with the goals of the organization.

- Keep the Lines of Communications Open: Communicate between executives, project management leaders and stakeholders.
- Document Known Risks: Monitor risks such as union strikes, weather, government regulations that stop a project or create new ones unexpectedly.
- Plan for How to Handle Too Much Capacity: Understand where it is and how to resolve it (such as reassigning), or not enough capacity (again, where/how).

## SECTION 1 – OVERALL PROJECT PLAN

### I. *Project Charter*

As a part of the Reemployment Assistance (RA) Modernization Program, the SOA and API Layer project will establish a solid architectural basis in support of the continuous modernization by defining a new architectural basis for a service-oriented architecture (SOA) for the modernized Reemployment Assistance Claims and Benefits Information System (System). The SOA and API layer project will deliver improved scalability due to the service-oriented architecture allowing independent scaling of each service.

#### A. **Scope Statement**

##### **In Scope**

###### **Phase 1A – Adopting New Technology**

- Procure an application programming interface (API) layer product
- Secure technology dependent resources (SOA/API vendor)
- Install and configure API layer
- Test tools defined with API layer tool procurement
- ID and document any Enterprise Service Bus (ESB) requirements
- Document the resulting API architectural standard for lessons learned in support of the Incremental Customer Experience/User Experience Mobile-Responsive Transformation (CX/UX) project.

###### **Phase 1B – Implementation\*, \*\***

- Develop user stories and a test plan for selected APIs
- Document lessons learned

\*The selection process for APIs to migrate for purposes of the selected APIs involves:

- generating a list of all APIs
- separating APIs into real-time vs. batch
- selecting specific APIs within the real time subset based on:
  - Frequency of use
  - APIs called early in the claims process
  - Conversion of one API from each protocol type (REST/SOAP)
- per DCSN0001102, “Recommended Option #2 was approved by the Program Workgroup. This option includes migrating the two (2) proof of concept interfaces as well as to include the DHSMV interface ...”
- “Proof of concept,” for this project, means identifying a small subset of APIs that represent different protocol types that will be migrated from the current System, tested, and deployed into a pre-production environment, via the SOA and API layer by June 30, 2023.

##### **Out of Scope**

- Defining the final CX/UX configuration

- Non-real-time web-based services
- per DCSN0001102, "...and designate remaining interfaces to be modernized during the continuous modernization process. Any newly designed interfaces required for the operation of the CX/UX application would be addressed by the CX/UX vendor selected for that project."
- \*\* Change Request 10 has modified the project's scope to align API development with the Continuous Modernization Program

## B. Project Objectives and Business Benefits

Project Objective	Business Benefit
Prepare an inventory of desired services based on the existing API capabilities	Preparatory step towards improved scalability allowing independent scaling of each service
Identify any other architectural requirements, such as API Gateway usage	Preparatory step towards improved scalability allowing independent scaling of each service
Develop an implementation that demonstrates all architectural components	Enterprise Services Bus and API Gateway installation in support of projects within the Program requiring API development, such as CX/UX
Document the resulting architectural standard for enforcement during the CX/UX project	Clear direction for the CX/UX project

## C. Critical Success Factors

- Timely and high-quality achievement of major milestones/deliverables.
- Ability for remaining modernization efforts to utilize the API tools for their continued efforts.

## D. Key Dates

Key Date	Importance and Relevance to the Project
03/07/2023	2023 Legislative Regular Session convenes
05/05/2023	2023 Legislative Regular Session last day

## E. Major Deliverables

Major Deliverable	Deliverable Description
Project Charter	Complete and submit a detailed project charter to DEO.
Project Management Plan	Complete and submit a detailed project management plan to DEO.
Weekly Status Meetings	Host weekly status meeting with DEO project team.
Weekly Status Reports	Provide weekly status reports to DEO project team.

Major Deliverable	Deliverable Description
SOA/API Procurement for Tool and Services	Procurement, installation, configuration, of the Enterprise Services Bus (ESB) and the Application Program Interface (API) gateway.
Requirements Traceability Matrix	Functional and technical requirements are documented, validated, and verified.
User stories and test plans	Preparation for API migration in support of adopting new technology (ESB and API gateway)
Documentation	Documentation of ESB requirements and the API architectural standard. Documentation of lessons learned.

## F. Major Milestones

Major Milestone	Milestone Description
Procurement for Tool and Services	In progress: Procure vendor services and software for the installation, configuration and testing of the ESB toolset and API gateway in support of the Services Oriented Architecture (SOA)
Identification and prioritization of APIs and Requirements	Complete
Execution Phase	Vendor onboarding, RTM review, vendor project plan, development and acceptance of deliverables in accordance with SOW.
Monitor and Controlling Phase	In progress

## G. Key Stakeholders

Key Stakeholder	Project Interest
Dane Eagle	Secretary, Department of Economic Opportunity
Adrienne Johnston	Deputy Secretary, Division of Workforce Services
Domenic DiLullo	Chief Technology Officer
Ed Wynn	Chief Information Officer
Wendy Castle	RA Modernization Program Owner – Business
Paul Forrester	RA Modernization Program Owner – Information Technology
Nicole Sanislow	RA Modernization Program Manager – Business
Tom Richardson	RA Modernization Program Manager – Strategic Planning Office
Garrick Wright	RA Modernization Program Manager – Information Technology
Project Team	See Project Roles and Responsibilities

## H. Significant Project Assumptions and Constraints

### Project Assumptions

1. Personnel with sufficient expertise will be on-boarded and allocated to the execution of this project.

2. The API development tool and SOA/API vendor will be acquired within the available timeframe for the project.
3. The ESB will be installed, configured, and tested by the SOA/API vendor within the available timeframe for the project.
4. Documentation of SOA/API architectural standards will be successfully completed within the available timeframe for the project.
5. Project is reliant upon a modular system architecture, based on recommendations from the SSI vendor, representing best of breed tools.
6. Change Request 10 has modified the project’s scope to align the API development with the Continuous Modernization Program

**Project Constraints**

1. Limited time and capacity of resources (internal and external) assigned to assist in the completion of the major deliverables.
2. Dependencies external to the project which result in delays in execution, i.e., delays in finalizing system architecture and formal API tool decision

**II. Work Breakdown Structure**

**A. WBS\***

WBS	Task Name
<b>1</b>	<b>SOA API Layer</b>
<b>1.1</b>	<b>Initiation</b>
1.2	Initiation Phase complete
<b>1.3</b>	<b>Planning</b>

<b>1.3</b>	<b>Planning</b>	Building the structural management tools for the project
1.3.1	Planning Phase Start	Milestone

WBS	Task Name	Definition
1.3.2	<b>Deliverable: Resource Plan</b>	Included in the Project Management Plan (PMP), indicates resources required for execution of the project
1.3.3	Resource Plan Complete	Milestone
1.3.4	<b>Deliverable: Project Schedule</b>	Living document set (baseline and status) of scheduled project activities
1.3.5	Project Schedule complete	Milestone
1.3.6	<b>Deliverable: Project Management Plan</b>	Master project management book containing sub-plans for resources, budget, schedule, and program level plans, such as communications and risk management
1.3.7	Project Management Plan complete	Milestone
1.3.8	<b>Deliverable: Project Budget</b>	Included in the PMP, indicates budgeted funds required for execution of the project
1.3.9	Project Budget complete	Milestone
1.3.10	<b>Deliverable: Project Spending Plan</b>	Included in the PMP, indicates timing of the projected expenditure of budgeted funds required for execution of the project
1.3.11	Project Spending Plan complete	Milestone
1.3.10	<b>Deliverable: Project Test Plan</b>	High level testing plan approach for the project. One plan per interface (SSA, FIRRE-Investigation, DHSMV).
1.3.11	Project Spending Plan complete	Milestone
1.3.12	<b>Requirements:</b>	Traceability matrix for project technical and functional requirements
1.3.13	<b>Conduct Lessons Learned Meeting</b>	Accumulation of knowledge gained regarding "how to" avoid pitfalls during each phase of the project
1.3.14	Deliverable: Planning Gate RCA Assessment	Phase gate to assess risk and complexity status of the project
1.4	Planning Phase Complete	Milestone
1.5	<b>Execution</b>	Accomplishing the statement of work for the project
1.5.1	Execution Phase Start	Milestone
1.5.2	<b>Phase 1a - API Technology Adoption</b>	Adoption of an ESB-based SOA via installation of the ESB and the API layer.
1.5.2.1	<b>Recommendations, Standards, and Decisions</b>	SSI vendor API tool recommendation and delivery of related architectural standards

WBS	Task Name	Definition
1.5.2.2	<b>SOA/API Vendor and API Tool Procurement</b>	Documentation of ESB requirements, SOW/RFQ development, advertisement and contract award
1.5.2.3	<b>Vendor under Contract</b>	Milestone
1.5.2.4	<b>Vendor Project Planning</b>	Vendor on-boarding, Requirements review, and vendor project plan
1.5.2.5	<b>Install and configure API layer</b>	Software installation and test into the development, test, pre-prod, and production environments
1.5.2.6	<b>SSA &amp; FIRRE Investigation (User Stories)</b>	Drafting, business review, and technical review of user stories associated with SSA and FIRRE Investigation APIs
1.5.2.7	<b>Operations and Maintenance (O&amp;M) Plan</b>	Drafting, review, feedback, changes and approval of the O&M plan for the ESB and API layer
1.5.3	Phase 1a - Complete	Milestone
1.5.4	<b>Phase 1b – DHSMV (User Stories)</b>	Drafting, business review, and technical review of user stories associated with the DHSMV APIs
1.5.5	Phase 1b - Complete	Milestone
1.5.6	<b>Conduct Lessons Learned Meeting</b>	Accumulation of knowledge gained regarding "how to" avoid pitfalls during each phase of the project
1.6	Execution Phase complete	Milestone
1.7	<b>Monitoring and Controlling</b>	Activities intended to observe the health of the project and report on its progress
1.8	Monitoring and Controlling Phase Complete	Milestone
1.9	<b>Project Closeout</b>	Activities intended to conclude the project, focusing on documentation and results
1.10	Closeout Phase complete	Milestone

### III. *Resource Loaded Project Schedule*

The SOA and API Layer project is dependent on the procurement of an API toolset/development product and the SOA/API project vendor, which will be facilitated by the System and Software Integration (SSI) project vendor. The project will work closely with the SSI vendor to support the vendor’s recommendations of the best products for use.

Resources are independently loaded in ServiceNow, representing a minimum of a three-month forecast requirement, based on individual feedback from each identified resource.

Resources to be provided by the SOA/API vendor have not yet been determined and are expected to be tracked by the vendor.

The most recent status schedule as of this report is shown in Appendix A.

#### IV. *Project Spending Plan*

The SOA and API Layer project spending plan will be managed in ServiceNow.

Procurement	Description	Justification	Needed By
PO # TBD	API Development Tool	Needed to migrate existing real time web service APIs and develop new APIs for CX/UX*	November 2022
PO # TBD	SOA/API Services Vendor	Needed to install, configure, migrate APIs from the current System, test, deploy into a pre-production environment, and support use of the ESB	November 2022

\* Change Request 10 has modified the scope of the project to align existing API development with the Continuous Modernization Program. The API development tool is expected to be operational during the RA Mod Program in support of any project that requires new API development.

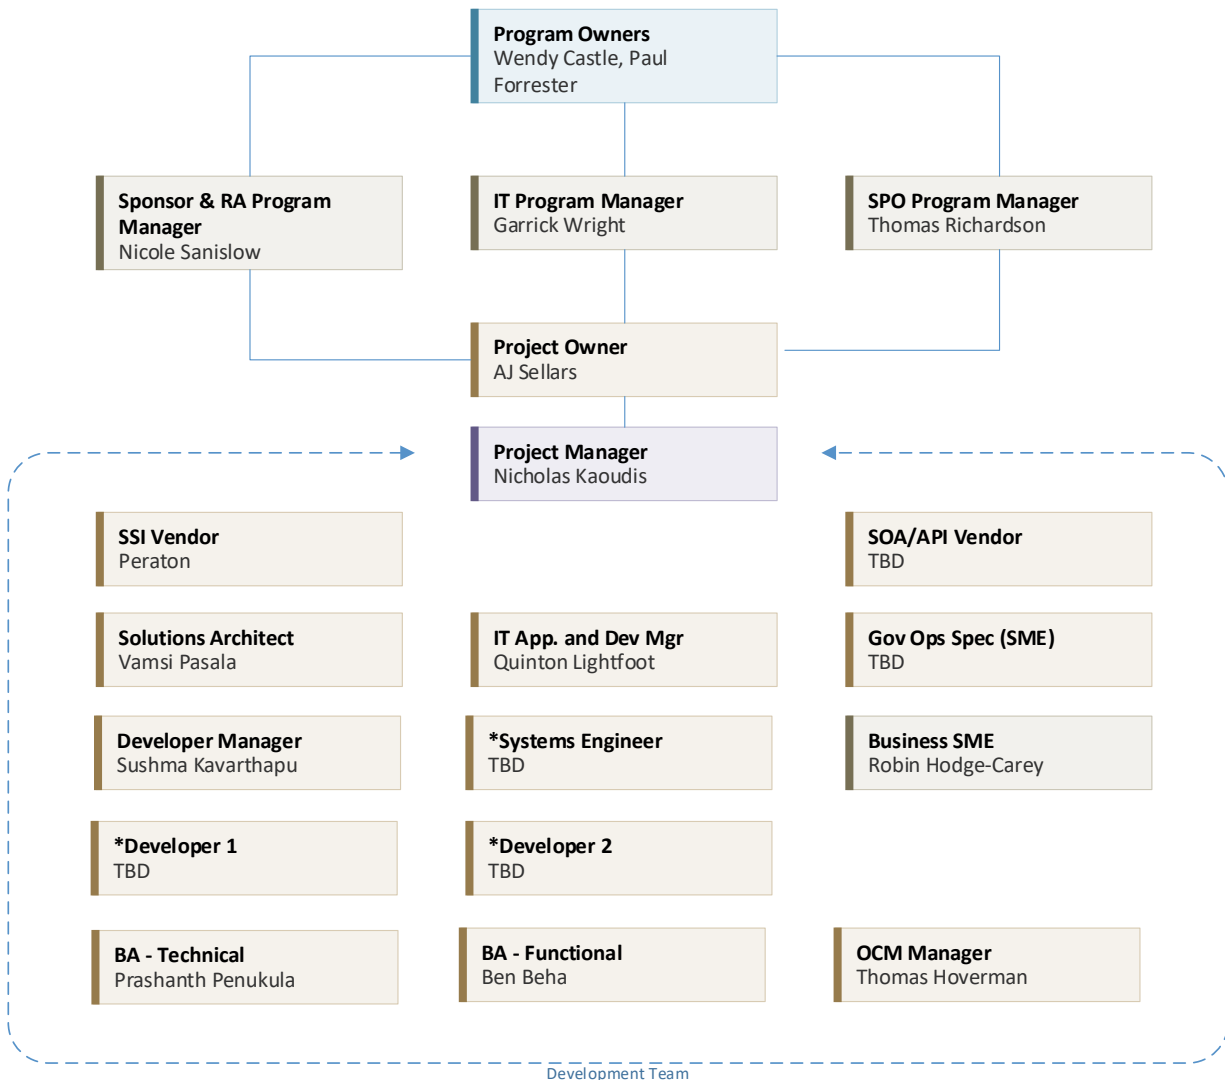

#### V. *Project Organization and Methodology*

As indicated in the “Project Roles and Responsibilities” table below, there are various technical team members assigned to this project, along with subject matter experts, an OCM lead, and a project manager. Additionally, the SOA/API vendor being procured will provide resources in accordance with the SOW for that procurement, which is under development by the SSI vendor.

It is important to delineate the scope of work between the SSI vendor and the SOA/API vendor, as they are separate vendors with separate areas of responsibility.

SSI Vendor	SOA/API Vendor
Responsible to develop requirements for the SOA/API vendor procurement.	Responsible to provide expertise to install, configure, and test the API tool.
Responsible to develop requirements for the SOA/API Layer development tool and platform.	Responsible to deploy/assist DEO in the deployment of the API gateway.
	Other duties/responsibilities pending finalization of the SOA/API vendor SOW, in draft form as of this report.

### A. Project Organizational Chart

\* These organization boxes represent on-site contractor/employee resources that are expected to be hired as of the start of the RA Continuous Modernization Program (API development phase). As they will be integral to API development, they are shown here for purposes of continuity.

## B. Project Roles and Responsibilities

<b>Project Role</b>	<b>Resource Name</b>	<b>Responsibility</b>
Program Owners	Paul Forrester Wendy Castle	<ul style="list-style-type: none"> <li>• Deputy Chief Information Officer</li> <li>• Director, Reemployment Assistance Program</li> </ul>
Project Sponsors	Nicole Sanislow	<ul style="list-style-type: none"> <li>• Responsible for making final decisions for project changes and closure</li> <li>• Review and approve deliverables</li> <li>• Review and approve RFCs</li> </ul>
Project Owner	AJ Sellars	<ul style="list-style-type: none"> <li>• Ensure project aligns with department strategy</li> <li>• Primary point of contact</li> <li>• Review and approve deliverables</li> </ul>
Project Manager	Nicholas Kaoudis	<ul style="list-style-type: none"> <li>• Manage all aspects of the project and ensure compliance with PMP</li> <li>• Monitor project progress and schedule adherence</li> <li>• Complete all documents related to the project</li> <li>• Identify and manage risks according to the PMP</li> </ul>
Subject Matter Experts	TBD Robin Hodge-Carey	<ul style="list-style-type: none"> <li>• Contribute subject matter expertise</li> <li>• Complete assigned project tasks in accordance with the project schedule</li> <li>• Identify risks and issues to the Project Manager</li> <li>• Lead Business Unit testing</li> </ul>
Technical Team	Vamsi Pasala Quinton Lightfoot Sushma Kavarthapu Ben Beha Prashanth Penukula *Systems Engineer *Developer 1 *Developer 2	<ul style="list-style-type: none"> <li>• Creating requirements</li> <li>• Creating system documentation</li> <li>• Guides the technical development of the product and overseeing the design</li> <li>• Review deliverables and project documents, identifying any deficiencies</li> <li>• Review and approve deliverables</li> <li>• Responsible for the design and integration of the System rules into the product</li> </ul>
Organizational Change Management	Thomas Hoverman	<ul style="list-style-type: none"> <li>• Advisory role, providing guidance on organizational change</li> </ul>
Program Managers	Garrick Wright Tom Richardson Nicole Sanislow	<ul style="list-style-type: none"> <li>• Monitor project progress</li> <li>• Provide guidance and support to project manager and project team members</li> <li>• Provide allocation of resources</li> </ul>
Vendors	SSI Vendor	<ul style="list-style-type: none"> <li>• Establish a solid architectural basis in support of the continuous modernization by defining a new architecture based on .NET Core, Web API</li> </ul>

Project Role	Resource Name	Responsibility
		framework, and a service-oriented architecture for the modernized System application.
	SOA/API Vendor	TBD

\* Change Request 10 has modified the scope of the project to align the API development with the Continuous Modernization Program. Accordingly, resources identified with an asterisk\* are expected to be hired at the onset of that Program. As they will be integral to API development, they are shown here for purposes of continuity.

### C. Project Management Methodology

DEO will use a project management methodology in compliance with project standard rule 60GG-2 F.A.C., product requirements, and DEO experience with similar engagements. Predictability, accountability, and flexibility are key elements that must be embraced by the overall project management approach to ensure DEO’s satisfaction and project success. Successful project management must include active and visible leadership, multiple controls and checkpoints with measurable outcomes, and engagement with all stakeholders. DEO believes strong project management is critical throughout the life of any successful project.

For this project, DEO’s project management will include the following specific elements, in addition to our standard methodology:

- The project management team will advise leadership on areas of concern and will propose solutions to mitigate risk.
- Vendors will respond to inquiries or requests from DEO within one business day from receipt.
- In the case where additional time is needed for a task, vendors will provide an estimate, which must be approved by the DEO Project Manager.
- At the end of the contract, vendors will provide final copies of all reports in electronic format for archive purposes.
- DEO’s project management approach will utilize the technical skills, tools, and techniques needed to succeed, as well as the dedication to accountability, resource commitment, and organizational focus. Project success will be the result of active communication among all individuals, understanding everyone’s role in the project, and clear delineation of responsibilities.

DEO believes successful project management hinges on the following:

- Clearly established project goals and requirements
- Ongoing assessment of quality against established standards
- Constant measurement of success against established deliverables and milestones
- Personal presence and commitment of key project leadership
- Proactive identification and communication

## VI. *Business Process Organizational Change Management Plan*

This project intends to migrate existing web-based real-time APIs into a pre-production environment, that can be maintained by internal staff. The SOA/API layer project will deliver improved scalability due to the service-oriented architecture allowing independent scaling of each service and clear direction for the CX/UX modernization. To initiate this change, this project will follow the organizational change processes outlined in the RA Modernization Program Organizational Change Management Plan, which is in the RA Modernization Program Library Central Repository.

The role of the Organizational Change Management Plan (OCM) within the SOA API Layer project is to assist in planning for and managing the people side of the project. OCM focuses on identifying, preparing, and managing a wide array of internal and external stakeholders, employees, and customers that will be impacted by the new solution. It is useful for those stakeholders to be informed, prepared, trained, and ready to participate in a successful implementation. It is beneficial for employees to adopt new skills and develop new capabilities and to value and appreciate the features that the new technology offers.

## VII. *Project Risk Management Plan*

This project will follow the [Risk Management Plan](#), captured within the Reemployment Assistance Program Management Plan. The Reemployment Assistance Modernization Program team follows a standard method for logging and categorizing issues, researching solutions, and communicating options and final recommendations. Project team members should actively contribute, as it is critical to timely decisions and moving past roadblocks. The buy-in of the project team, key team members and technical staff is critical to the success and ensures that the project team delivers a product in line with the project goals.

Key activities of the risk management process include:

- **Risk Identification** – Identifying risks that could potentially impact the project.
- **Risk Analysis** – Prioritize risks and assess the probability and consequence of the risk.
- **Risk Response Planning** – Prepare action plans to enhance opportunities or minimize threats to the program.
- **Risk Monitoring** – Execute action plans and evaluate their effectiveness, tracking, and reviewing residual risks and identifying new risks.

Risks are entered into Service Now for monitoring and management.

Risk Description/Impact	Probability of Occurrence (high, medium, low)	Risk Tolerance (high, medium, low)	Mitigation Strategy	Assigned Owner
No open risks				

### VIII. Capacity Plan

This project does not involve the purchase/lease, configuration, and installation of significant computer hardware (more than 5% of project costs). For purposes of capacity planning, computer hardware includes servers, storage, and network infrastructure. Accordingly, a Capacity Plan is not required.

### IX. Appendix A – Status Schedule

#### A. Status schedule as of this report

## SECTION 1 — OVERALL PROJECT PLAN

### I. *Project Charter*

#### A. **Scope Statement**

The System and Software Integration (SSI) vendor will provide analysis, oversight, monitoring, testing and assumes the responsibilities for the foundational technical platform and systems and software integration services necessary to develop and implement the Reemployment Assistance Claims and Benefits Information System’s (System) current and future infrastructure for modernization. These integration efforts will allow the Department of Economic Opportunity (Department) to secure services which can interoperate and communicate without relying on a common platform or technology. Connecting services, systems, and infrastructures and developing integration standards are the next steps for advancing the System’s maturity and System modularity for modernization.

Integration services include documenting the existing technical requirements and specifications of the System and an analysis of the existing technical requirements and specifications. The analysis will determine what technical requirements and specifications need to be improved to increase the effectiveness and efficiency of the System and assist the Department with acquiring software and hardware solutions that support the Reemployment Assistance Modernization Program. This shall include full evaluation of the Reemployment Assistance Information Technology program that relates to the System.

#### B. **Project Objectives and Business Benefits**

Project Objective	Business Benefit
Improved delivery of RA Benefits	Time to process claims is reduced
Improved functionality	Increased customer satisfaction and self-service alleviates dependencies on staffing
Improved system performance	System availability is improved Less regression testing Faster code delivery to production
A secure and scalable system with a sustainable system architecture	Reduction in capital expenditures

#### C. **Critical Success Factors**

- Improved customer experience/user experience (CX/UX).
- Implementation of a model that will serve Florida’s Reemployment Assistance needs for many years.
- Preserved continuity of Departmental operations and minimizing demands on Department staff.
- Implementation of an operations model that will serve the Reemployment Assistance program for the long term.
- Compliance with state and federal standards.

#### D. Key Dates

Key Delivery Date	Importance and Relevance to the Project
4/14/2022	Project Kick-Off Meeting
4/19/2022	Project Management Plan
4/19/2022	Staffing Plan
8/31/2022	Technology Selection Reports
6/27/2022	Training and Requirements Management Plan
8/24/2022	To-Be Technical Requirements
8/31/2022	To-Be Technical Requirements Working Sessions
10/11/2022	Performance Benchmarks
10/14/2022	Architecture Change Control and Approval Processes Transition Plan
9/12/2022	Transition Plan
10/11/2022	Infrastructure Performance Requirements
10/17/2022	Final To-Be Technical Requirements Report
9/1/2022	Architectural Standards for Overall System Modernization
12/28/2023	Design Documentation
12/16/2022	Procurement Support
5/11/2023	Integration Testing
5/15/2023	Integration Services
6/30/2023	Project Closure

#### E. Major Deliverables

Major Deliverable	Deliverable Description	Status
Deliverable 1	Project Kick-Off Meeting	Accepted
Deliverable 2	Project Management Plan	Accepted
Deliverable 3	Staffing Plan	Accepted
Deliverable 4	To-Be Technical Requirements	Accepted
Deliverable 5	To-Be Technical Requirements Working Sessions	Accepted
Deliverable 6	Final To-Be Technical Requirements Report	
Deliverable 7	Design Documentation	
Deliverable 8	Infrastructure Performance Requirements	
Deliverable 9	Requirements Management Plan	Accepted
Deliverable 10	Architectural Standards for Overall System Modernization	Accepted
Deliverable 11	Performance Benchmarks	
Deliverable 12	Architecture Change Control and Approval Processes	
Deliverable 13	Oversight and Monitoring of Modernization Projects	In Progress
Deliverable 14	Integration Testing	
Deliverable 15	Integration Services	
Deliverable 16	Technology Selection	In Progress
Deliverable 17	Procurement Support	In Progress

Major Deliverable	Deliverable Description	Status
Deliverable 18	Transition Plan	Delivered

## F. Major Milestones

Major Milestone	Milestone Description
Initiation Phase Complete	All initiation activities completed
Planning Phase Complete	All planning activities completed
Execution Phase Complete	In Progress
Monitor and Controlling Phase Complete	In Progress
Closing Phase Complete	

## G. Key Stakeholders

Key Stakeholder	Project Interest
Dane Eagle	Secretary, Department of Economic Opportunity
Adrienne Johnston	Deputy Secretary, Division of Workforce Services
Domenic DiLullo	Chief Technology Officer
Allyce Moriak	Chief Financial Officer
Wendy Castle	RA Modernization Program Owner - Business
Paul Forrester	RA Modernization Program Owner – Information Technology
Nicole Sanislow	RA Modernization Program Manager - Business
Tom Richardson	RA Modernization Program Manager – Strategic Planning Office
Garrick Wright	RA Modernization Program Manager – Information Technology
Monique Emmanuel	Project Manager

## H. Significant Project Assumptions and Constraints

### Project Assumptions

Vendor will create/recommend solutions that promote useability, product innovation, and scalability by using innovative concepts and that are suitable for a government environment with funding constraints.

### Project Constraints

Design may be materially constrained by:

1. Governing provisions of federal or state laws and regulations
2. Requirement to reduce operating costs
3. A schedule constraint of June 2023

## II. Work Breakdown Structure

WBS	Contract Deliverable Numbers	Task Name	% Complete	Duration	Start	Finish
<b>0</b>		<b>Reemployment Assistance Modernization Program</b>	<b>1%</b>	<b>338 days</b>	<b>Wed 4/6/22</b>	<b>Fri 7/28/23</b>

### B. Project Roles and Responsibilities

Project Role	Resource Name	Responsibilities
<b>Program Owners</b>	Wendy Castle	<ul style="list-style-type: none"> <li>- Provide guidance on overall strategic direction</li> <li>- Advise the Strategic Planning Office and project manager of risks that may impact the project</li> <li>- Facilitate resolution of significant issues in the project</li> </ul>
	Paul Forrester	
<b>Program Managers</b>	Garrick Wright	<ul style="list-style-type: none"> <li>- Provide guidance on overall strategic direction</li> <li>- Advise the Strategic Planning Office and project manager of risks that may impact the project</li> <li>- Facilitate resolution of significant issues in the project</li> <li>- Review and sign off on key milestones</li> </ul>
	Thomas Richardson	
	Nicole Sanislow	
<b>Project Manager</b>	Monique Emmanuel	<ul style="list-style-type: none"> <li>- Manage all aspects of the project and ensure compliance with PMP</li> <li>- Monitor project progress and schedule adherence</li> <li>- Complete all documents related to the project</li> <li>- Identify and manage risks according to the PMP</li> </ul>
<b>Project Owner</b>	Mark Miller	<ul style="list-style-type: none"> <li>- Review deliverables and project documents, identifying any deficiencies</li> <li>- Review and approve deliverables</li> <li>- Review and approve RFCs</li> </ul>
<b>DEO Enterprise Architects</b>	Vamsi Pasala	<ul style="list-style-type: none"> <li>- Contribute subject matter expertise</li> <li>- Complete assigned project tasks in accordance with the Project Schedule</li> <li>- Identify risks and issues to the Project Manager in accordance with the Risk and Issue Management section of this PMP</li> <li>- Assist the Project Manager in responding to risks and issues</li> <li>- Assist the Project Manager in evaluating change requests</li> </ul>
	Roland Solvik	
	Mike George	
<b>SSI Delivery Team Lead</b>	Joe Lombardi	<ul style="list-style-type: none"> <li>- Responsible for managing System integration and modernization program operations.</li> <li>- Develops the program strategy, supporting business case and various enterprise-wide high-level project plans.</li> <li>- Ensures integration of projects and adjusts project scope, timing, and budgets as needed, based on the needs of the Department.</li> </ul>

		<ul style="list-style-type: none"> <li>- Communicates with Peraton and Department leadership, business leadership and IT Business Consultants to communicate program strategy, direction, and changes.</li> <li>- Responsible for delivering all projects contained in the System modernization portfolio of projects on time, within budget and meeting the strategic and business requirements of the Department.</li> <li>- Responsible for tracking key program milestones and implementing adjustments to achieve Department objectives.</li> <li>- Partners with Departmental senior leadership to identify and prioritize opportunities for using IT to achieve the goals of the enterprise.</li> <li>- Develops and maintains the program management plans and schedule.</li> <li>- Serves as the single point of accountability for contract delivery and execution and Peraton staff.</li> </ul>
<p><b>Solutions Architect</b></p>	<p>Rudolph Mallamas  Ramesh Valluri</p>	<ul style="list-style-type: none"> <li>- Responsible for providing senior level expertise on decision recommendations and priorities regarding the Department’s overall modernization initiative’s architecture.</li> <li>- Facilitates the establishment and implementation of standards and guidelines that guide the design of technology solutions including architecting and implementing solutions requiring integration of multiple platforms, operating systems, and applications across the program.</li> <li>- Reviews, advises, and designs standard software and hardware builds, system options, risks, costs vs. benefits and impact on the Department’s business process and goals.</li> <li>- Develops and documents the framework for integration and implementation for changes to technical standards.</li> <li>- Assists in the development of and manages an architecture governance process. Provides technical guidance to project team areas as appropriate.</li> <li>- Contributes to the development of requirements for the Department’s statements of work, reviews and evaluates vendor technical proposals, participates in source selection.</li> <li>- Tracks industry trends and maintains knowledge of new technologies to better serve the Department’s architecture needs.</li> </ul>

<b>Data Architect</b>	Mandar Kulkarni	<ul style="list-style-type: none"> <li>- Responsible for program-wide data design, balancing optimization of data access with batch loading and resource utilization factors.</li> <li>- Designs and oversees the construction of data architectures, operational data stores, and data marts.</li> <li>- Focuses on program-wide data modeling and database design.</li> <li>- Provides significant input in the design of program data architecture standards, policies and procedures for the modernization program, structure, attributes, and nomenclature of data elements, and applies accepted data content standards to technology projects.</li> <li>- Contributes to business analysis, data acquisition and access analysis and design, Database Management Systems optimization, recovery strategy, and load strategy design and implementation.</li> </ul>
<b>Business Analyst &amp; Tester</b>	Nancy Hudak  Kelly Flaminio	<ul style="list-style-type: none"> <li>- Performs as the subject matter expert in unemployment compensation/insurance for the team.</li> <li>- Works closely with the Department, business analysts, and team members to understand business requirements that drive the analysis and design of quality technical solutions.</li> <li>- Involved in the full program life cycle and is responsible for designing, testing, implementing, maintaining, and supporting applications software that is delivered on time and within budget.</li> <li>- Participates in component and data architecture design, performance monitoring, product evaluation and buy vs. build recommendations.</li> <li>- Contributes to program procurement activities to include statement of work requirements, proposal evaluation, and source selection.</li> <li>- Performs systems analysis and design.</li> <li>- Applies understanding of development, quality assurance and integration methodologies in overseeing the technical implementation of program requirements.</li> </ul>
<b>Transition &amp; Quality Manager</b>	Mike Ortiz	<ul style="list-style-type: none"> <li>- Leads the program transition activities for Peraton, planning and coordinating the transition on to and off of the Department.</li> <li>- Responsible for establishing and implementing Peraton's quality assurance and compliance processes for the Department.</li> </ul>

		<ul style="list-style-type: none"> <li>- Works closely with Department and vendor project IT leaders to develop and implement an overall quality maturity roadmap and plan for each project.</li> <li>- Reviews progress toward the plan regularly with program IT and vendor leaders, technical teams to make modifications as necessary.</li> <li>- Establishes program IT service quality control standards, policies, and procedures. Monitors, evaluates, manages, and executes audit processes to ensure compliance.</li> <li>- Provides guidance and subject matter expertise to IT teams on QA methodologies and processes, educates them on their responsibilities/accountabilities for the purpose of achieving on-time and quality deliverables.</li> <li>- Makes recommendations and directs improvements to the software development lifecycle process.</li> <li>- Documents non-compliance to policies, process and standards and assists in their resolution.</li> </ul>
<p><b>Security Architect</b></p>	<p>Mark Fazen</p>	<ul style="list-style-type: none"> <li>- Manages the development and delivery of security standards, best practices, architecture, and systems to ensure information system security across the program.</li> <li>- Implements processes and methods for auditing and addressing non-compliance to information security standards; facilitates migration of non-compliant environments to compliant environments.</li> <li>- Ensures compliance with standards and currency with State and Federal security requirements.</li> <li>- Manages and participates in the planning and implementation of security administration for all program projects.</li> <li>- Contributes to the evaluation and selection of security applications and systems.</li> <li>- Makes recommendations and assists in the implementation of changes to work methods and procedures to make them more effective or to strengthen security measures.</li> </ul>
<p><b>Program Integration Tester</b></p>	<p>Deb Popa</p>	<ul style="list-style-type: none"> <li>- Prepares and plans for program integration testing.</li> <li>- Coordinates with project teams and communicates integration testing standards and requirements to them.</li> <li>- Documents program level integration test plans and scripts.</li> <li>- Conducts program level integration tests, identifies, and communicates test results to project teams, and conducts program level regression testing.</li> </ul>

<b>Project Support</b>	Julia Aqua	<ul style="list-style-type: none"> <li>- Assist SSI Delivery Team Lead with meeting agendas and minutes.</li> <li>- Provide project schedule updates</li> </ul>
<b>RA Modernization Project Managers</b>	Nicole Cain  Nicholas Kaoudis  James Sparks  Hameed Ahmed  David Sinclair  Linda Lawler  Steve Garrison  Christian Stephens  Sandeep Aggarwal  Viraj Jejurkar	<ul style="list-style-type: none"> <li>- Contribute subject matter expertise</li> <li>- Complete assigned project tasks in accordance with the Project Schedule</li> <li>- Identify risks and issues to the Project Manager in accordance with the Risk and Issue Management section of this OWP</li> <li>- Assist the Project Manager in responding to risks and issues</li> <li>- Assist the Project Manager in evaluating change requests</li> </ul>

**C. Project Management Methodology**

DEO will use a project management methodology in compliance with project management standard rule 60GG-2 F.A.C., project requirements and department experience with similar engagements. Predictability, accountability, and flexibility are key elements that must be embraced by the overall project management approach to ensure the Department’s satisfaction and project success. Successful project management must include active and visible leadership, multiple controls and checkpoints with measurable outcomes, and engagement with all stakeholders. The Department believes strong project management is critical throughout the life of any successful project.

For this project, the Department’s project management will include the following specific elements, in addition to our standard methodology:

- The project management team will advise leadership on areas of concern and will propose solutions to mitigate risk.
- Vendors will respond to inquiries or requests from the Department within one business day from receipt.
- In the case where additional time is needed for a task, vendors will provide an estimate, which must be approved by the Department Project Manager.
- At the end of the contract, vendors will provide final copies of all reports in electronic format for archive purposes.

The Department's project management approach will utilize the technical skills, tools, and techniques needed to succeed, as well as the dedication to accountability, resource commitment, and organizational focus. Project success will be the result of active communication among all individuals, understanding everyone's role in the project, and clear delineation of responsibilities.

The Department believes successful project management hinges on the following:

- Clearly established project goals and requirements
- Ongoing assessment of quality against established standards
- Constant measurement of success against established deliverables and milestones
- Personal presence and commitment of key project leadership
- Proactive identification and communication of risks and issues

### **Quality Management Plan**

The Quality Management Plan ensures work is complete and meets or exceeds an adequate level of quality of the deliverables. All members of the project team will play a role in quality management, and it is critical the team ensures work is completed according to the Department's standards for quality acceptance.

Project Quality Management activities will ensure project documents meet agreed upon standards, work is performed efficiently, project practices conform to recommended project standards and deficiencies are identified and corrective action taken.

### **Quality Management Approach**

Managing quality includes four major processes:

- **Quality planning (QP):** Completeness and correctness criteria define what it means for a project document to be complete and correct. The project team will establish completeness and correctness criteria. Specific criteria for the quality of Contract Deliverables will be documented in the contract and managed by the Contract Manager, program team and Project Manager.
- **Quality assurance (QA)** refers to the process used to create project documents, not the deliverables themselves. The Project Team will perform QA activities for the project weekly. The project manager may make changes to processes as necessary; changes will be communicated to the appropriate stakeholders.
- **Quality control (QC):** Performing Quality Control (QC) involves monitoring specific project results to determine whether they comply with relevant quality standards and

identifying ways to eliminate causes of unsatisfactory results. The Strategic Planning Office (SPO) will perform (QC) activities to verify project management and documents are of high quality. If the SPO determines a project document to be complete, it will be presented to the Project Team at the following Status Meeting.

- **Quality improvement (QI):** The Project Manager is responsible to implement corrective actions based on the results of the quality management processes. These may include changes to project management processes; required training for stakeholders; updating performance metrics, etc.

### Communication Management Plan

This project will follow the communications processes outlined in the RA Modernization Program Communications Management Plan.

Item	Purpose	Format	When/ Frequency	Type	Initiator	Recipient	Feedback
Project Meeting	Provide and discuss project tasks, issues, risks, action items	Meeting/Face to face or virtual)	Daily/ Weekly as needed	Mandatory	Project Manager	Project Team	Meeting Minutes
Status Report	Provide detailed information on the progress of the project against the plan	Email	Weekly/ Monthly/ Quarterly	Mandatory	Project Manager	Project Team/SPO Program Manager	Verbal and follow-up email
SPO Status Meeting	Review the status report, resolve issues, and make decisions	Meeting	Weekly	Mandatory	Project Manager	SPO Program Manager	Verbal and follow-up email
Project Deliverables	Provide deliverables to DEO for review	Email	Per project schedule	Mandatory	Project Manager	SPO Program Manager/ Project Team members	Written vetted, consolidated, and actionable comments
Deliverable Review Feedback	Provide vetted, consolidated, and actionable written comments	Email	Per project schedule	Mandatory	SPO Program Manager	Project Manager/ Project Team Members	Written/ email follow-up using Deliverable Review Comment Form
Deliverable Review Walkthrough	Confirm mutual understanding of desired deliverable changes	Meeting	As needed	Informational	Project Manager	Program Managers/ Project Owners	Verbal or written

Work Session	Gather information from subject matter experts	Meeting	Per project schedule	Mandatory	Project Manager	Update subject matter experts (only if the SPO Project Manager has the approved communication)	Verbal and follow-up email
Work Session Follow-up	To answer questions or clarify information gathered	Email	As needed	Informational	Project Manager	Provide subject matter experts (only if SPO Project Manager has approved the communication)	Verbal or email follow-up
Online Survey	Gather information from subject matter experts (former providers)	Email	Per project schedule	As needed	Project Manager	Subject matter experts (only if SPO Project Manager has approved the communication)	Verbal or email follow-up
Project Issues	Documentation of project issues	Issue Log Entry	As needed	Mandatory	Any Stakeholder	Project Owner/ Project Manager	Written/ email follow-up
Project Issues Escalation	To resolve project issues	Email	As needed	Mandatory	Project Manager	SPO Program Manager	Written/ email follow-up
Change Requests	Document project changes to scope of work	Change Request Form	As needed	Mandatory	Change Initiator	Project Manager/ Change Owner/ Change Analyst/ CCB	Written/ email follow-up
Project Closeout and Lessons Learned	Formal project closeout meeting	Email	Per project schedule	Mandatory	SPO Project Manager	All Stakeholders	Written/ email follow-up

The master copy of this document is available in the [RA Modernization Program Library](#) in the Central Repository

The communication matrix below identifies the key project stakeholders and the detail of communications for this project.

## Bi-Weekly Status Reporting

Vendors will be required to submit status reports throughout the project at several levels. The primary source of status information is the weekly written status report, which will communicate at minimum, the following information.

- **Project Status.** This section depicts the project status at a summary level using a red/yellow/green method supported by two to three essential questions that are answered to determine summary status. The red/yellow/green method is not meant to be a grading system but instead it is a way to easily identify the areas of the project that need the most attention to make the project successful.
- **Overview of Project Progress.** This section describes significant accomplishments achieved in the reporting period.
- **Overall Status.** This section provides a high-level overview of whether the project is on schedule, on budget, and on scope. A yellow or red status should be explained here in detail.
- **Project Milestones, Deliverables, and Latest Tasks.** This section contains the major deliverables of the project, their planned and actual completion dates, and their status.
- **Risks, Action Items, Issues, and Decisions.** This section will link to the project risk, action item, issue, and decision tracking tool. The project tracking tool contains all items tracked during the project.

## Project Tracking

This section describes the “RAID” methodology for tracking risks, action items, issues, and decisions. The Department will follow a centralized approach that minimizes miscommunication or misinformation among project stakeholders. The Department will diligently maintain a project tracking log for each project, and a master log for the System Modernization project overall, a Microsoft Excel workbook with multiple tabs intended to capture the details and the latest attributes of items tracked by Project Managers.

## VI. *Business Process Organizational Change Management Plan*

This project will follow the organizational change processes outlined in the RA Modernization Program Organizational Change Management Plan.

The master copy of this document is available in the [RA Modernization Program Library](#) in the Central Repository.

The role of the Organizational Change Management plan (OCM) within an individual project under the RA Modernization Program is to help plan for and manage the people side of the project. OCM focuses on identifying, preparing, and managing a wide array of internal and external stakeholders, employees and customers that will be impacted by the new solution. It is good for those stakeholders to feel informed, prepared, trained and ready to participate in a successful implementation. It is beneficial for employees to adopt new skills and develop new capabilities and to value and appreciate the features that the new technology offers.

**VII. Project Risk Management Plan**  
**Risk & Complexity Assessment**

The Risk & Complexity Assessment will be completed at the end of every Phase in the Project lifecycle. The Project Manager is responsible to complete this assessment with the assistance of project team members.

Risk & Complexity Assessments	Category
Pre-Charter Risk & Complexity Category	3
Initiation Gate Risk & Complexity Category	2
Planning Gate Risk & Complexity Category	
Event Driven Risk & Complexity Category	

**Project Risk Management**

This project will follow the risk management processes outlined in the RA Modernization Program Risk Management Plan.

The master copy of this document is available in the [RA Modernization Program Library](#) in the Central Repository.

The risk management process helps the project team anticipate and respond to emerging risks throughout the duration of the project. The risk management process occurs throughout all phases of the project, from planning through execution and closeout. Project risks are logged and tracked in the Project Log Workbook (RAID Logs).

Figure 2 below illustrates the major activities associated with the key risk management process.

Figure 2: RA Modernization Program Risk Management Process

### Action Items

Action items are unplanned tasks that occur during a project that are too small to be added to the schedule. These items must be within the scope of the project and are often tasks that support scheduled tasks, issue resolution, risk management, or some other aspect of the project. The action item log is created and maintained as part of the project tracking log.

Action items will be managed in the following manner:

- During status meetings, any stakeholder can raise an action item for discussion.
- The Project team will discuss the action item and determine if it warrants being monitored in the action item log.
- The project manager will enter the item in the log.
- The team will set the priority for the action item (high/medium/low), assign an action item owner, and set a planned completion date.
- At each subsequent status meeting, the action item(s) will be reviewed until they can be closed.

### Issue Management

This project will follow the issue management processes outlined in the RA Modernization Program Issue Management Plan.

The master copy of this document is available in the [RA Modernization Program Library](#) in the Central Repository.

An issue is an immediate problem that needs resolution. Acknowledging and addressing issues quickly ensures that they do not impact the scope of the project. Project issues are logged and tracked in the Project Log Workbook (RAID Logs).

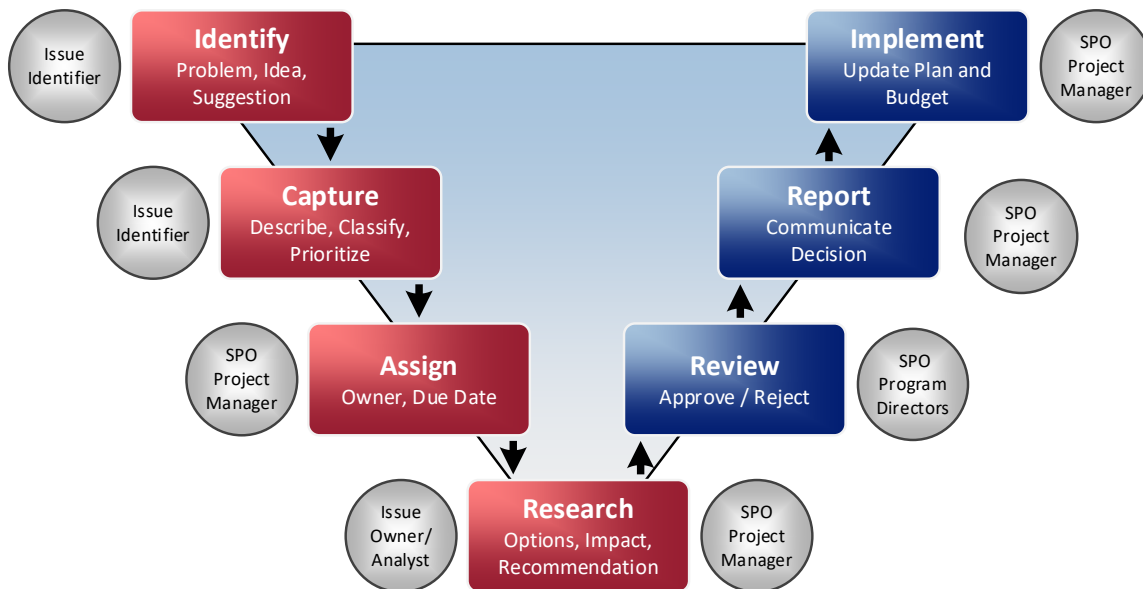

Figure 3: RA Modernization Program Issue Management Process

## Decisions

Decisions are leadership answers to questions that arise during the project. The decision log is created and maintained as part of the project tracking log.

Decisions will be managed in the following manner:

- During status meetings, any stakeholder can raise a question that requires a decision.
- If the team determines a decision needs to be made, the project manager will enter it in the decision log.
- The team will discuss the impact to the project, assign a decision maker, and set a date for when the decision is needed.
- At each subsequent status meeting, the decision item(s) will be reviewed until they can be closed.

## Change Management

This project will follow the change processes outlined in the RA Modernization Program Change Management Plan.

The master copy of this document is available in the [RA Modernization Program Library](#) in the Central Repository.

The *RA Modernization Change Management Plan*, defines the approach and provides the processes for initiating, defining, researching, evaluating, reviewing, prioritizing, managing cost, approving, or rejecting the change requests (CR), and communicating the status of the change that may affect the success of the SSI project.

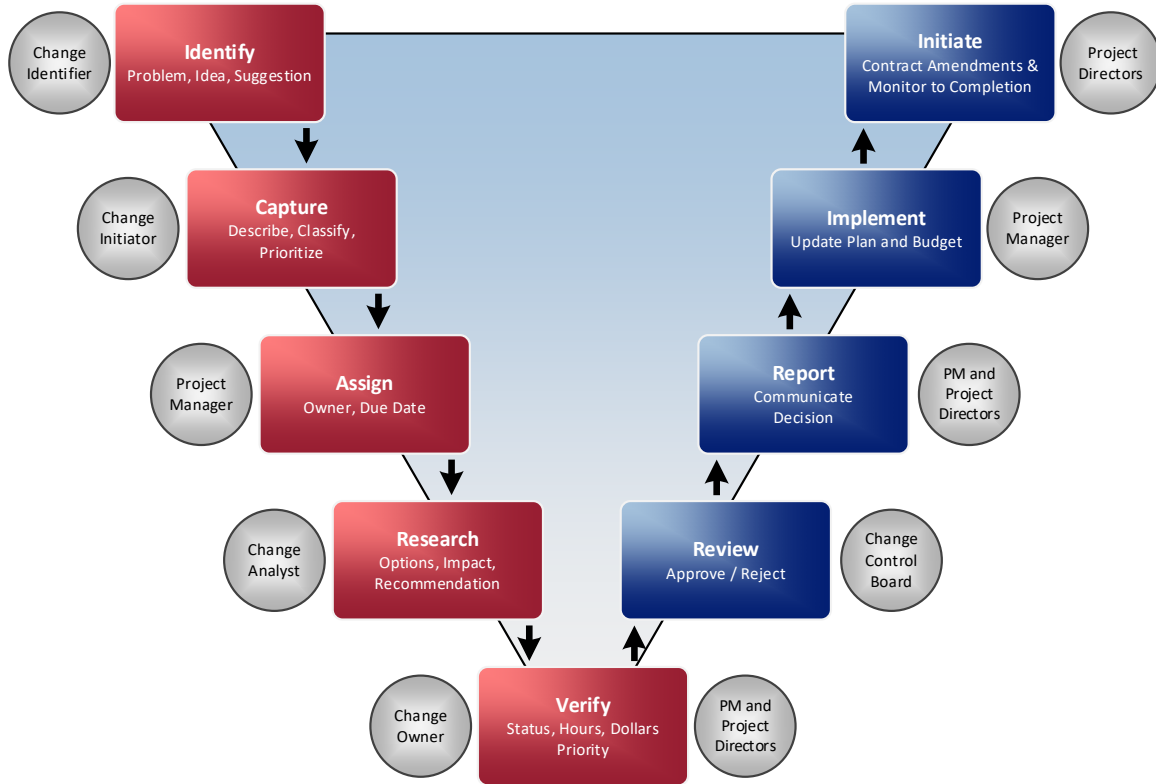

Figure 4: RA Modernization Program Change Management Process

### Schedule Management

The project schedule for this project will be stored in the Central Repository 03 SSI Project Deliverables folder.

### Schedule Maintenance

The project schedule maintenance is an on-going activity that tracks the work performed, the timeframes for when the work has been or will be completed and progress against the baseline work estimates and timelines. To effectively track the program progress, the project schedule is kept current, and reflects all work that needs to be performed, in accordance with the RA Modernization Program Schedule Management Plan.

If a change to the project schedule or scope is needed, the Project Manager may pursue a change request as described in the [RA Modernization Change Management Plan](#).

### Procurement Management

The Procurement Management Plan seeks to outline how the project will procure resources necessary to complete the project objectives. It defines the procurement methodology for this project, lays out the process for managing procurement throughout the life of the project, and will be updated if project needs change. This plan identifies and defines the goods and services to be procured, the types of contracts to be used in support of this project, the contract approval process, and the decision criteria. The importance of coordinating the procurement activities,

establishing firm contract deliverables, and metrics in measuring procurement activities is included in the following subsections.

**Procurement Management Approach**

The Department’s Purchasing Office and any vendors contracted for procurement assistance will provide oversight and management along with the Project Manager for all procurement activities under this project. The Project Manager will work with the project team to identify all items to be procured for the successful completion of the project. The Department Strategic Planning Office (SPO) will then review any procurement requests prior to approving the development of procurement documentation.

**Procurement Definition**

The following table will be completed to record any procurement goods and/or services determined to be essential for any RA Modernization project’s completion and success. The Project Manager and/or SPO must approve any procurement before inclusion in this table.

Procurement	Description	Justification	Needed By
SSI Services	Analysis, oversight, monitoring, and testing along with technical expertise to establish and lay the foundation and infrastructure for the technical platform and integrate the software necessary to deliver a fully integrated system.	Needed to support RA Modernization Program integration activities	4/4/2023

**Cost Management**

The tables below will be completed and used to define and track project costs during the SSI Project.

Cost Management Plan				
Category	Description	Frequency	Deliverable	Cost

Column	Definition
Category	Type of expense
Description	Description of expense
Frequency	Describe whether the expense is annual or recurring or a one-time expense
Deliverable	List the deliverable associated with the expense
Cost	List the total expense in dollars, e.g. \$0.00

**Staffing Management**

The purpose of this section is to outline how the project is to manage staffing requirements and resource tasks appropriately. This project plans to procure additional staffing through the contract with Peraton for integration services. This is a fixed price contract and Peraton will provide needed resources as is necessary to complete the contract.

### ***VIII. Capacity Plan***

Utilization of a single tool for software development provides a single source of truth for work tracking and resource allocation which can then be utilized for capacity planning for the development environment, tools, and developers.

#### **Project Capacity Planning**

- **Establish Cross-Functional Team:** To collaborate and communicate about production capacity and resource management, you want a cross-functional team with different levels and different functions.
- **Calculate Resource Capacity:** Before you can create a production capacity plan, you need to have an idea of your current capacity and your available resources.
- **Determine Resource Requirements:** For each project, look at the scope and what resources are required to do the task for the project.
- **Prioritize Projects:** Which projects are most important, and which can be put aside for the time being? You can't do everything at once.
- **Allocate Resources Based on Project Priority:** Now allocate those prioritized projects and make sure that they are aligned with the goals of the organization.
- **Keep the Lines of Communications Open:** Communicate between executives, project management leaders and stakeholders.
- **Document Known Risks:** Monitor risks such as union strikes, weather, government regulations that stop a project or create new ones unexpectedly.
- **Plan for How to Handle Too Much Capacity:** Understand where it is and how to resolve it (such as reassigning), or not enough capacity (again, where/how).

## APPENDIX A

Task Name	Duration	Start	Finish	Resource Names
<b>Initiation</b>	<b>19 days</b>	<b>Tue 4/5/22</b>	<b>Fri 4/29/22</b>	
<b>Risk and Complexity Assessment</b>	<b>2 days</b>	<b>Tue 4/5/22</b>	<b>Wed 4/6/22</b>

## SECTION 1 — OVERALL PROJECT PLAN

### I. *Project Charter*

In collaboration with its partners, DEO assists the Governor in advancing Florida’s economy by championing the state’s economic development vision and by administering state and federal programs and initiatives to help visitors, citizens, businesses, and communities. In support of this mission and vision, DEO maintains the Reemployment Assistance Claims and Benefits Information System (System). The System serves as the central repository to file, track, view, and process Reemployment Assistance claims. The System functions as the core benefits administration platform for DEO staff, claimants, and employers and Third-Party Administrators (TPA). The System provides online access to apply for benefits, view, and track claims, set up payment information, respond to fact-finding requests, and protest and appeal eligibility determinations. For employers, the System allows access to respond to and protest inquiries regarding claimants receiving Reemployment Assistance benefits. Additionally, the System allows employers to grant TPAs access to perform specific administrative functions.

DEO partnered with a third-party contractor to perform a study to include assessment of the System built in 2013, actions taken to stabilize the performance of the System in 2020, and compare solution options to enable immediate usability improvements and a sustainable continuous modernization path. On February 26, 2021, the Final Report for Improved Delivery of Reemployment Assistance Benefits (“Final Report”) was published, and includes a recommended approach and implementation roadmap for future modernization efforts. The recommendations divide modernization initiatives into realistic, viable, and achievable projects and includes the acquisition of third-party services to support the efforts and initiatives referred to as the Reemployment Assistance Modernization Program. The goals of the Reemployment Assistance Modernization Program are to:

1. Implement immediate System performance and functional improvement needs while positioning DEO with a secure, scalable, and sustainable system architecture and agile support processes.
  - a. The goal is to have a System that is efficient, scalable, and meets the needs of providing benefits to protect workers who lose their job through no fault of their own.
2. Achieve Reemployment Assistance national prominence, as measured through the federal core measures, program integrity measures, and Secretary standards required by the U.S. Department of Labor.
3. Improve access and equity in the delivery of Reemployment Assistance benefits.
4. Sharpen the Reemployment Assistance program’s focus on outcomes and accountability.
5. Promote Floridians’ self-sufficiency.
6. Have a System that can respond rapidly to changes in law and economic conditions.
7. Reduce cyber security and privacy risks and potential for fraud.
8. Improve information flow with claimants, employers, and TPAs to make quicker decisions.

9. Improve Reemployment Assistance program quality, accountability, performance, and integrity.
10. Leverage new technologies to improve claimants, employers, and TPAs' overall experience with the Reemployment Assistance program, including reducing the amount of time it takes to file a claim for benefits.
11. Improve efficiencies and effectiveness in managing claim workload and being better equipped to handle unexpected spikes in the number of claims that may result from emergencies, disasters, or economic factors.
12. Eliminate manual, error-prone, labor-intensive processes.
13. Enhance System usability including accessibility.
14. Reduce maintenance and support time and costs.
15. Incorporate technical standards (e.g., software development standards, database standards, and interface standards) and modern technologies.
16. Seamlessly integrate with other internal/external IT assets.
17. Modernize real time and batch interfaces and all other systems exchanging data with the Reemployment Assistance program.

**A. Scope Statement**

**In Scope**

To implement a stand-alone Commercial-Off-The-Shelf (COTS) solution for the external-facing CX/UX screens of the System. The solution will interface with the System for Unemployment Insurance (UI) data and retrieve/submit data necessary for UI external users to perform actions. The solution will support data intake from customers even if the System is down and will sync up later once the System is available.

**Out of Scope**

Any work associated with modifications to back-office screens within the System.

**B. Project Objectives and Business Benefits**

Project Objective	Business Benefit
An agile and incremental approach will be utilized to ensure that business process optimization (BPO) is incorporated into the transformation activities for each of the four functional modules within scope of the CX/UX project, which include Initial Claims, Continued Claims, Core Claims and Claim Status, Employers, and Third-Party Administrators.	<ol style="list-style-type: none"> <li>1. Ensuring that business process improvements are documented prior to determining functional system change needs.</li> <li>2. Ensuring that business requirements align with functional and CX/UX requirements before initiating transformation.</li> <li>3. Ensuring that appropriate work and resource estimates are determined prior to submitting an updated IV-B.</li> <li>4. Improved stability, reliability, and maintainability of the System.</li> <li>5. Improved Reemployment Assistance service to Florida Citizens.</li> </ol>

	6. Predictable maintenance cost for the application.
--	--

**C. Critical Success Factors**

- A suitable COTS solution can be procured which meets the requirements and constraints of the CX/UX Project.
- A contractor can complete the project by 6/30/2023.

**D. Key Dates**

Key Dates (anticipated)	Importance and Relevance to the Project	Status
10/2022	RFI Released	Completed
11/2022	RFQ Released	
11/18/2022	Complete Connect Screen Captures for external screens	
12/2/2022	Complete mapping of external Connect screen elements to functional specifications.	
12/2/2022	Completion of documenting all external Connect screen hyperlinks, help pages, and popups.	
12/30/2022	Completion of mapping all external Connect screen data fields to the Connect database.	
1/2023	Vendor Award	
2/2023	Project Kick-off	

**E. Major Deliverables**

Major Deliverable	Deliverable Description	Deliverable Status
Implementation of CX/UX solution.	Vendor will design, develop, and implement the solution which meets the contract, requirements, and constraints.	

**F. Major Milestones**

Major Milestone	Milestone Description
Procurement Phase Complete	In progress
Initiation Phase Complete	In progress
Planning Phase Complete	In progress
Execution Phase Complete	
Monitor and Controlling Phase Complete	
Closing Phase Complete	

**G. Key Stakeholders**

Key Stakeholder	Project Interest
Dane Eagle	Secretary, Department of Economic Opportunity

Adrienne Johnston	Deputy Secretary, Division of Workforce Services
Domenic DiLullo	Chief Technology Officer
Ed Wynn	Chief Information Officer
Allyce Moriak	Chief Financial Officer
Wendy Castle	RA Modernization Program Owner – Business
Paul Forrester	RA Modernization Program Owner – Information Technology
Nicole Sanislow	RA Modernization Program Manager – Business
Tom Richardson	RA Modernization Program Manager – Strategic Planning Office
Garrick Wright	RA Modernization Program Manager – Information Technology
Mark Miller	Project Owner
Steve Garrison	Project Manager
Todd Dzicek	Business Analyst
Daniel Swaisgood	Business Analyst
Thomas Hoverman	Organizational Change Management Lead

**H. Significant Project Assumptions and Constraints**

**Project Assumptions**

- The project will have access to the appropriate state management, staff, and related Program stakeholders (internal and external) and other resources as required and as needed without delay.
- A suitable COTS solution can be procured which meets the requirements of the CX/UX project.
- A contractor can complete the project by 6/30/2023.

**Project Constraints**

- End date of 6/30/2023 cannot be moved.
- Must be a COTS product.

**II. Work Breakdown Structure**

The WBS will be provided once a solution is procured, and a schedule is approved.

**III. Resource Loaded Project Schedule**

The CX/UX project is dependent on the procurement of a solution which meets the requirements and constraints of DEO. The System and Software Integrator is working with DEO to facilitate the procurement. A project schedule will be updated once the procurement is completed, and a contract awarded with the selected contractor.

**IV. Project Spending Plan**

This project is expected to be fixed priced based on contracted deliverable-based invoice events.

**V. Project Organization and Methodology**  
**Project Organizational Chart**

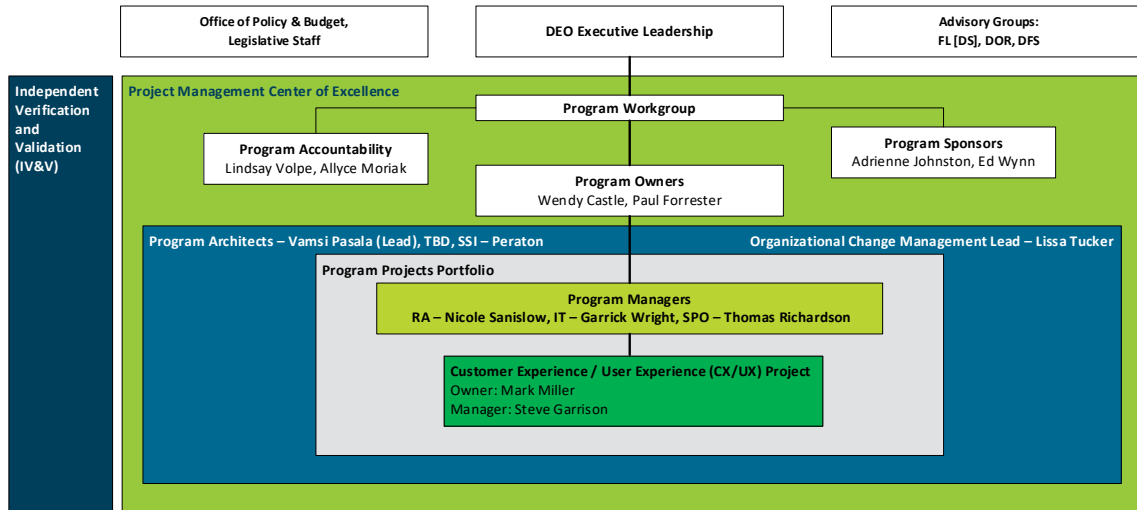

Figure 1: Project Organization Chart

**Project Management Methodology**

DEO will use a project management methodology in compliance with project management standard rule 60GG-2 F.A.C., project requirements and department experience with similar engagements. Predictability, accountability, and flexibility are key elements that must be embraced by the overall project management approach to ensure DEO’s satisfaction and project success. Successful project management must include active and visible leadership, multiple controls and checkpoints with measurable outcomes, and engagement with all stakeholders. DEO believes strong project management is critical throughout the life of any successful project.

For this project, DEO’s project management will include the following specific elements, in addition to our standard methodology:

- The project management team will advise leadership on areas of concern and will propose solutions to mitigate risk.
- Vendors will respond to inquiries or requests from DEO within one business day from receipt.
- In the case where additional time is needed for a task, vendors will provide an estimate, which must be approved by the DEO Project Manager.
- At the end of the contract, vendors will provide final copies of all reports in electronic format for archive purposes.

DEO’s project management approach will utilize the technical skills, tools, and techniques needed to succeed, as well as the dedication to accountability, resource commitment, and organizational focus. Project success will be the result of active communication among all

individuals, understanding everyone's role in the project, and clear delineation of responsibilities.

DEO believes successful project management hinges on the following:

- Clearly established project goals and requirements
- Ongoing assessment of quality against established standards
- Constant measurement of success against established deliverables and milestones
- Personal presence and commitment of key project leadership
- Proactive identification and communication of risks and issues

### **Weekly Status Reporting**

Vendors will be required to submit status reports throughout the project at several levels. The primary source of status information is the weekly written status report, which will communicate at minimum, the following information.

- **Project Status.** This section depicts the project status at a summary level using a red/yellow/green method supported by two to three essential questions that are answered to determine summary status. The red/yellow/green method is not meant to be a grading system but instead it is a way to easily identify the areas of the project that need the most attention to make the project successful.
- **Overview of Project Progress.** This section describes significant accomplishments achieved in the reporting period.
- **Overall Status.** This section provides a high-level overview of whether the project is on schedule, on budget, and on scope. A yellow or red status should be explained here in detail.
- **Project Milestones, Deliverables, and Latest Tasks.** This section contains the major deliverables of the project, their planned and actual completion dates, and their status.
- **Risks, Action Items, Issues, and Decisions.** This section will link to the project risk, action item, issue, and decision tracking tool. The project tracking tool contains all items tracked during the project.

### **Project Tracking**

This section describes the "RAID" methodology for tracking risks, action items, issues, and decisions. DEO will follow a centralized approach that minimizes miscommunication or misinformation among project stakeholders. The Department will diligently maintain a project tracking log for each project, and a master log for the System Modernization project overall, a Microsoft Excel workbook with multiple tabs intended to capture the details and the latest attributes of items tracked by Project Managers.

**VI. Project Risk Management Plan**

**Risk & Complexity Assessment**

The Risk & Complexity Assessment will be completed at the end of every Phase in the Project lifecycle. The Project Manager is responsible to complete this assessment with the assistance of project team members.

Risk & Complexity Assessments	Category
Pre-Charter Risk & Complexity Category	3
Initiation Gate Risk & Complexity Category	3
Planning Gate Risk & Complexity Category	2
Event Driven Risk & Complexity Category	

**Project Risk Management**

This project will follow the risk management processes outlined in the RA Modernization Program Risk Management Plan. The master copy of this document is available in the RA Modernization Program Library in the Central Repository.

The risk management process helps the project team anticipate and respond to emerging risks throughout the duration of the project. The risk management process occurs throughout all phases of the project, from planning through execution and closeout. Project risks are logged and tracked in ServiceNow.

**VII. Project Action Items**

Action items are unplanned tasks that occur during a project that are too small to be added to the schedule. These items must be within the scope of the project and are often tasks that support scheduled tasks, issue resolution, risk management, or some other aspect of the project. The action item log is created and maintained in ServiceNow.

Action items will be managed in the following manner:

- During status meetings, any stakeholder can raise an action item for discussion.
- The Project team will discuss the action item and determine if it warrants being monitored in the action item log.
- The project manager will enter the item in the log.
- The team will set the priority for the action item (high/medium/low), assign an action item owner, and set a planned completion date.
- At each subsequent status meeting, the action item(s) will be reviewed until they can be closed.

**VIII. Project Issue Management**

This project will follow the issue management processes outlined in the RA Modernization Program Issue Management Plan. The master copy of this document is available in the RA Modernization Program Library in the Central Repository.

An issue is an immediate problem that needs resolution. Acknowledging and addressing issues quickly ensures that they do not impact the scope of the project. Project issues are logged and tracked in ServiceNow.

## ***IX. Project Decisions***

Decisions are leadership answers to questions that arise during the project. The decision log is created and maintained as part of the project tracking log. Decisions are tracked in ServiceNow.

Decisions will be managed in the following manner:

- During status meetings, any stakeholder can raise a question that requires a decision.
- If the team determines a decision needs to be made, the project manager will enter it in the decision log.
- The team will discuss the impact to the project, assign a decision maker, and set a date for when the decision is needed.
- At each subsequent status meeting, the decision item(s) will be reviewed until they can be closed.

## ***X. Project Change Management***

This project will follow the change processes outlined in the RA Modernization Program Change Management Plan. The master copy of this document is available in the RA Modernization Program Library in the Central Repository.

The *RA Modernization Change Management Plan*, defines the approach and provides the processes for initiating, defining, researching, evaluating, reviewing, prioritizing, managing cost, approving or rejecting the change requests (CRs), and communicating the status of the change that may affect the success of the BPO project.

## ***XI. Project Schedule Management***

The project schedule for this project will be stored in the Central Repository 11 – Incremental CX-UX Project Deliverables folder. The project schedule will also be uploaded into ServiceNow.

### **Schedule Maintenance**

The project schedule maintenance is an on-going activity that tracks the work performed, the timeframes for when the work has been or will be completed and progress against the baseline work estimates and timelines. To effectively track the program progress, the project schedule is kept current, and reflects all work that needs to be performed, in accordance with the RA Modernization Program Schedule Management Plan.

If a change to the project schedule or scope is needed, the Project Manager may pursue a change request as described in the RA Modernization Change Management Plan.

***XII. Project Cost Management***

A final budget will be completed upon successful procurement of a vendor for software and to perform integration services. The costs will be deliverable based invoice events. The cost plan will be managed in ServiceNow.

***XIII. Project Organizational Change Management (OCM)***

The program OCM lead will work with the project manager and contracted vendor to implement organizational change management based on the identified product and its impact(s) to the organization. An initial assessment was completed but the team cannot complete a full analysis without knowing the product and its potential impacts. The expectation is to have minimal organizational change due to the project implementing externally facing screens.

## SECTION 1 – OVERALL PROJECT PLAN

### I. Project Charter

#### A. Scope Statement

The Information Technology Data Architecture Team (RAD), in collaboration with the Reemployment Assistance (RA) program, is transitioning 39 active U.S. Department of Labor (USDOL) Education and Training (ETA) Reports from the Reemployment Assistance Claims and Benefits Information System (System) Application Database to the Department of Economic Opportunity (Department) Data Warehouse.

Project scope also includes the running of back/missing reports that have not yet been submitted but are required by USDOL, and the Sample Population files used by USDOL to validate some reports.

Project includes business validation of all reports to be complete by 12/31/2022.

Completing this project benefits the Division of Information Technology and the Reemployment Assistance (RA) program. It:

1. Facilitates DEO’s Cloud Initiative Program which moves the System Application to the cloud
2. Removes report processing from a transactional system designed to support claimants (System), to an analytical system designed for efficient staff Unemployment Compensation analysis and reporting (Data Warehouse).
3. Puts DEO in compliance with USDOL; and
4. Develops all the required reports that correlate to federal programs launched in during the pandemic, some of which affect the RA program’s funding.

#### B. Project Objectives and Business Benefits

Project Objective	Business Benefit
Facilitates the Department’s Cloud Initiative Program which moves the System Application to the cloud	Achieves State of Florida requirement for state agencies to move applications to the cloud.
Frees up resources in System to better serve claimants by removing report processing to a more appropriately designed source	Reports can be run timely and/or as needed without interrupting the availability or performance of the System.
Puts the Department in compliance with USDOL by submitting missing pandemic reports that may affect funding.	Enables the Department to provide USDOL supporting information for administrative costs incurred while providing services to Florida claimants and employers.

### C. Critical Success Factors

- 39 ETA reports published to RA via the Data Warehouse by 12/31/2022 including running reports according to the regularly scheduled weekly, monthly, quarterly, or annual schedule.
- All missing pandemic reports provided to RA for validation and issues are corrected as requested by 12/31/2022.
- 39 reports submitted to USDOL from data reported to RA in the Data Warehouse.
- Related USDOL report batches are stopped and retired from the System.
- Reports no longer required by USDOL are retired from the System.
- 15 data populations generated from the Data Warehouse are retired from the System.

### D. Key Dates

Key Date	Importance and Relevance to the Project
04/30/2021	Project Start – Approval received after Proof of Concept
06/10/2021	RA Reports Enhancement Kick-Off Meeting – Identified: <ol style="list-style-type: none"> <li>1. IT &amp; RA PM Assignment</li> <li>2. Fri 08/19/22	Populations 3a, 5
Fri 09/02/22	Populations 3, 6
Fri 09/16/22	Population 4
Fri 10/14/22	Completion of Report Shutdown Prioritization Plan and Timeline
Fri 09/30/22	Transition of Populations files to Folders for USDOL Upload
Fri 10/14/22	Transition of submitting populations from data warehouse
Fri 10/31/22	Completion of Technical Debt
Fri 10/31/22	Completion of testing and training for viewing Report QA Dashboards (Final Reporting Team Activity)
Fri 10/28/22	Benefits measures and reporting
Fri 10/28/22	Completion of UAT Process documentation
Fri 10/28/22	Completion of Incident Management Process for Scheduled Report Runs
Fri 11/30/22	Final Notice of Reports being removed from the System
Fri 10/28/22	Closure of remaining open issues and decisions
Fri 10/28/22	Project Management Closure Docs and activities
Fri 12/30/22	Remove Reports from the System (*Process continues until all 39 reports' warranties have ended and are removed—may complete after project is closed)
Fri 12/30/22	Transition to Operations Complete

\*In progress – Answering USDOL Questions Round 2

**E. Major Deliverables**

<b>Major Deliverables/ Reports</b>	<b>Deliverable Description</b>
ETA 5159 PEUC (Pandemic Emergency Unemployment Compensation)	Claims and Payment Activities (PEUC)
ETA 218 PEUC	Monetary Determinations and Benefit Years/Duration (PEUC)
ETA 5159 Regular	Claims and Payment Activities Regular
ETA 5159 Workshare (Part-Time Workers)	Claims and Payment Activities Workshare
ETA 5130 PEUC	Benefit Appeals (PEUC)
ETA 902 DUA Regular	Disaster Unemployment Assistance Report for FEMA Announced Storms
Weekly DARIS	Like DUA Regular except includes cost information, sent to FEMA via USDOL
ETA 5130 Regular	Benefit Appeals Regular
ETA 5130 Extended Benefits (EB)	Benefit Appeals Extended Benefits
ETA 207 PEUC	Nonmonetary Determinations (PEUC)
ETA 207 Regular	Nonmonetary Determinations-Regular
ETA 207 Extended Benefits (EB)	Nonmonetary Determinations-Extended Benefits
ETA 218 Regular	Monetary Determinations and Benefit Years/Duration Regular
ETA 218 Extended Benefits (EB)	Monetary Determinations and Benefit Years/Duration Regular
ETA 5159 Extended Benefits (EB)	Claims and Payment Activities Extended Benefits
ETA 902 PUA (Pandemic Unemployment Assistance program)	Disaster Unemployment Assistance for the PUA program
ETA 227 PEUC	Overpayments Causes, Methods of Detection, Recovery/Reconciliation, Criminal/Civil Actions and Benefit Aging (PEUC)
ETA 227 Regular	Overpayments Causes, Methods of Detection, Recovery/Reconciliation, Criminal/Civil Actions and Benefit Aging Regular
ETA 227 MEUC (Multi-wage Earner Unemployment Assistance)	Overpayments Causes, Methods of Detection, Recovery/Reconciliation, Criminal/Civil Actions and Benefit Aging
ETA 902 MEUC	DUA MEUC
ETA 227 (FPUC) (Federal Pandemic Unemployment Assistance)	Overpayments Causes, Methods of Detection, Recovery/Reconciliation,

Major Deliverables/ Reports	Deliverable Description
	Criminal/Civil Actions and Benefit Aging (FPUC)
ETA 191 Regular (Page 1)	STATEMENT OF EXPENDITURES & FINANCIAL ADJUSTMENTS OF FEDERAL FUNDS FOR UCFE-UCX Page 1
ETA 191 Regular (Page 2)	STATEMENT OF EXPENDITURES & FINANCIAL ADJUSTMENTS OF FEDERAL FUNDS FOR UCFE-UCX Page 2
ETA 538 Regular	Advance Initial and Continued Claims
ETA 9050 Regular	Time Lapse for All First Payments Except Workshare
ETA 9050 Partial (Except Workshare)	TIME LAPSE OF PARTIAL/PART TOTAL FIRST PAYMENTS
ETA 9050 Workshare	FIRST PAYMENT TIME LAPSE (WORKSHARE)
ETA 9052 Regular	Nonmonetary Determination Time Lapse, Detection Date
ETA 9051 Regular	Continued Weeks Compensated Time Lapse
ETA 9051 Partial (Except Workshare)	Continued Weeks Compensated Time Lapse, Partial Excluding Workshare
ETA 9051 Workshare	Continued Weeks Compensated Time Lapse, Workshare
ETA 203 Regular	Characteristics of the Insured Unemployed
ETA 9054 (Lower Authority)	Lower Authority Appeals Time Lapse
ETA 9055 Lower Authority	Lower Authority Appeals Case Aging
ETA 9016 Regular	Alien Claims Activities
ETA 586 Regular	Interstate Arrangement for Combining Employment and Wages
ETA 9128 Regular	Reemployment Services and Eligibility Assessment Outcome
ETA 9129 Regular	Reemployment Services and Eligibility Assessment Outcome
ETA 9049 Regular	Worker Profiling and Reemployment Services Outcomes
ETA 539 Regular	Claims and Payment Activities
Populations 1, 2, 3/3a, 4, 5, 6 ,8, 10, 12, 13, 14, 15	USDOL Validation Samples

Major Deliverables/ Reports	Deliverable Description
Transition to Operations - Operations Training	Transition of Product Owner Responsibility/Ownership for USDOL Reporting & Validations/Issue Resolution
Transition to Operations - Creation & Execution of Report Shutdown Plan  (Reports will continue to be shut down in the System after project is closed)	Communications, User Transitions to data warehouse/Tableau, reports batch shutdown, pre/post benefit measurements.

**F. Major Milestones**

Please See D. Key Dates

**G. Key Stakeholders**

Key Stakeholder	Project Interest
Dane Eagle	Secretary, Department of Economic Opportunity
Adrienne Johnston	Deputy Secretary, Division of Workforce Services
Domenic DiLullo	Chief Technology Officer
Ed Wynn	Chief Information Officer
Allyce Moriak	Chief Financial Officer
Wendy Castle	RA Modernization Program Owner - Business
Paul Forrester	RA Modernization Program Owner – Information Technology
Nicole Sanislow	RA Modernization Program Manager - Business
Tom Richardson	RA Modernization Program Manager – Strategic Planning Office
Garrick Wright	RA Modernization Program Manager – Information Technology
Matt Mask	Project Owner
Linda Lawler	Project Manager
USDOL	Represents the Federal Unemployment Program

**H. Significant Project Assumptions and Constraints**

**Project Assumptions**

1. The RAD team will continue to be the production support team for ETA Reports after the project is closed.
2. The Project Team will not be needed as reports are being shut down in the System.

### Project Constraints

1. RA and the PM continue to answer questions for the USDOL to gain approval for USDOL State System changes to allow the Q4 2021 ETA 227 Regular Quarterly Report to be submitted from the data warehouse.

## II. Work Breakdown Structure

### III.

WBS	Task Name
<b>1</b>	<b>Reporting</b>
<b>1.2</b>	<b>Initiation</b>
<b>1.2.1</b>	<b>Risk and Complexity Assessment</b>
<b>1.2.2</b>	<b>Deliverable: Project Charter</b>
1.2.3	Project Charter complete
<b>1.2.4</b>	<b>Project Kickoff Meeting</b>

1.3.9	Deliverable: Project Spending Plan
<b>1.3.11</b>	<b>Requirements:</b>
1.3.12	Complete the Planning Gate R&C Assessment
1.3.14	Planning Phase complete
<b>1.4</b>	<b>Execution</b>
<b>1.3.1</b>	<b>Product Deliverables - Reporting</b>
1.5	Execution Phase complete
<b>1.6</b>	<b>Monitoring and Controlling</b>
1.6.1	Manage Project Schedule
1.6.2	Manage Project Costs
1.6.3	Manage Project Scope
1.6.4	Manage Project Risks
1.6.5	Manage Project Issues
1.6.6	Manage Decisions
1.6.7	Manage Action Items

WBS	Task Name
1.6.10	Record Lessons Learned
1.6.11	Prepare Regularly scheduled Status Reports
1.6.12	Conduct Regularly scheduled Status Meetings
1.7	Monitoring and Controlling Phase Complete
<b>1.8</b>	<b>Project Closeout</b>
<b>1.7.1</b>	<b>Transition to Operations (RA-IT AppDev Onboarding, Checklists, and Training)</b>
1.8.1	Schedule Project Closeout Meeting
<b>1.8.2</b>	<b>Deliverable: Project Closeout Report</b>
1.8.3	Project Closeout Report complete
1.8.5	Conduct Project Closeout meeting
1.9	Closeout Phase complete

#### ***IV. Resource Loaded Project Schedule***

The Reporting project was already in progress before the RA Modernization program was established. The project team used DEO’s Agile development methodology approach for deliverables instead of the waterfall methodology required by the RA Modernization program. Therefore, a resource loaded project schedule is not available for this project.

The Project Team consists of 4 full time Data Architect contractors, 1 Business Analyst, a part time QA Tester, a part time Architect Lead contractor, a part time DBA contractor and a part time Project Manager/QA Tester.

Since the Reporting project was driven using Agile Methodology, here is how the schedule and resource assignments were created:

1. The BA wrote a requirements manual for each report in scope prior to turning it over for development. This was done outside of the sprint per the DEO prescribed application development process. Unlike the waterfall methodology, once a requirements manual was approved the developers could schedule the report for development and delivery as soon as possible. The customer receives value from the work much sooner than with the waterfall method which doesn’t deliver value until the end of the project. (39 reports)
2. The team reviewed the report requirements manual and during product backlog grooming broke the report work down into 2-week sprints—as many as were needed to complete the report/deliverable.
3. Before every sprint, the team held a sprint planning session (up to 2-hours per week of sprint) to “task out” the work and estimate the time needed for development within the 2-week sprint.

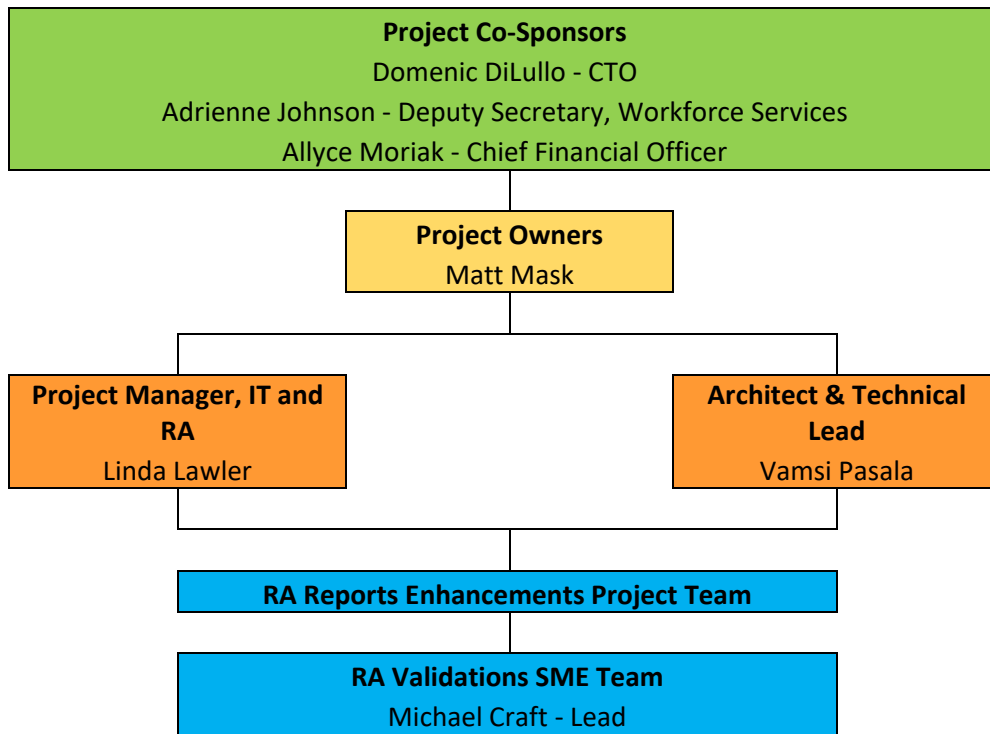

4. The PM would check the teams “scrum board” to track progress and would work with the scrum master to keep tabs on team progress and for regular status reporting. The Agile methodology prevents the PM from meeting with the team because it draws focus away from the work at hand. The PM holds the team accountable through the scrum master.
5. The cycle of BA requirements gathering, to completion of report deliverables, continues until all reports are complete and any remaining post implementation clean-up/documentation deliverables are delivered.
6. Since requirements, planning, development, testing, and implementation were tasks and not project phases, for this reason, it was not possible to create a resource loaded project schedule, especially after many of the deliverables were already turned over to the customer.
7. One final note, the Agile methodology does not emphasize hours as a measure of value since hours can be expended without any value being provided to the customer. Instead, the focus is on what the customer determines adds value, and by delivering that value quickly so the return on investment can be captured as soon as possible—not at the end of the project.
8. The project duration *for the team* consists of approximately 40 sprints ending October 31, 2022. The duration of the entire project is scheduled to end in December 2022 with the remaining 2 months of duration used to shut down report batches in the Connect application (operational work, not project team) and complete project closure activities.

### ***V. Project Spending Plan***

Since the 13-Reporting project started before RA Modernization, project spend was tracked by IT management, not by the PM. Project spend was part of the RA-IT budget.

**VI. Project Organization and Methodology**

**A. Project Organizational Chart**

**B. Project Roles and Responsibilities**

Role	Responsibilities
Project Sponsors: Adrienne Johnston  Domenic DiLullo  Allyce Moriak	<ul style="list-style-type: none"> <li>• Secures spending authority</li> <li>• Ensures sustained buy-in from senior management and executive leadership</li> <li>• Monitors project progress and assumes all project/program risk</li> <li>• Removes barriers and assists in resolving escalated conflicts</li> <li>• Ensures project benefits are realized and risks are appropriately addressed</li> </ul>
Project Owner: Matthew Mask	<ul style="list-style-type: none"> <li>• Represents the interests of the stakeholders to the DW Team</li> <li>• Monitors project progress</li> <li>• Approves project definition</li> <li>• Approves plans and schedules</li> <li>• Validates project deliverables meet expectations</li> <li>• Tracks project benefit recognition, risk retention and mitigation activities</li> </ul>

	<ul style="list-style-type: none"> <li>• Acts as liaison between teams and Management for issue escalation and resolution</li> </ul>
Lead Project Manager: Linda Lawler	<ul style="list-style-type: none"> <li>• Ensures project team completes project on time and within budget</li> <li>• Develops project artifacts as required by the State of Florida</li> <li>• Monitors performance of project tasks</li> <li>• Secures and documents acceptance of project deliverables</li> <li>• Communicates project status</li> <li>• Resolves issues and/or escalates issues as necessary with Project Owner(s)</li> <li>• Controls project scope and acquires necessary approvals for changes</li> <li>• Integrates partner business unit's work efforts within the project</li> </ul>
Architect and Technical Lead: Vamsi Pasala	<ul style="list-style-type: none"> <li>• Responsible for assisting the team in finding solutions to issues elevated to him</li> <li>• Is available to project sponsors for technical questions regarding direction of the project and any dependencies/impacts of other projects</li> <li>• Assists the PM in coordinating additional technical resources/SMEs if necessary, for the team.</li> </ul>
RA Validations Lead: Michael Craft	<ul style="list-style-type: none"> <li>• Works with the PM to provide appropriate skilled resources for validating ETA reports</li> <li>• Reviews and approves report requirements with the BA and RA staff before report development begins</li> <li>• Provides access to staff members who enter ETA reports into the USDOL system for requirements</li> <li>• Attends report demonstrations when scheduled</li> <li>• Provides staff for RA User Acceptance Testing of reports.</li> </ul>

### C. Project Management Methodology

DEO will use a project management methodology in compliance with project management standard rule 60GG-2 F.A.C., project requirements and DEO experience with similar engagements. Predictability, accountability, and flexibility are key elements that must be embraced by the overall project management approach to ensure DEO's satisfaction and project success. Successful project management must include active and visible leadership, multiple controls and checkpoints with measurable outcomes, and engagement with all stakeholders. DEO believes strong project management is critical throughout the life of any successful project.

For this project, DEO's project management will include the following specific elements, in addition to our standard methodology:

- The project manager and technical lead will advise leadership on areas of concern and will propose solutions to mitigate risk.
- In the case where additional time is needed for a task that exceeds an additional sprint (2-weeks), the project manager will inform the technical lead and review possible alternatives before elevating to the Deputy CIO and project sponsors.
- The project manager will report progress in Weekly RA-IT PMO Project status meetings (Tuesdays at 3PM). This keeps other RA-IT project managers aware of possible resource sharing (SMEs) contention and project/operational work dependencies (batch processing, environments, etc.)
- DEO's project management approach will utilize the technical skills, tools, and techniques needed to succeed, as well as the dedication to accountability, resource commitment, and organizational focus. Project success will be the result of active communication among all individuals, understanding everyone's role in the project, and clear delineation of responsibilities.

DEO believes successful project management hinges on the following:

- Clearly established project goals and requirements
- Ongoing assessment of quality against established standards
- Constant measurement of success against established deliverables and milestones
- Personal presence and commitment of key project leadership
- Proactive identification and communication of risks and issues

## ***VII. Business Process Organizational Change Management Plan***

While an Organizational Change Manager has not been assigned to this project, the project manager routinely discusses business process changes with project sponsors since changes introduced by this project are limited to their business units. Changes to business process are usually developed by or with these resources.

Communications are sent as each report is transitioned from the System to the Data Warehouse, and project owners and sponsors are responsible for authorizing the addition or removal of staff regarding report access based on the staff member's assigned role and business unit.

Also, for external stakeholders, such as USDOL, the project team is not authorized to speak directly to them. Communications are handled by RA managers and RA executive management.

For changes that cause the removal of operational tasks, such as the retirement of report batches in the System, meetings are planned toward the end of the project to determine the best way to achieve this goal. Technology changes have an established change

management process that also serves to communicate proposed changes to all areas that could be impacted. Batch changes will be submitted using this established process.

***VIII. Project Risk Management Plan***

Risk Description/Impact	Probability of Occurrence (high, medium, low)	Risk Tolerance (high, medium, low)	Mitigation Strategy	Assigned Owner
1. Introduction of report changes by USDOL	Medium	High	Review USDOL UIPL with RA to determine if more than 1 sprint of additional work is required. If so, submit a change request to project sponsor for approval	PM, RA Lead
2. RA resources pulled due to a FEMA DUA	Low	Medium	The Reports Project Team will continue to develop reports if approved SRRs are available. RA validation process will be put on hold until resources are available	PM, RA Lead

***IX. Capacity Plan***

The 13-Reporting project was grandfathered into the RA Modernization program when it was approximately 50% complete. Therefore, capacity planning was already complete before the program started. Also, the resources on the team were 100% committed to the reporting project before being grandfathered into the RA Modernization program.

## SECTION 1 — OVERALL PROJECT PLAN

### I. Project Charter

The Master Data Management project establishes a solid architectural basis in support the continuous modernization by creating a Department data catalog and data dictionary to identify data elements and interoperability across business units and other departments. The development and deployment of APIs to an enterprise API management platform will be addressed as part of the continuous modernization of the Reemployment Assistance Claims and Benefits Information System (System).

#### Scope Statement

- Create a Department data catalog and data dictionary of data elements interoperability
- Develop and deploy of APIs to an enterprise API management platform

#### MDM Scope Changes as per CR#0008

- There are no changes to scope as per CR#0008

#### MDM Scope Changes as per CR#0010

- Design Develop and Deploy of API's will be part of the continuous modernization of the Reemployment Assistance Claims and Benefits Information System (System). API will be dropped from the current scope and there will be limited testing of the system.

### A. Project Objectives and Business Benefits

Project Objective	Business Benefit
Catalog of data elements for interoperability	The ability to map to databases that will later be linked by APIs to exchange information
Develop and deploy API's an enterprise API management platform	The API's will allow the exchange of data between databases for increased collaboration and knowledge sharing.

### B. Critical Success Factors

- Completed data catalog and data dictionary of databases that will be linked by APIs
- Implementation and testing to successfully link databases via APIs that were identified during the mapping process.

### C. Key Dates

Key Date	Importance and Relevance to the Project
March 11, 2022	2022 Session ends
May 7, 2022	Initiation phase completed
June 30, 2022	Requirements
June 30, 2022	PMP & Resource Plan
July 24, 2022	Project Schedule
July 29, 2022	Change request submitted to CCB for approval
August 2, 2022	Change request Approved

Key Date	Importance and Relevance to the Project
September 21, 2022	Test Plans
September 22, 2022	Planning phase Completed
September 26, 2022	Execution phase Started
Nov 7, 2022	Procurement Advertisement Date

#### D. Major Deliverables

Major Deliverable	Deliverable Description
Build catalog of databases	Validated catalog of databases to be linked
Build dictionary of databases	Validated dictionary of databases to be linked
As-Is Working Sessions	Conduct on-site working sessions with subject matter experts, as identified by DEO, to go over Business requirements.
Requirements Traceability Matrix	Document, validate, and verify functional and technical requirements.
Project Management Plan	Complete and submit a detailed project management plan to DEO.
Potential Benefit Analysis	Develop and provide DEO with a quantitative analysis of potential benefits from re-engineered business processes and technical functional and non-functional requirements.
Procurement of MDM Tool	Procure, install, configure, and test toolset. Effort in coordination with the SSI project and Contract Manager.
Requirements Management Plan	Update the previously developed As-Is business process requirements with greater details.

#### E. Major Milestones

Major Milestone	Milestone Description
Initiation Phase Complete	Complete
Planning Phase Complete	Complete
Execution Phase Complete	In-progress
Closing Phase Complete	Pending

#### F. Key Stakeholders

Key Stakeholder	Project Interest
Dane Eagle	Secretary, Department of Economic Opportunity
Domenic DiLullo	Chief Technology Officer
Adrienne Johnston	Deputy Secretary, Division of Workforce Services
Allyce Moriak	Chief Financial Officer
Wendy Castle	Program Owner
Paul Forrester	Program Owner
Thomas Richardson	Program Manager – Strategic Planning Office
Garrick Wright	Program Manager – Information Technology

Nicole Sanislow	Program Manager - Business
Alvin Sellars	Project Sponsor
Quinton Lightfoot	Technical Lead
Vamsi Pasala	Technical Architect
Prathamesh Hankare	IT Technical SME
Benjamin Beha	Business SME
William Brito	Developer

## G. Significant Project Assumptions and Constraints

### Project Assumptions

1. All identified funding is available.
2. The identified System requirements are correct and complete.
3. All the people involved at the beginning of the project will remain working on the project until the project is completed.
4. Members of the project team will have access to the necessary tools, hardware, and materials necessary to complete the identified tasks.
5. All relevant stakeholders will attend required status meetings. However, there may be instances where some stakeholders are unavailable to attend.
6. The project sponsor will be responsive and prepared to make decisions regarding the project cost, scope, and schedule.
7. SSI Vendor will recommend and help procure the necessary tool.
8. Personnel with sufficient expertise will be on-boarded and allocated to the execution of this project.
9. The vendor will successfully install, configure, and test the MDM solution within the available timeframe for the project.

### Project Constraints

1. Delays in the SSI vendor fulfilling the contractual requirement to provide technical requirements needed by this project could delay this project.

## II. Work Breakdown Structure

WBS	Task Name
<b>1</b>	<b>Master Data Management</b>
<b>1.1</b>	<b>Initiation</b>
1.1.3.1	<b>Master Data Management</b>
1.1.3.2	Initiate a review of the current Master Data Management
1.1.3.3	Review and Approve Final Proposal for Master Data Management
1.1.4.2	Decide on Development timeline
<b>1.3</b>	<b>Determine Staff Aug Resources</b>
1.3.1	<b>Planning</b>
<b>1.3.3</b>	Determine the mapping strategy of MDM
<b>1.4</b>	<b>Procure Staff Aug Resources</b>
<b>1.4.2</b>	<b>Execution</b>

1.4.2.2	Catalog all Databases
1.4.2.3	Dictionary all Databases
1.4.2.4	Install & Configure MDM Tool.
1.4.2.5	Load and Test the new Tool
1.4.4.1	<b>Testing Master Data Management</b>
1.4.4.2	Implement Testing of the databases to confirm that the data is successfully passing.

**III. Resource Loaded Project Schedule – Adjusted for CR#0010, dependent on procurement of MDM tool.**

ID	% Complete	Task Mode	Task Name	Duration	Start	Finish	Predecessors

<b>SSI Vendor</b>	SSI Vendor	<p>The MDM layer project is dependent on the procurement of an MDM development tool, which will be facilitated by the SSI project vendor. The project will work closely with the SSI vendor to support management and the technical team in the determination of the best MDM tool. The SSI vendor is responsible for performing integration services in which the Contractor provides analysis, oversight, monitoring, testing, and assumes the responsibilities for the foundational technical platform and systems and software integration services.</p> <ul style="list-style-type: none"> <li>• Contractor shall provide DEO with recommendations for technology selection.</li> <li>• Contractor shall provide DEO with recommendations in accordance with architectural standards identified in section 2.6.</li> <li>• Contractor shall assist DEO with drafting the scope of work and deliverables for procurement.</li> <li>• The scope of work and deliverables must be based on requirements of this contract.</li> <li>• Contractor shall assist DEO in evaluating vendor responses for all procurement.</li> </ul>

### C. Project Management Methodology

DEO will use a project management methodology in compliance with project management standard rule 60GG-2 F.A.C., project requirements and department experience with similar engagements. Predictability, accountability, and flexibility are key elements that must be embraced by the overall project management approach to ensure DEO’s satisfaction and project success. Successful project management must include active and visible leadership, multiple controls and checkpoints with measurable outcomes, and engagement with all stakeholders. DEO believes strong project management is critical throughout the life of any successful project.

For this project, DEO’s project management will include the following specific elements, in addition to our standard methodology:

- The project management team will advise leadership on areas of concern and will propose solutions to mitigate risk.

- Vendors will respond to inquiries or requests from DEO within one business day from receipt.
- In the case where additional time is needed for a task, vendors will provide an estimate, which must be approved by the DEO Project Manager.
- At the end of the contract, vendors will provide final copies of all reports in electronic format for archive purposes.

DEO's project management approach will utilize the technical skills, tools, and techniques needed to succeed, as well as the dedication to accountability, resource commitment, and organizational focus. Project success will be the result of active communication among all individuals, understanding everyone's role in the project, and clear delineation of responsibilities.

DEO believes successful project management hinges on the following:

- Clearly established project goals and requirements
- Ongoing assessment of quality against established standards
- Constant measurement of success against established deliverables and milestones
- Personal presence and commitment of key project leadership
- Proactive identification and communication of risks and issues

## Quality Assurance

DEO will follow a rigid quality assurance process. The project will follow these processes and procedures to ensure the highest level of execution.

**Quality Management.** The Strategic Planning Office's primary responsibility is to provide oversight and ensure DEO objectives are met by meeting regularly with project managers and department leadership.

The Project Manager is responsible for understanding project requirements and DEO expectations. A preliminary internal project meeting is held near the start of each project with all stakeholders. This meeting will include a discussion(s) of task assignments to clarify the scope of work and how it will be accomplished. The following quality management activities will be completed for each project:

- **Internal Kickoff Meeting** – Prior to project commencement, the Project Manager will ensure all team members understand the project's requirements, scope, and quality control processes. This meeting includes a discussion of task assignments to clarify the scope of work and how it will be accomplished. This awareness is maintained throughout the duration of the project with ongoing and as necessary project team meetings.
- **Sponsor Checkpoints** – Each Project Manager will schedule regular contact with the Project Sponsor. This allows the Project Manager to voice their perspective on assignment progress and communicate any relevant risks, action items, issues or decisions made or encountered during the project.
- **Deliverable Reviews** – Prior to submission to DEO, all vendors' deliverables are required to first undergo a thorough review. This review includes technical editing, validation, clarity, and ensuring conformance to DEO standards and expectations.

## Communication Management Plan

Communication management seeks to provide a comprehensive framework for all communication necessary to keep stakeholders informed about the project’s direction and status. The project communication plan is to clearly identify the status of compliance efforts and to communicate the progress made in achieving a successful project outcome. The purpose of this plan is to communicate pertinent information related to discovery, design, and documentation in a clear and concise manner to the client, stakeholders, and the project team.

### Communication Plan

The communication plan is designed to provide the right information, at the right level, to the right audience, at the right time. The plan addresses key audiences, messages, frequency, and methods of communication.

This plan, depicted in Table 1 below, describes the various forms of communication, appropriate channels of communication, and target audiences for this project. The communication matrix identifies the different tools that will be used to guide the planning for communication about the project to various audiences and purposes. It should be considered a general guide for the effective dissemination of information that is received, understood, and utilized by the target audiences for successful completion of the project. This communication matrix will be customized for each project to reflect the various communication forms, frequencies, and audiences that will actually be used during the course of the project and to ensure communication channels are properly maintained throughout the project and updated if communication needs to change.

**Table 1: Project Communication Matrix**

Item	Purpose	Format	Frequency	Type	Initiator	Recipient(s)	Feedback
Status Reports	Provide detailed information on the progress of the project against the plan	Email	Bi-Weekly	Mandatory	Project Manager	Executive Sponsor, CIO, SPO, Functional Lead, Technical Lead, Project Team	Verbal and follow-up email
Status Meetings	Review the status report, resolve issues, and make decisions	Meeting	Bi-Weekly	Mandatory	Project Manager	Project Team	Verbal and follow-up email
Project Deliverables	Provide deliverables to stakeholders for review	Email	Per project schedule	Mandatory	Project Manager	Technical Lead, Functional Lead, Project Team	Written vetted, consolidated, and actionable comments

Item	Purpose	Format	Frequency	Type	Initiator	Recipient(s)	Feedback
Deliverable Review Feedback	Provide vetted, consolidated, and actionable written comments	Email	Per project schedule	Mandatory	Project Manager	Technical Lead, Functional Lead, Project Team	Written /email follow-up using Deliverable Review Comment Form
Deliverable Review Meetings	Confirm mutual understanding of desired deliverable changes	Meeting	As needed	Informational	Project Manager	Technical Lead, Functional Lead, Project Team	Verbal or written
Work Sessions	Gather information from subject matter experts	Meeting	Per project schedule	Mandatory	Project Manager	Project Team, Subject Matter Experts	Verbal and follow-up email
Work Session Follow-Up	To answer questions or clarify information gathered	Email	As needed	Informational	Project Manager	Project Team, Subject Matter Experts	Verbal or email follow-up
Project issues	Documentation of project issues	Email	As needed	Mandatory	Any Stakeholder	Project Manager	Written/email follow-up
Project issues escalation	To resolve project issues	Email	As needed	Mandatory	Project Manager	Executive Sponsor, CIO, Functional Lead, Technical Lead	Written/email follow-up
Change requests	Document project changes to scope of work	Email	As needed	Mandatory	Project Manager	Executive Sponsor, CIO, Functional Lead, Technical Lead	Written/email follow-up
Project closeout and lessons learned	Formal project closeout meeting	Email	Per project schedule	Mandatory	Project Manager	Functional Lead, Technical Lead, Project Team	Written/email follow-up

## Bi-Weekly Status Reporting

Vendors will be required to submit status reports throughout the project at several levels. The primary source of status information is the bi-weekly written status report, which will communicate at minimum, the following information.

- **Project Status.** This section depicts the project status at a summary level using a red/yellow/green method supported by two to three essential questions that are answered to determine summary status. The red/yellow/green method is not meant to be a grading system but instead it is a way to easily identify the areas of the project that need the most attention in order to make the project successful.
- **Overview of Project Progress.** This section describes significant accomplishments achieved in the reporting period.
- **Overall Status.** This section provides a high-level overview of whether the project is on schedule, on budget, and on scope. A yellow or red status should be explained here in detail.
- **Project Milestones, Deliverables, and Latest Tasks.** This section contains the major deliverables of the project, their planned and actual completion dates, and their status.
- **Risks, Action Items, Issues, and Decisions.** This section will link to the project risk, action item, issue, and decision tracking tool. The project tracking tool contains all items tracked during the project.

## Project Tracking

This section describes the “RAID” methodology for tracking risks, action items, issues, and decisions. DEO will follow a centralized approach that minimizes miscommunication or misinformation among project stakeholders. The Department will diligently maintain a project tracking log for each project, and a master log for RA Benefits System Modernization project overall, a Microsoft Excel workbook with multiple tabs intended to capture the details and the latest attributes of items tracked by Project Managers.

## Risk Management

Risks are characteristics, circumstances, or features of the environment that may have an adverse effect on the project or the quality of the work products. The risk management plan outlines the process to identify and analyze the effects of uncertainties on the project. This plan establishes a framework of working practices, which enables project team members to identify, analyze, respond to, monitor, and communicate risks before they become issues and jeopardize the success of the project. If a risk becomes an issue, DEO will work with the involved stakeholders to assess its impact on the project and assign responsibility for issue resolution, including a target date for closure.

Risks will be managed in the following manner:

- During status meetings, any stakeholder can raise a risk for discussion.
- The Project team will discuss the risk and determine if it warrants being monitored in the risk log.
- The project manager will enter the item in the risk log.

- The team will discuss mitigation strategies and assign who will own the risk item.
- At each subsequent status meeting, the risk(s) will be reviewed until the risk(s) can be closed.

### **Action Items**

Action items are unplanned tasks that occur during a project that are too small to be added to the schedule. These items must be within the scope of the project and are often tasks that support scheduled tasks, issue resolution, risk management, or some other aspect of the project. The action item log is created and maintained as part of the project tracking log.

Action items will be managed in the following manner:

- During status meetings, any stakeholder can raise an action item for discussion.
- The Project team will discuss the action item and determine if it warrants being monitored in the action item log.
- The project manager will enter the item in the log.
- The team will set the priority for the action item (high/medium/low), assign an action item owner, and set a planned completion date.
- At each subsequent status meeting, the action item(s) will be reviewed until they can be closed.

### **Issue Management**

An issue is defined as a current situation or event that must be resolved to avoid adverse impact to the project. Issues can originate from a risk that has materialized. DEO will document all issues that are brought up in meetings.

When issues arise, they need to be resolved in a disciplined manner in order to maintain the quality of the work products and control the schedule and costs. The issue resolution process verifies differences, questions, and unplanned requests are defined properly, escalated for management attention, and resolved quickly and efficiently.

The issue resolution process is intended to handle technical problems, requirements, or issues/conflicts, as well as to address process, organizational, and operational issues of the engagement.

Issues will be managed in the following manner:

- During status meetings, any stakeholder can raise a potential issue for discussion.
- The Project team will discuss the potential issue and determine if the item is indeed an issue.
- If the team determines the item is an issue, the project manager will enter it in the issue log.
- The team will discuss resolution steps, assign who will own the issue item, and set a target date for resolution.
- At each subsequent status meeting, the issue(s) will be reviewed until they can be closed.

## Decisions

Decisions are leadership answers to questions that arise during the project. The decision log is created and maintained as part of the project tracking log.

Decisions will be managed in the following manner:

- During status meetings, any stakeholder can raise a question that requires a decision.
- If the team determines a decision needs to be made, the project manager will enter it in the decision log.
- The team will discuss the impact to the project, assign a decision maker, and set a date for when the decision is needed.
- At each subsequent status meeting, the decision item(s) will be reviewed until they can be closed.

## Change Control

It is possible that the project will encounter some degree of scope or schedule change. Change control ensures that all requests for change are considered in light of the project goals and objectives and are prioritized accordingly.

The project team will employ strict control over project scope changes throughout the life of the project. The change control process will empower the project sponsor to review, decline, postpone, or authorize and prioritize requests for change. Requested changes are evaluated and a determination made on how it impacts scope, time, and cost. If there are impacts to overall project cost or final project delivery date, a formal change order will be initiated. All other changes will be handled using the project change control process.

The change control log is used to track all change requests during the project. As a change request is submitted, the change control log will be updated with a description and ongoing progress updates until a final resolution is determined.

Changes will be managed in the following manner:

- During status meetings, any stakeholder can raise a potential change to the project's scope, cost, and/or schedule.
- If the team determines a change needs to be made, the project manager will enter it in the change control log and create a formal change request.
- The team will prioritize the change, assign an owner and due date, and describe the impact to the project.
- At each subsequent status meeting, the change orders will be reviewed until they can be closed. No change order will be closed without agreement and sign-off from project sponsors.

## Schedule Management

Schedule management consists of the following three areas: schedule development, schedule administration, and schedule change control.

## Schedule Development

Schedule development is the process of taking the work breakdown structure (WBS) and breaking it down into activities and tasks that can be assigned and managed. Tasks that are dependent on others are linked. Work efforts and resources are assigned to each task. Once the draft is complete and correct, the schedule will be baselined so that any future changes can be tracked.

The project schedule is the definitive source of project activity, dates, and assignment information. A high-level schedule is provided below. Prior to project initiation, a resource-loaded Microsoft Project Schedule will be generated with milestones and task durations.

## Schedule Administration

The schedule will be kept up to date weekly. Task progress and percent completion will be input into the schedule. Variances between planned and actual progress will be managed with particular attention to the critical path. Each week the Project Manager will evaluate the baselined schedule against current progress, identifying the following at a minimum:

- Overdue tasks and computation of the percentage of late tasks related to total tasks to date (number of overdue tasks divided by number of total tasks).
- Overall task completion trending towards an overall project variance equal to or greater than 10%.

The Project Manager will communicate the variance explanation to the project's key stakeholders. This information will be used as input into the weekly status reporting. Any variance where the critical path is significantly behind will automatically result in a red status on the weekly status report.

Corrective actions will be developed as needed to resolve schedule variances. Schedule management techniques of crashing, fast-tracking, and compression will be considered as will other solutions like resource shifting or work rescheduling. Schedule forecasting will be used to look beyond the current status so that, to every extent possible, corrective actions can be applied before there are schedule variances.

## Schedule Changes

Once the schedule has been developed, approved, and baselined any significant changes will have to be approved through the change control process. All other schedule changes can be made at the discretion of project leadership and will be reported and discussed with the weekly status report.

## Procurement Management

The Procurement Management Plan seeks to outline how the project will procure resources necessary to complete the project objectives. It defines the procurement methodology for this project, lays out the process for managing procurement throughout the life of the project, and will be updated if project needs change. This plan identifies and defines the goods and services to be procured, the types of contracts to be used in support of this project, the contract approval process, and the decision criteria. The importance of coordinating the procurement activities, establishing

firm contract deliverables, and metrics in measuring procurement activities is included in the following subsections.

**Procurement Management Approach**

The DEO Purchasing Office and any vendors contracted for procurement assistance will provide oversight and management along with the Project Manager for all procurement activities under this project. The Project Manager will work with the project team to identify all items to be procured for the successful completion of the project. The Department Strategic Planning Office (SPO) will then review any procurement requests prior to approving the development of procurement documentation.

**Procurement Definition**

The following table will be completed to record any procurement goods and/or services determined to be essential for any RA Modernization project’s completion and success. The Project Manager and/or SPO must approve any procurement before inclusion in this table.

Procurement	Description	Justification	Needed By

**Cost Management**

The tables below will be completed and used to define and track project costs during each specific RA Modernization Project.

Cost Management Plan				
Category	Description	Frequency	Deliverable	Cost

Column	Definition
Category	Type of expense
Description	Description of expense
Frequency	Describe whether the expense is annual or recurring or a onetime expense
Deliverable	List the deliverable associated with the expense
Cost	List the total expense in dollars e.g. \$0.00

**Staffing Management**

The purpose of this section is to outline how the project is to manage staffing requirements and resource tasks appropriately. This project plans to procure additional staffing through “Staff Augmentation” contracts. The needs for each individual project have been estimated before the

project and will be refined during requirements gathering and procurement of services.

## **Quality Management**

Quality Management details the processes to ensure quality services and deliverables. DEO will use disciplined processes and inspections to confirm quality throughout the life of the project. These inspections are performed at key points in the creation and review of documents and confirmation of the value of services the Project Team provides. Quality Management includes two components, Deliverable Quality Control and Services Quality. The purpose of this section is to provide instructions on these processes. DEO commits to the highest quality in project execution and project team members' performance. To achieve a positive outcome, these processes will be carried out, so expectations are understood, aligned, and met.

## ***VI. Business Process Organizational Change Management Plan***

This project intends to improve the delivery, execution, security, or convenience of DEO's lines of business through the implementation of modern processes and tools based on industry best practices and frameworks.

The project team aims to maximize communication, engagement, adoption, and performance of these new processes, roles, and responsibilities through a combination of tools, templates, and techniques such as:

- Stakeholder identification and engagement plans
- Process identification and improvement plans
- Educational assessment and training plans
- Change risk assessment
- Change Advocate networks
- Change Management
- Business Relationship Management
- IT Service Management

**VII. Project Risk Management Plan**

Identified in above Project Management Approach section.

Risk Description/Impact	Probability of Occurrence (high, medium, low)	Risk Tolerance (high, medium, low)	Mitigation Strategy	Assigned Owner
Hurricane impacting the state delays the schedule	Low	High	Adjust schedule accordingly	PM
Necessary tools, hardware, or materials need to be procured for the successful completion of the project.	Medium	Medium	Identify needs early on and involve management and budget staff throughout engagement	PM
Insufficient knowledge transfer of new process	Medium	Medium	Involve impacted staff throughout engagement to increase participation and knowledge of new processes	PM
RSK0001154	High	High	Work with contracts team to develop the SOW.	Vendor/PM

**VIII. Capacity Plan**

This project does not involve the purchase/lease, configuration, and installation of significant computer hardware. For purposes of capacity planning, computer hardware includes servers, storage, and network infrastructure. Accordingly, a Capacity Plan is not required. Once the claim volume starts to go down as the claims volume decreases, capacity can be reduced. Also moving to an auto-scaling configuration will additionally reduce needed capacity.

## SECTION 1 – OVERALL PROJECT PLAN

### I. Project Charter

#### A. Scope Statement

The Archive & Purge Project Team will determine the state and federal criteria for purging Reemployment Assistance data that can be purged in the Reemployment Assistance Claims and Benefits Information System (System); establish archival storage; archive and purge database storage; and archive and purge file storage. Phase 2: Tool Selection and Installation for the project must be completed by June 30, 2023.

#### B. Project Objectives and Business Benefits

Since the System went live in 2013, its relational database has been growing exponentially. It is estimated that upwards of 80% of the monthly generated data stored is replicated and is not being used, and that copies of these large volumes of data continue to consume more and more space. The consumption of space and an absence of an archival and purge process has degraded System performance and increased batch processing windows and operational and maintenance costs.

The success of the Department’s archival and purge process is dependent on improvements to the System’s data management and operational schema. The data contained in that schema is data vital to the operation of the System; however, some of this data can be archived. This initiative identifies which data should no longer reside in the operational schema of the production database and moves it into an archival schema. The archival schema contains data that has been classified as ‘archivable’ and is typically hosted on a slower drive (lower-tier, and thus cheaper). Eventually, the data in the archival schema is reviewed by data owners to determine what data is ready to be purged from the System.

Project Objective	Business Benefit
Stabilize the growth of stored data on the online transactional processing environment, i.e., reduce the size.	<ul style="list-style-type: none"> <li>• Improved System performance (data access) and stability</li> <li>• Shorter batch windows</li> <li>• Less RTO = Recovery-Time-Objective, RPO = Recovery Point Objective, i.e., less to recover</li> </ul>
Less tier 1 storage required	<ul style="list-style-type: none"> <li>• Reduced storage costs due to cheaper archival storage</li> </ul>
Fewer maintenance costs (no need to maintain multiple copies for reporting purposes)	<ul style="list-style-type: none"> <li>• Less data to maintain</li> </ul>

#### C. Critical Success Factors

- No less than a 30% reduction in Tier 1 storage (6 Terabyte reduction)
- Creation and population of archival storage
- Elimination of duplicate file shares
- Reduction in batch windows
- Compliance with state and federal laws for storing information

### D. Key Dates

Key Date	Importance and Relevance to the Project
06/10/22	Project Charter Completed
06/23/22	Initiation Risk Assessment Completed
07/07/22	Project Kick-Off
11/18/22	Stakeholder Registry Completed
11/18/22	Resource Plan Completed
11/25/22	Project Schedule Completed
11/25/22	Project Management Plan Completed
12/30/22	Project Budget Completed
12/30/22	Project Spending Plan Completed
12/30/22	Tool Request for Information Completed
01/27/23	Tool/Vendor Selection Completed
03/31/23	Procurement of Tool Completed
06/30/23	Tool Installation Completed

### E. Major Deliverables

Major Deliverable	Deliverable Description
Reduced Operational Transactional Database	Transactional Benefit System Footprint reduced to 8 Terabytes
Archival File and Data Stores Completed	Tier 2 or below storage archive implemented
Elimination of duplicate databases	Single data source for reporting

### A. Major Milestones

Key Date	Importance and Relevance to the Project
06/10/22	Project Charter Completed
06/23/22	Initiation Risk Assessment Completed
07/07/22	Project Kick-Off
11/18/22	Stakeholder Registry Completed
11/18/22	Resource Plan Completed
11/25/22	Project Schedule Completed
11/25/22	Project Management Plan Completed
12/30/22	Project Budget Completed
12/30/22	Project Spending Plan Completed
12/30/22	Tool Request for Information Completed
01/27/23	Tool/Vendor Selection Completed
03/31/23	Procurement of Tool Completed
06/30/23	Tool Installation Completed

### B. Key Stakeholders

Key Stakeholder	Project Interest
Dane Eagle	Secretary, Department of Economic Opportunity
Adrienne Johnston	Deputy Secretary, Division of Workforce Services
Domenic DiLullo	Chief Technology Officer

Allyce Moriak	Chief Financial Officer
Wendy Castle	RA Modernization Program Owner - Business
Paul Forrester	RA Modernization Program Owner – Information Technology
Tom Richardson	RA Modernization Program Manager – Strategic Planning Office
Garrick Wright	RA Modernization Program Manager – Information Technology
Timothy Giesecke	Project Sponsor/Owner
Linda Lawler	Project Manager
USDOL	Represents the Federal Unemployment Program

### C. Significant Project Assumptions and Constraints

#### Project Assumptions

- Maintenance of Archive & Purge Processing will be transitioned to the Department’s Division of Information Technology once the project is complete.

#### Project Constraints

- Phase 1: Tool Selection and Installation must be completed by June 30, 2023.

## II. Work Breakdown Structure

## B. Project Roles and Responsibilities

Role	Responsibilities
Program Management Group	<ul style="list-style-type: none"> <li>• Secures spending authority</li> <li>• Ensures sustained buy-in from senior management and executive leadership</li> <li>• Monitors project progress</li> <li>• Removes barriers and assists in resolving escalated conflicts</li> <li>• Ensures project benefits are realized and risks and issues are appropriately addressed</li> </ul>
Project Owner Timothy Giesecke	<ul style="list-style-type: none"> <li>• Represents the interests of the stakeholders to the DW Team</li> <li>• Monitors project progress</li> <li>• Approves project definition</li> <li>• Approves plans and schedules</li> <li>• Validates project deliverables meet expectations</li> <li>• Tracks project benefit recognition, risk retention and mitigation activities</li> <li>• Acts as liaison between teams and Management for issue escalation and resolution</li> </ul>
Project Manager Linda Lawler	<ul style="list-style-type: none"> <li>• Ensures project team completes project on time and within budget</li> <li>• Develops project artifacts as required by the State of Florida</li> <li>• Monitors performance of project tasks</li> <li>• Secures and documents acceptance of project deliverables</li> <li>• Communicates project status</li> <li>• Resolves issues and/or escalates issues as necessary with Project Owner(s)</li> <li>• Controls project scope and acquires necessary approvals for changes</li> <li>• Integrates partner business unit's work efforts within the project</li> </ul>
Business Analyst Yella Mopuru	<ul style="list-style-type: none"> <li>• Works with the PM in business unit and IT meetings for requirements gathering</li> <li>• Assists the PM in the creation of the Requirements Traceability Matrix (RTM).</li> <li>• Writes the Requirements Document for the project.</li> </ul>
Enterprise Solution Architect Vamsi Pasala	<ul style="list-style-type: none"> <li>• Responsible for assisting the team(s) in coordinating the most appropriate solution for archiving and purging based on requirements collected.</li> <li>• Assists the team with identifying integration points with other projects and evaluating any risks.</li> <li>• Is available to executive management, the program team, and the project team for technical questions regarding</li> </ul>

	<p>direction of the project and any dependencies/impacts of other projects</p> <ul style="list-style-type: none"> <li>Assists the PM in coordinating additional technical resources/SMEs if necessary, for the team.</li> <li>Has historical knowledge of the Connect system since Go Live</li> </ul>
<p>Lead Database Administrator                  Anand Kothandan</p>	<ul style="list-style-type: none"> <li>Responsible for assisting the Enterprise Solution Architect in coordinating the most appropriate solution for archiving and purging based on requirements collected.</li> <li>Is available to executive management, the program team, and the project team for technical questions regarding direction of the project and any dependencies/impacts of other projects</li> <li>Assists the PM in coordinating additional technical resources/SMEs if necessary, for the team.</li> <li>Has years of historical knowledge of the Connect system</li> </ul>
<p>Records Management and                  General Counsel Liaison                  Karen Gates</p>	<ul style="list-style-type: none"> <li>Assists business units with requests for ruling and decisions on exceptions to records retention policy and appropriate state and federal laws.</li> <li>Provides written resolution results and next steps to business unit, PM and project team.</li> </ul>
<p>Business Unit Subject Matter                  Experts  <u><b>Appeals:</b></u>                  Jamie Dattoli                  MaryGordon Gavalas                  Alessandra Zupan                  Monica Jackson-Marcotte  <u><b>Adjudication:</b></u>                  Jonathan Hill                  Benny Collazo                  Sondra Timpson                  Aaron Arnold                  Nicholas Lent                  Alice McCartney  <u><b>RA Quality Management:</b></u>                  Nicole Sanislow  <u><b>Claims Processing:</b></u>                  El' Lise Bethel  <u><b>RA Operations:</b></u>                  Mark Miller                  Samantha Caban                  Robin Hess                  Rebecca Whittaker                  Brett Riley                  Dian Thompson</p>	<ul style="list-style-type: none"> <li>Provides project team with their business units' data inventory</li> <li>Participates in testing, validating, and approving the Archival and Purge processes per requirements</li> <li>Coordinates with the Records Management and General Counsel Liaison to obtain rulings on exceptions to purge requirements.</li> <li>Updates the project team on new inventory created during project progress</li> </ul>

IT Subject Matter Experts Becky Leckinger (Interfaces) Lewis Goode (Batch processing) Al Rehwinkel (Correspondence, 1099s) Barry Robinson (Release Management, Connect Environments) TBD – (FileNet)	<ul style="list-style-type: none"> <li>Provides insight into types of items being stored that might be useful to investigate for the purpose of archiving or purging.</li> </ul>
Purchasing Department Tina Peacock Greg Turrall	<ul style="list-style-type: none"> <li>Responsible for assisting the project team with tool selection if there is a “buy” decision.</li> </ul>

**C. Project Management Methodology**

The Archive and Purge project follows DEO’s Center of Excellence requirements for projects according to best practices found in the PMBOK v6.0.

**VI. Business Process Organizational Change Management Plan**

Currently there are no changes to business processes. Organizational Change Management will be revisited after the Build or Buy decision is made.

**VII. Project Risk Management Plan**

Risk Description/Impact	Probability of Occurrence (high, medium, low)	Risk Tolerance (high, medium, low)	Mitigation Strategy	Assigned Owner
1. Incomplete data dictionary will impact project schedule	High	Low	Move forward with project using existing records management schedules	Linda Lawler
2.				
3.				
4.				
5.				

**VIII. Capacity Plan**

Capacity will be determined once a decision has been made for a Tool.

## SECTION 1 — OVERALL PROJECT PLAN

### I. *Project Charter*

The Security Architecture Services project includes the assessment and guidance to secure the architecture, operation, and maintenance of the Reemployment Assistance Claims and Benefits Information System (System), including business and technological components supporting the System, in the context of existing and proposed application modernization efforts. Existing application modernization efforts include application and architectural modifications, migration to cloud infrastructure, updated application development and deployment processes (continuous vulnerability management, DevSecOps, continuous integration and continuous delivery (“CI/CD”) pipeline security, secure software development life cycle (SDLC), etc.), and implementation of identity and access management best practices.

#### A. Scope Statement

##### In Scope

- Procure services to assess, review, and consult on proposed application design, architecture, platform, tools, security controls, system hardening, access management, and secure development and operations practices. Services will produce documented guidance for implementation of controls, including a gap analysis, threat model, controls implementation road map, and skills analysis.
- Assessment of the security of the existing and proposed implementation of the Reemployment Assistance Claims and Benefits Information System
- Train staff, as necessary, to support execution of the roadmap.
- Execute roadmap/incorporate recommendations into DEO’s migration, modernization, and process improvement efforts.

##### Out of Scope

- Penetration testing of the DEO network.

#### B. Project Objectives and Business Benefits

Project Objective	Business Benefit
Improve Security	A more secure IT system that can withstand cyber-attacks that can halt DEO operations, erode customer trust, increase fraud, and expose DEO to negative publicity, lawsuits and fines.
Manage risk/risk reductions	Increases DEO’s ability to quickly identify and manage potential threats.
Avoid Cost	Incorporating the security requirements into the Reemployment Assistance Modernization Program (Program) will allow DEO to avoid expensive retrofitting to meet the recommended security requirements.

### C. Critical Success Factors

- Timely and high-quality achievement of major milestones/deliverables.
- Execution of the roadmap, recommendations into the Program.

### D. Key Dates

Key Date	Importance and Relevance to the Project
May 2022	Contract executed with Ernst & Young to perform Security Architecture Review services
June 2022	Change Request 006 approved – approving change in baseline for Security Architecture Review
October 2022	Project successfully completed

### E. Major Deliverables

Major Deliverable	Deliverable Description
Project Plan	Contractor shall complete and submit to DEO a detailed project plan.
Host Weekly Meetings	Contractor shall host weekly meetings with DEO.
Assessment of Security Controls Report	Contractor shall conduct, write, and submit a detailed assessment report of security controls to DEO.
Skills and Capabilities Assessment and Gap Analysis Report	Contractor shall conduct, write, and submit a detailed skills and capabilities assessment and gap analysis report to DEO.
Security Controls Implementation Roadmap Training and Capabilities Improvement Plan	Contractor shall complete and submit a security controls implementation roadmap to DEO.
Training and Capabilities Improvement Plan	Contractor shall complete and submit a detailed training and capabilities improvement plan to DEO.

### F. Major Milestones

Major Milestone	Milestone Description
Initiation Phase Complete	All initiation activities completed
Planning Phase Complete	Complete
Execution Phase Complete	Complete
Monitor and Controlling Phase Complete	Complete
Close Out Phase Complete	In progress

### G. Key Stakeholders

Key Stakeholder	Project Interest
Dane Eagle	Secretary, Department of Economic Opportunity

Adrienne Johnston	Deputy Secretary, Division of Workforce Services
Domenic DiLullo	Chief Technology Officer
Allyce Moriak	Chief Financial Officer
Wendy Castle	RA Modernization Program Owner - Business
Paul Forrester	RA Modernization Program Owner – Information Technology
Nicole Sanislow	RA Modernization Program Manager - Business
Thomas Richardson	RA Modernization Program Manager – Strategic Planning Office
Garrick Wright	RA Modernization Program Manager – Information Technology
Mark Miller	Project Sponsor & Project Owner
Nicole Cain	Project Manager

## H. Significant Project Assumptions and Constraints

### Project Assumptions

1. The project will have access to the appropriate state management, staff, and related Program stakeholders (internal and external) and other resources as required and as needed without delay.
2. The security Architecture review will incorporate existing State Cybersecurity Standards and Information Security best practices and standards.
3. Some of the interviews required for the assessment can occur virtually in the interest of the project timeline.
4. The project experiences no delays in schedule.

### Project Constraints

1. DEO security staff and subject matter experts (SMEs) have competing operational tasks and have limited time to devote to the project.

## II. Work Breakdown Structure

The italicized start and end dates in the Work Breakdown Structure chart below will be updated upon contract execution with the selected vendor.

Task	Start	End
<i>Security Architecture Review Project</i>	<i>12/9/2021</i>	<i>10/31/2022</i>
<i>WBS</i>		
<b>Procurement Phase</b>		
Advertise RFQ for Security Architecture Review services	12/8/2021	12/14/2021
Vendor questions due	12/14/2021	12/14/2021
DEO responds to vendor questions	12/22/2021	12/22/2021
Vendor submits RFQ response	1/3/2022	1/3/2022

## V. Project Organization and Methodology

### A. Project Organizational Chart

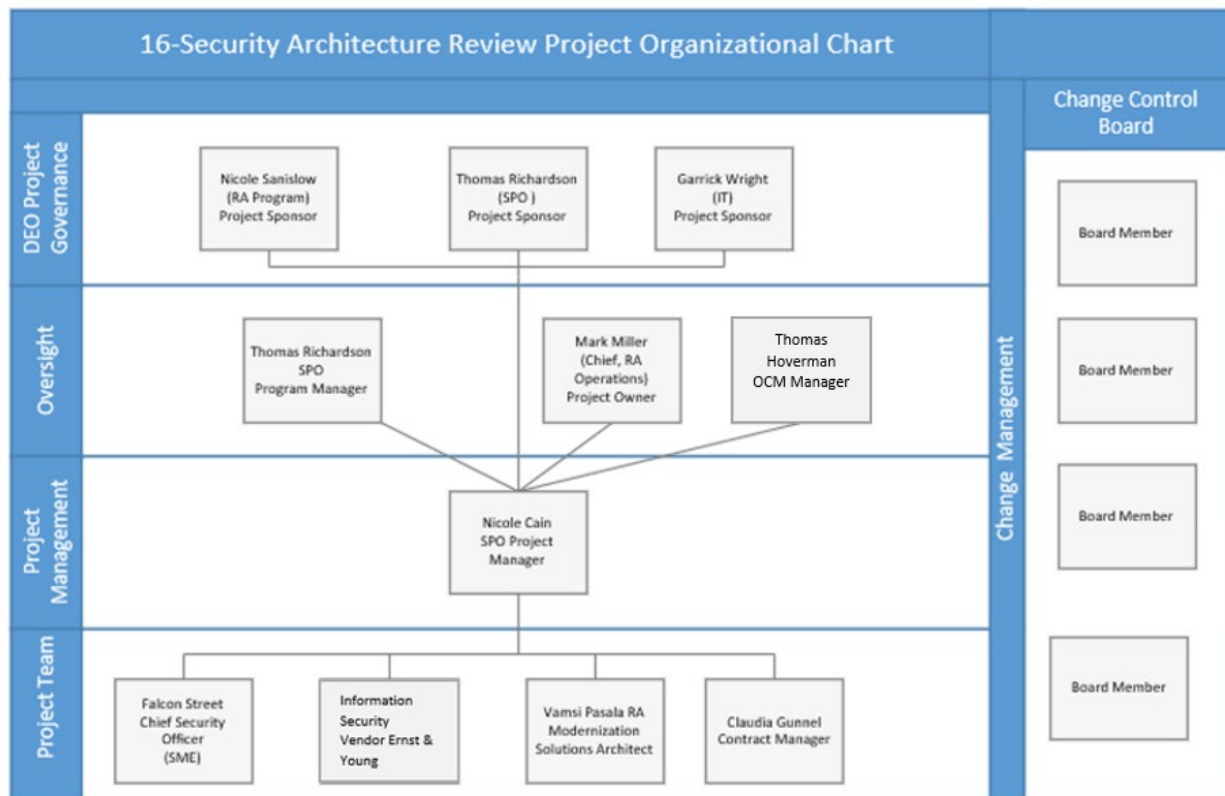

Figure 1: Project Organization Chart

### B. Project Roles and Responsibilities

Project Role	Resource Name	Responsibilities
<b>Program Manager</b>	Garrick Wright Thomas Richardson Nicole Sanislow	<ul style="list-style-type: none"> <li>Provide guidance on overall strategic direction</li> <li>Advise the Strategic Planning Office and project manager of risks that may impact the project</li> <li>Facilitate resolution of significant issues in the project</li> <li>Review and sign off on key milestones</li> </ul>

<b>Project Role</b>	<b>Resource Name</b>	<b>Responsibilities</b>
<b>OCM Manager</b>	Thomas Hoverman	<ul style="list-style-type: none"> <li>• Provide guidance on organizational change tasks</li> </ul>
<b>Strategic Planning Office</b>	Thomas Richardson	<ul style="list-style-type: none"> <li>• Monitor project progress</li> <li>• Provide guidance and support to project manager and project team members</li> </ul>
<b>Project Manager</b>	Nicole Cain	<ul style="list-style-type: none"> <li>• Manage all aspects of the project and ensure compliance with PMP</li> <li>• Monitor project progress and schedule adherence</li> <li>• Complete all documents related to the project</li> <li>• Identify and manage risks according to the PMP</li> </ul>
<b>Project Sponsor/Business Lead</b>	Mark Miller	<ul style="list-style-type: none"> <li>• Review deliverables and project documents, identifying any deficiencies</li> <li>• Review and approve deliverables</li> <li>• Review and approve RFCs</li> </ul>
<b>Technical Lead</b>	Vamsi Pasala	<ul style="list-style-type: none"> <li>• Review deliverables and project documents, identifying any deficiencies</li> <li>• Review and approve deliverables</li> <li>• Review and approve RFCs</li> </ul>
<b>Functional Team</b>	Falcon Street  Claudia Gunnels	<ul style="list-style-type: none"> <li>• Contribute subject matter expertise</li> <li>• Complete assigned project tasks in accordance with the Project Schedule</li> <li>• Identify risks and issues to the Project Managers in accordance with the Risk and Issue Management section of this PMP</li> <li>• Assist the Project Managers in responding to risks and issues</li> <li>• Assist the Project Manager in evaluating change requests</li> </ul>

Project Role	Resource Name	Responsibilities
Technical Team	Ernst & Young	<ul style="list-style-type: none"> <li>• Contribute subject matter expertise</li> <li>• Complete assigned project tasks in accordance with the Project Schedule</li> <li>• Identify risks and issues to the Project Managers in accordance with the Risk and Issue Management section of this PMP</li> <li>• Assist the Project Managers in responding to risks and issues</li> <li>• Assist the Project Manager in evaluating change requests</li> </ul>

**C. Project Management Methodology**

DEO will use a project management methodology in compliance with project management standard rule 60GG-2 F.A.C., project requirements and department experience with similar engagements. Predictability, accountability, and flexibility are key elements that must be embraced by the overall project management approach to ensure DEO’s satisfaction and project success. Successful project management must include active and visible leadership, multiple controls and checkpoints with measurable outcomes, and engagement with all stakeholders. DEO believes strong project management is critical throughout the life of any successful project.

For this project, DEO’s project management will include the following specific elements, in addition to our standard methodology:

- The project management team will advise leadership on areas of concern and will propose solutions to mitigate risk.
- Vendors will respond to inquiries or requests from DEO within one business day from receipt.
- In the case where additional time is needed for a task, vendors will provide an estimate, which must be approved by the DEO Project Manager.
- At the end of the contract, vendors will provide final copies of all reports in electronic format for archive purposes.

DEO’s project management approach will utilize the technical skills, tools, and techniques needed to succeed, as well as the dedication to accountability, resource commitment, and organizational focus. Project success will be the result of active communication among all individuals, understanding everyone’s role in the project, and clear delineation of responsibilities.

DEO believes successful project management hinges on the following:

- Clearly established project goals and requirements
- Ongoing assessment of quality against established standards
- Constant measurement of success against established deliverables and milestones
- Personal presence and commitment of key project leadership
- Proactive identification and communication of risks and issues

### **Quality Management Plan**

The Quality Management Plan ensures work is complete and meets or exceeds an adequate level of quality of the deliverables. All members of the project team will play a role in quality management, and it is critical the team ensures work is completed according to DEO standards for quality acceptance.

Project Quality Management activities will ensure project documents meet agreed upon standards, work is performed efficiently, project practices conform to recommended project standards and deficiencies are identified and corrective action taken.

### **Quality Management Approach**

Managing quality includes four major processes:

- **Quality planning (QP):** Completeness and correctness criteria define what it means for a project document to be complete and correct. The project team will establish completeness and correctness criteria. Specific criteria for the quality of Contract Deliverables will be documented in the contract and managed by the Contract Manager, program team and Project Manager.
- **Quality assurance (QA)** refers to the process used to create project documents, not the deliverables themselves. The Project Team will perform QA activities for the project weekly. The project manager may make changes to processes as necessary; changes will be communicated to the appropriate stakeholders.
- **Quality control (QC):** Performing Quality Control (QC) involves monitoring specific project results to determine whether they comply with relevant quality standards and identifying ways to eliminate causes of unsatisfactory results. The Strategic Planning Office (SPO) will perform (QC) activities to verify project management and documents are of high quality. If the SPO determines a project document to be complete, it will be presented to the Project Team at the following Status Meeting.
- **Quality improvement (QI):** The Project Manager is responsible to implement corrective actions based on the results of the quality management processes. These may include changes to project management processes; required training for stakeholders; updating performance metrics, etc.

### **Communication Management Plan**

This project will follow the communications processes outlined in the RA Modernization Program Communications Management Plan.

The master copy of this document is available in the [RA Modernization Program Library](#) in the Central Repository

The communication matrix below identifies the key project stakeholders and the detail of communications for this project.

Item	Purpose	Format	When/ Frequency	Type	Initiator	Recipient	Feedback
Project Meeting	Provide and discuss project tasks, issues, risks, action items	Meeting/Face to face or virtual)	Daily/ Weekly as needed	Mandatory	Project Manager	Project Team	Meeting Minutes
Status Report	Provide detailed information on the progress of the project against the plan	Email	Weekly/ Monthly/ Quarterly	Mandatory	Project Manager	Project Team/SPO Program Manager	Verbal and follow-up email
SPO Status Meeting	Review the status report, resolve issues, and make decisions	Meeting	Weekly	Mandatory	Project Manager	SPO Program Manager	Verbal and follow-up email
Project Deliverables	Provide deliverables to DEO for review	Email	Per project schedule	Mandatory	Project Manager	SPO Program Manager/ Project Team members	Written vetted, consolidated, and actionable comments
Deliverable Review Feedback	Provide vetted, consolidated, and actionable written comments	Email	Per project schedule	Mandatory	SPO Program Manager	Project Manager/ Project Team Members	Written/ email follow-up using Deliverable Review Comment Form
Deliverable Review Walkthrough	Confirm mutual understanding of desired deliverable changes	Meeting	As needed	Informational	Project Manager	Program Managers/ Project Owners	Verbal or written
Work Session	Gather information from subject matter experts	Meeting	Per project schedule	Mandatory	Project Manager	Update subject matter experts (only if the SPO Project Manager has the approved communication)	Verbal and follow-up email

Work Session Follow-up	To answer questions or clarify information gathered	Email	As needed	Informational	Project Manager	Provide subject matter experts (only if SPO Project Manager has approved the communication)	Verbal or email follow-up
Online Survey	Gather information from subject matter experts (former providers)	Email	Per project schedule	As needed	Project Manager	Subject matter experts (only if SPO Project Manager has approved the communication)	Verbal or email follow-up
Project Issues	Documentation of project issues	Issue Log Entry	As needed	Mandatory	Any Stakeholder	Project Owner/ Project Manager	Written/ email follow-up
Project Issues Escalation	To resolve project issues	Email	As needed	Mandatory	Project Manager	SPO Program Manager	Written/ email follow-up
Change Requests	Document project changes to scope of work	Change Request Form	As needed	Mandatory	Change Initiator	Project Manager/ Change Owner/ Change Analyst/ CCB	Written/ email follow-up
Project Closeout and Lessons Learned	Formal project closeout meeting	Email	Per project schedule	Mandatory	SPO Project Manager	All Stakeholders	Written/ email follow-up

### Weekly Status Reporting

Vendors will be required to submit status reports throughout the project at several levels. The primary source of status information is the weekly written status report, which will communicate at minimum, the following information.

- **Project Status.** This section depicts the project status at a summary level using a red/yellow/green method supported by two to three essential questions that are answered to determine summary status. The red/yellow/green method is not meant to be a grading system but instead it is a way to easily identify the areas of the project that need the most attention in order to make the project successful.
- **Overview of Project Progress.** This section describes significant accomplishments achieved in the reporting period.
- **Overall Status.** This section provides a high-level overview of whether the project is on schedule, on budget, and on scope. A yellow or red status should be explained here in detail.
- **Project Milestones, Deliverables, and Latest Tasks.** This section contains the major deliverables of the project, their planned and actual completion dates, and their status.
- **Risks, Action Items, Issues, and Decisions.** This section will link to the project risk, action item, issue, and decision tracking tool. The project tracking tool contains all items tracked during the project.

### Project Tracking

This section describes the “RAID” methodology for tracking risks, action items, issues, and decisions. DEO will follow a centralized approach that minimizes miscommunication or misinformation among project stakeholders. The Department will diligently maintain a project tracking log for each project, and a master log for RA Benefits System Modernization project overall, a Microsoft Excel workbook with multiple tabs intended to capture the details and the latest attributes of items tracked by Project Managers.

## ***VI. Business Process Organizational Change Management Plan***

This project will follow the organizational change processes outlined in the RA Modernization Program Organizational Change Management Plan.

The master copy of this document is available in the [RA Modernization Program Library](#) in the Central Repository.

The role of the Organizational Change Management plan (OCM) within an individual project under the RA Modernization Program is to help plan for and manage the people side of the project. OCM focuses on identifying, preparing and managing a wide array of internal and external stakeholders, employees and customers that will be impacted by the new solution. It is good for those stakeholders to feel informed, prepared, trained and ready to participate in a successful implementation. It is beneficial for employees to adopt new skills and develop new capabilities and to value and appreciate the features that the new technology offers.

## ***VII. Project Risk Management Plan***

### **Risk & Complexity Assessment**

The Risk & Complexity Assessment will be completed at the end of every Phase in the Project lifecycle. The Project Manager is responsible to complete this assessment with the assistance of project team members.

Risk & Complexity Assessments	Category
Pre-Charter Risk & Complexity Category	2
Initiation Gate Risk & Complexity Category	1
Planning Gate Risk & Complexity Category	1
Event Driven Risk & Complexity Category	

### **Project Risk Management**

This project will follow the risk management processes outlined in the RA Modernization Program Risk Management Plan.

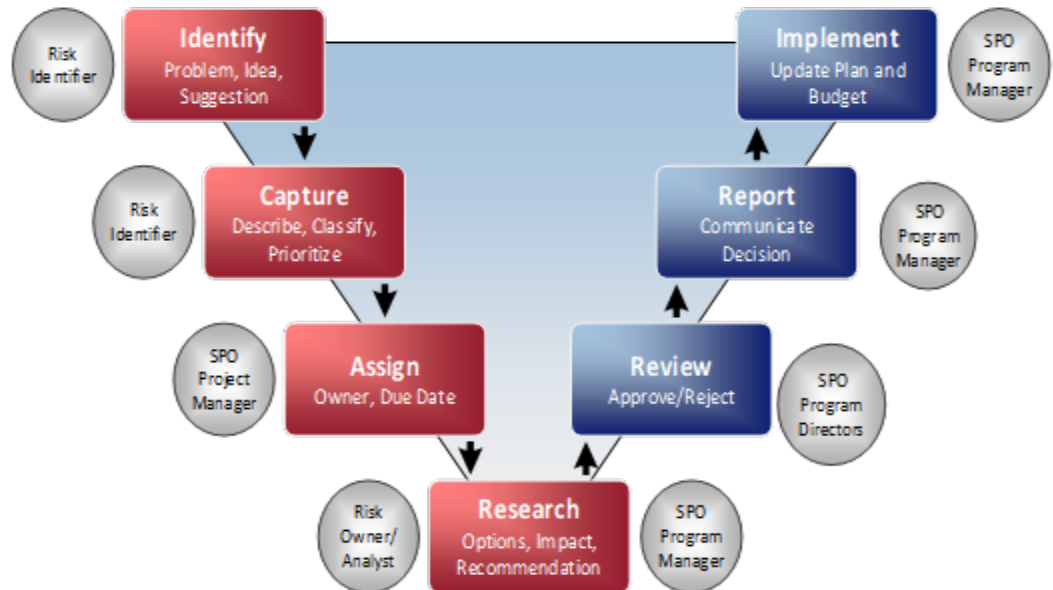

The master copy of this document is available in the [RA Modernization Program Library](#) in the Central Repository.

The risk management process helps the project team anticipate and respond to emerging risks throughout the duration of the project. The risk management process occurs throughout all phases of the project, from planning through execution and closeout. Project risks are logged and tracked in the Project Log Workbook (RAID Logs).

*Identified in the Initiation Phase*

Risk Description/Impact	Probability of Occurrence (high, medium, low)	Risk Tolerance (high, medium, low)	Mitigation Strategy	Assigned Owner
Procurement process could delay the start of the contract	Medium	Low	Accept. Project end date was extended to 7/31/2022 by the Change Control process	Contract Manager/ Procurement Specialist

Figure 2 below illustrates the major activities associated with the key risk management process.

*Figure 2: RA Modernization Program Risk Management Process*

**Action Items**

Action items are unplanned tasks that occur during a project that are too small to be added to the schedule. These items must be within the scope of the project and are often tasks that support scheduled tasks, issue resolution, risk management, or some other aspect of the project. The action item log is created and maintained as part of the project tracking log.

Action items will be managed in the following manner:

- During status meetings, any stakeholder can raise an action item for discussion.
- The Project team will discuss the action item and determine if it warrants being monitored in the action item log.
- The project manager will enter the item in the log.
- The team will set the priority for the action item (high/medium/low), assign an action item owner, and set a planned completion date.
- At each subsequent status meeting, the action item(s) will be reviewed until they can be closed.

### Issue Management

This project will follow the issue management processes outlined in the RA Modernization Program Issue Management Plan.

The master copy of this document is available in the [RA Modernization Program Library](#) in the Central Repository.

An issue is an immediate problem that needs resolution. Acknowledging and addressing issues quickly ensures that they do not impact the scope of the project. Project issues are logged and tracked in the Project Log Workbook (RAID Logs).

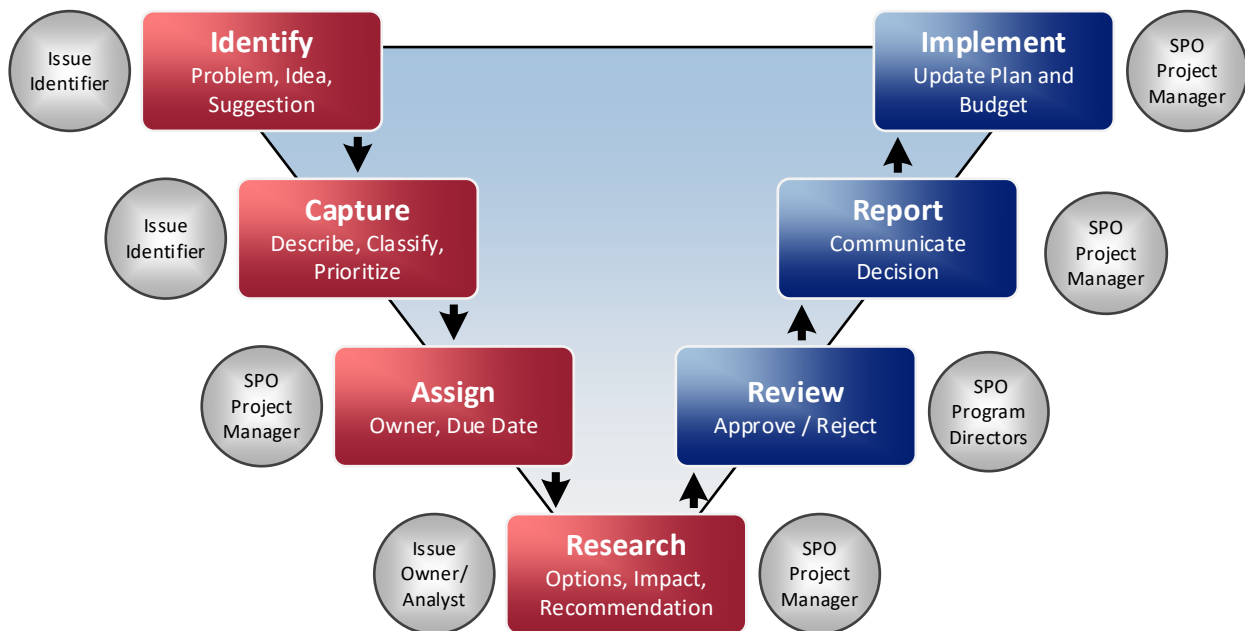

Figure 3: RA Modernization Program Issue Management Process

### Decisions

Decisions are leadership answers to questions that arise during the project. The decision log is created and maintained as part of the project tracking log.

Decisions will be managed in the following manner:

- During status meetings, any stakeholder can raise a question that requires a decision.
- If the team determines a decision needs to be made, the project manager will enter it in the decision log.
- The team will discuss the impact to the project, assign a decision maker, and set a date for when the decision is needed.
- At each subsequent status meeting, the decision item(s) will be reviewed until they can be closed.

### Change Management

This project will follow the change processes outlined in the RA Modernization Program Change Management Plan.

The master copy of this document is available in the [RA Modernization Program Library](#) in the Central Repository.

The *RA Modernization Change Management Plan*, defines the approach and provides the processes for initiating, defining, researching, evaluating, reviewing, prioritizing, managing cost, approving or rejecting the change requests (CRs), and communicating the status of the change that may affect the success of the Security Architecture Review Services project.

Figure 4: RA Modernization Program Change Management Process

### Schedule Management

The project schedule for this project will be stored in the Central Repository 16-Security Architecture Review Project Deliverables folder.

### Schedule Maintenance

The project schedule maintenance is an on-going activity that tracks the work performed, the timeframes for when the work has been or will be completed and progress against the baseline work estimates and timelines. To effectively track the program progress, the project schedule is kept current, and reflects all work that needs to be performed, in accordance with the RA Modernization Program Schedule Management Plan.

The Security Architecture vendor will submit a project plan as their first deliverable. That project schedule with tasks will be incorporated into the overall project schedule and will result in changes to the current project schedule.

If a change to the project schedule or scope is needed, the Project Manager may pursue a change request as described in the [RA Modernization Program Library](#).

### Procurement Management

The Procurement Management Plan seeks to outline how the project will procure resources necessary to complete the project objectives. It defines the procurement methodology for this project, lays out the process for managing procurement throughout the life of the project, and will be updated if project needs change. This plan identifies and defines the goods and services to be procured, the types of contracts to be used in support of this project, the contract approval process, and the decision criteria. The importance of coordinating the procurement activities, establishing firm contract deliverables, and metrics in measuring procurement activities is included in the following subsections.

### Procurement Management Approach

The DEO Purchasing Office and any vendors contracted for procurement assistance will provide oversight and management along with the Project Manager for all procurement activities under this project. The Project Manager will work with the project team to identify all items to be procured for the successful completion of the project. The Department Strategic Planning Office (SPO) will then review any procurement requests prior to approving the development of procurement documentation.

### Procurement Definition

The following table will be completed to record any procurement goods and/or services determined to be essential for any RA Modernization project's completion and success. The Project Manager and/or SPO must approve any procurement before inclusion in this table.

Procurement	Description	Justification	Needed By
RFQ	Security Architecture Review Services	No in-house expertise	3/14/2022

### Cost Management

The tables below will be completed and used to define and track project costs during the Security Architecture Review Project.

Cost Management Plan				
Category	Description	Frequency	Deliverable	Cost
Other Opex	Project Management Plan	One time	Deliverable 1	\$21,240
Other Opex	Assessment of Security Controls Report	One time	Deliverable 3	\$169,920
Other Opex	Skills & Capabilities and Gap Analysis Report	One time	Deliverable 4	\$84,690
Other Opex	Security Controls Implementation Roadmap	One time	Deliverable 5	\$106,200
Other Opex	Training and Capabilities Improvement Plan	One time	Deliverable 6	\$42,480

Column	Definition
Category	Type of expense
Description	Description of expense
Frequency	Describe whether the expense is annual or recurring or a onetime expense
Deliverable	List the deliverable associated with the expense
Cost	List the total expense in dollars e.g., \$0.00

### Staffing Management

The purpose of this section is to outline how the project is to manage staffing requirements and resource tasks appropriately. This project plans to procure additional staffing through “Staff Augmentation” contracts. The needs for each individual project have been estimated before the project and will be refined during requirements gathering and procurement of services.

### VIII. Capacity Plan

Deliverable #4 requires the vendor to provide DEO with a skills and capabilities assessment and gap analysis report detailing the current DEO staff skills and capabilities to implement the recommended security controls.

Deliverable #5 requires the vendor to provide a security controls implementation roadmap with timelines and milestones to implement said controls.

Deliverable #6 requires the vendor to provide a detailed training and capabilities improvement plan.

These three deliverables will assist DEO in building a capacity plan to implement and maintain the security controls required for the System.

## SECTION 1 — OVERALL PROJECT PLAN

### *I. Project Charter*

The Department of Economic Opportunity's (DEO) processes for Identity and Access Management (IAM) are not consistently and uniformly applied to all systems, applications, and users, posing confidentiality, integrity, and availability risk to DEO. As a result, the Reemployment Assistance Claims and Benefits Information System (System) Modernization Program Roadmap calls out a need for a comprehensive review and update of the IAM process for the System, particularly in the context of cloud migration, where logical security boundaries are often represented by user access controls rather than physical system delineation and network segregation.

The purpose of this project is to address the need for IAM process and tool improvements to the System in the context of modernization and cloud migration, while considering that IAM processes are, by necessity and design, standard for the agency enterprise, and not system-specific. Therefore, to avoid additional risk to the agency and the System, this project does have dependency with agency efforts to improve IAM across the enterprise.

Additionally, due to the urgency of DEO's need to address widespread fraud and cyber-attacks threatening the System, elements of this project were performed ahead of plan development that encompassed the majority of IAM controls specific to the Reemployment Assistance claimant-to-application access flow. While the work was significant, those components were implemented in such a way to maximize compatibility and prevent re-work for the remainder of the effort.

### **A. Scope Statement**

#### **In Scope**

- Processes - The project will involve significant updates to the IAM governance process, including identity creation, modification, and destruction; auditing and alerting; role definition; access authorization; and access provisioning
- People – All IAM process roles involved in governance and execution will be addressed. Governance will require System and Data Owners from the Reemployment Assistance program, as well as subject matter expertise and IT Service Management functions from IT. Execution of the process will impact all users and administrators of the system (including the application and underlying infrastructure), whether they have an account in pre-project state or not. All who interact with the system will be expected to have a uniquely identifiable account protected by an authentication mechanism that provides access to only the data and components of the system and application to which their role(s) are authorized. This includes, but may not be limited to:
  - External users of the application (benefits seekers, employers, partners, etc.)

- Internal users of the application (DEO staff, contractors, privileged partners, etc.)
- Internal IT operational and development staff responsible for the operation and maintenance of the system(s) and their components on which the application relies.
- Program staff or partners responsible for gathering information and/or reporting from components of the system not available through the application.
- External support partners, contractors, etc. that may assist in the operation, maintenance, analysis, auditing, or security response activities associated with the system or application.
- Internal auditors, security staff, or other program support roles.
- System Administrator and Service Accounts.
- Technology - An IAM set of tools has been identified that meets agency security, compliance, affordability, responsiveness, effectiveness, and efficiency requirements. The IAM process will ensure identities are managed and access is controlled for all components of the System, including, but not limited to, the application(s); cloud infrastructure, platforms, and software; servers; network equipment; interfaces; and databases. The IAM process for the System will standardize with the enterprise IAM process.

**Out of Scope**

- Development of any components of the IAM process already addressed by enterprise efforts.
- Development and integration of any applications or systems into the IAM process other than those involved in administering the RA program.

**B. Project Objectives and Business Benefits**

Project Objective	Business Benefit
Procurement of IAM toolset and services to integrate with the System	<ul style="list-style-type: none"> <li>● Provide a tool that will provide the ability for consistent and uniform Access Management workflows across DEO.</li> </ul>
Implementation of enterprise compatible IAM process for the System.	<ul style="list-style-type: none"> <li>● Greatly reduces risk to confidentiality, integrity, and availability of System and data.</li> <li>● Resolves long-standing audit issues.</li> <li>● Provides opportunity for easier integration with identity verification (first- and second-party fraud mitigation).</li> </ul>
Centrally managed identities for the System.	<ul style="list-style-type: none"> <li>● Decreases workload across DEO for managing access.</li> <li>● Reduces risk by improving consistency, automation, audit, and control of users and access.</li> </ul>

Modernized authentication for the public and other external entities accessing the System.	<ul style="list-style-type: none"> <li>• Mitigates third-party fraud and helps address insider threats.</li> <li>• Resolves long-standing audit issues.</li> </ul>
Federated IAM platform for the System.	<ul style="list-style-type: none"> <li>• Improves long-term compatibility with internal and external systems and organizations.</li> </ul>
Capability for alerting on and auditing current and historical identity activity/access within the System.	<ul style="list-style-type: none"> <li>• Reduces information security and fraud risk.</li> <li>• Improved troubleshooting of access issues.</li> <li>• More timely/accurate responses to audits.</li> <li>• Lowers risk of audit findings.</li> </ul>

**C. Critical Success Factors**

- A documented, enterprise compatible IAM process is identified or created.
- System and enterprise IAM processes are aligned.
- Successful development, testing, and execution of identity management lifecycle and access control changes across application and system.
- Authorization process is automated and digital.
- Tools and automation are implemented without need for ongoing manual workarounds.
- Logging/audit information is accessible in central platform (to be determined).
- Redundant system roles have been removed.
- System owner(s) and other relevant process roles are updated, and an ongoing process is in place to track and update them.
- An authorization record with timestamp exists for all users of the System.
- Stale accounts are appropriately expired.
- All accounts meet DEO password/access control requirements.

**D. Key Dates**

Key Date	Importance and Relevance to the Project
January 11 – March 11, 2022	2022 Legislative Session
April 1 – April 30, 2022	Requirements gathering for tool selection
December 6, 2022	Issue purchase order
December 6, 2022 to January 3, 2023	Vendor onboarding
January 6, 2023, to January 27, 2023	Vendor analyzes and updates existing IAM processes and requirements
February 2, 2023, to March 10, 2023	Vendor establishes IAM process roles and responsibilities
January 13, 2023, to April 27, 2023	Vendor configures IGA, PAM, and IAM toolset, creates identities, and maps them to roles
June 20, 2023	Go live (Execution Phase complete)
June 27, 2023	Closeout Phase complete; project complete

### E. Major Deliverables

<b>Deliverable ID</b>	<b>Major Deliverable</b>	<b>Deliverable Description</b>
1	Initial Project Management Plan (PMP)	The vendor provides the initial PMP based on the template that DEO provides.
2	Vendor kickoff meeting	The vendor conducts the IAM project kickoff meeting.
3	Final PMP	The vendor provides the final version of the PMP after review and approval by DEO.
4	Schedule and work breakdown structure (WBS)	The vendor provides a baselined project schedule and WBS after review and approval by DEO.
5	Process and requirements work sessions	The vendor conducts a series of onsite work sessions to discuss, evaluate, and develop IAM processes and requirements.
6	Process and requirements report	The vendor provides a report on the result of Deliverable ID 5 after review and approval by DEO.
7	Identity Governance Model	The vendor reviews existing documentation on applications, roles, access, and responsibilities; updates that documentation; and delivers a final version of that documentation after review and approval by DEO.
8	Identity Directory	The vendor creates documentation to describe the per-application roles, access policies, and birthright access; and delivers a final version of that documentation after review and approval by DEO.
9	Solution Architecture Design Document (SADD)	The vendor creates the SADD to describe the technical details of the IAM solution and delivers a final version after review and approval by DEO.
10	Reports and dashboards	The vendor customizes reports and dashboards for all active users, password reset alerts, daily role modification, and daily forced override.
11	Solution Test Plan	The vendor delivers the Solution Test Plan after review and approval by DEO.
12	Test cases	The vendor delivers the test cases, which describe the behavior of the final IAM solution, after review and approval by DEO.

<b>Deliverable ID</b>	<b>Major Deliverable</b>	<b>Deliverable Description</b>
13	Test results report	The vendor delivers the test results report, which summarizes the result of its testing, after review and approval by DEO.
14	Training materials	The vendor produces training materials, including the Training Plan, after review and approval by DEO.
15	Training	The vendor provides training sessions as described in the Training Plan.
16	Requirements Management Plan	As part of the transition into continuous improvement, which begins after go-live, the vendor delivers the Requirements Management Plan after review and approval by DEO.
17	IAM policies and procedures	As part of the transition into continuous improvement, which begins after go-live, the vendor delivers the IAM policies and procedures after review and approval by DEO.
18	Continuous Modernization Plan and roadmap	As part of the transition into continuous improvement, which begins after go-live, the vendor delivers the Continuous Modernization Plan and corresponding roadmap after review and approval by DEO.
19	Transition Plan	As part of the transition into continuous improvement, which begins after go-live, the vendor delivers the Transition Plan after review and approval by DEO.
20	Project Closeout Report	The vendor provides the Project Closeout Report after review and approval by DEO.

#### F. Major Milestones

<b>Milestone ID</b>	<b>Major Milestone</b>	<b>Milestone Description</b>
1	Complete IAM process review and documentation	Complete deliverables 1 and 2.
2	Approve integration roadmap	Obtain approval of roadmap from process and implementation stakeholders.
3	Roadmap kickoff	Begin implementation based on roadmap process.
4	Completion of roadmap	Complete implementation.
5	Process execution	May be completed incrementally as part of roadmap.
6	Authorization updated for all users	An authorization record with timestamp exists for all users of the System.

## G. Key Stakeholders

Key Stakeholder	Project Interest
Dane Eagle	Secretary, Department of Economic Opportunity
Adrienne Johnston	Deputy Secretary, Workforce Services
Domenic DiLullo	Chief Technology Officer
Ed Wynn	Chief Information Officer
Allyce Moriak	Chief Financial Officer
Wendy Castle	RA Modernization Program Owner - Business
Paul Forrester	RA Modernization Program Owner – Information Technology
Nicole Sanislow	RA Modernization Program Manager - Business
Tom Richardson	RA Modernization Program Manager – Strategic Planning Office
Garrick Wright	RA Modernization Program Manager – Information Technology
Mark Miller	Project Owner
Christian Stephens	Project Manager

## H. Significant Project Assumptions and Constraints

### Project Assumptions

1. The identified requirements are correct and complete.
2. The assigned IT resources possess relevant knowledge and skills to complete the identified tasks.
3. Members of the project team will have access to the necessary tools, hardware, and materials necessary to complete the identified tasks.
4. All relevant stakeholders will attend required status meetings. However, there may be instances where some stakeholders are unavailable to attend.
5. The project sponsor will be responsive and prepared to make decisions regarding the project cost and scope.
6. Funding will be available for necessary procurements, if any.
7. Even though the individual access flows have not been identified/assigned resources, the project is achievable within the allotted time with the available resources.
8. The claimant IAM process already developed and implemented will be compatible with any additional solutions implemented as part of this project.

### Project Constraints

1. Further planning is needed as part of the roadmap development to refine the scope and work breakdown of this project. It is expected the project will require application, API, and/or database development, and may require System/infrastructure upgrades.
2. Potential procurement of supplementary technologies may be required if not already procured for the purposes of enterprise IAM.

*II. Work Breakdown Structure*

WBS	Contract Deliverable Numbers	Task Name	% Complete	Duration	Start	Finish

Vendor	IAM Toolset	<ul style="list-style-type: none"> <li>• Provides expertise in standing up chosen toolset and integration with defined Roles within RA</li> </ul>
SSI Vendor	Peraton	<ul style="list-style-type: none"> <li>• Provide assistance with Component testing</li> </ul>

### C. Project Management Methodology

DEO will use a project management methodology in compliance with project management standard rule 60GG-1 F.A.C., project requirements and department experience with similar engagements. Predictability, accountability, and flexibility are key elements that must be embraced by the overall project management approach to ensure DEO's satisfaction and project success. Successful project management must include active and visible leadership, multiple controls and checkpoints with measurable outcomes, and engagement with all stakeholders. DEO believes strong project management is critical throughout the life of any successful project.

For this project, DEO's project management will include the following specific elements, in addition to our standard methodology:

- The project management team will advise leadership on areas of concern and will propose solutions to mitigate risk.
- Vendors will respond to inquiries or requests from DEO within one business day from receipt.
- In the case where additional time is needed for a task, vendors will provide an estimate, which must be approved by the DEO Project Manager.
- At the end of the contract, vendors will provide final copies of all reports in electronic format for archive purposes.
- DEO's project management approach will utilize the technical skills, tools, and techniques needed to succeed, as well as the dedication to accountability, resource commitment, and organizational focus. Project success will be the result of active communication among all individuals, understanding everyone's role in the project, and clear delineation of responsibilities.

DEO believes successful project management hinges on the following:

- Clearly established project goals and requirements
- Ongoing assessment of quality against established standards
- Constant measurement of success against established deliverables and milestones
- Personal presence and commitment of key project leadership
- Proactive identification and communication of risks and issues

## ***VI. Business Process Organizational Change Management Plan***

This project intends to improve the delivery, execution, security, or convenience of DEO's lines of business through the implementation of modern processes and tools based on industry best practices and frameworks.

The project team aims to maximize communication, engagement, adoption, and performance of these new processes, roles, and responsibilities through a combination of tools, templates, and techniques such as:

- Stakeholder identification and engagement plans
- Process identification and improvement plans
- Educational assessment and training plans
- Change risk assessment
- Change Advocate networks
- Change Management
- Business Relationship Management
- IT Service Management

**VII. Project Risk Management Plan**

<b>Risk Description/Impact</b>	<b>Probability of Occurrence (high, medium, low)</b>	<b>Risk Tolerance (high, medium, low)</b>	<b>Mitigation Strategy</b>	<b>Assigned Owner</b>
Hurricane impacting the state delays the schedule	Medium	High	Adjust schedule accordingly	PM
Divisional and/or Bureau resistance of new process	Medium	Medium	Involve management and impacted staff throughout engagement to increase adoption rate and ensure a successful transition	PM
Insufficient knowledge transfer of new process	Medium	Medium	Involve impacted staff throughout engagement to increase participation and knowledge of new processes	PM
Identified technical solutions do not address requirements	Low	Medium	Procure necessary solution(s)	SME/ Implementation Teams, Owner
Procurement(s) are outside of available budget.	Low	Medium	Identify alternative solutions, seek additional funding	SME Team, Owner
Resource requirements for execution of roadmap are beyond original expectations.	Medium	Medium	Prioritize highest-risk access flows, adjust schedule, plan additional phases.	PM/SME
Procurement Delays for IAM Toolset & Services	High	Medium	Communication with Senior Leadership and Procurement Team(s).	PM/Project Owner/Senior Leadership

**VIII. Capacity Plan**

Utilization of a single tool for software development provides a single source of truth for work tracking and resource allocation which can then be utilized for capacity planning for the development environment, tools, and developers.

**Project Capacity Planning**

- **Establish Cross-Functional Team:** To collaborate and communicate about production capacity and resource management, you want a cross-functional team with different levels and different functions.
- **Calculate Resource Capacity:** Before you can create a production capacity plan, you need to have an idea of your current capacity and your available resources.
- **Determine Resource Requirements:** For each project, look at the scope and what resources are required to do the task for the project.
- **Prioritize Projects:** Which projects are most important, and which can be put aside for the time being? You can't do everything at once.
- **Allocate Resources Based on Project Priority:** Now allocate those prioritized projects and make sure that they are aligned with the goals of the organization.
- **Keep the Lines of Communications Open:** Communicate between executives, project management leaders and stakeholders.
- **Document Known Risks:** Monitor risks such as union strikes, weather, government regulations that stop a project or create new ones unexpectedly.
- **Plan for How to Handle Too Much Capacity:** Understand where it is and how to resolve it (such as reassigning), or not enough capacity (again, where/how).

## SECTION 1 — OVERALL PROJECT PLAN

### I. *Project Charter*

The Business Process Optimization (BPO) project consists of DEO procuring a vendor who specializes in performing assessments with business areas to learn business processes, gathering and documenting requirements, designing process models, and then proposing a design to be used for the Customer Experience/User Experience (CX/UX) portion of the Reemployment Assistance Modernization Program (Program).

The vendor will assist DEO in identifying, assessing, analyzing, and redesigning the Reemployment Assistance business processes and to develop business and technical functional and non-functional requirements which impact the customer experience into a customer-centric business framework to leverage improvements and supporting technologies to deliver world-class customer service. The assessment will include analysis of existing processes and specifications to improve business and technical processes effectiveness and efficiency. This shall include full evaluation of the Reemployment Assistance program, Reemployment Assistance Information Technology program, and partial evaluation of the Reemployment Assistance Tax program which relate to the Reemployment Assistance Claims and Benefits Information System (System). At a minimum, DEO seeks to identify and redesign business processes to deliver:

- Improved user experience to address the specific concerns of users and stakeholders;
- Adaptability in response to changing needs of the customer and DEO;
- Ensured program integrity and reduction of fraud risk;
- Improved services and service delivery;
- Minimized process complexity and service delivery time;
- Improve quality of the services;
- Increased transparency levels;
- Reduced administrative burden and cost; and
- Adoption of best practices from similar environments.

#### A. **Scope Statement**

##### **In Scope**

- Perform working sessions to identify and document As-Is business processes for Core Claims, Continued Claims, Employers/Third Party Administrators (TPA), and Initial Claims;
- Create As-Is reports for Core Claims, Continued Claims, Employers/TPAs, and Initial Claims;
- Create a Final As-Is report;
- Create a detailed assessment report of As-Is business processes and corresponding technical functional and non-functional requirements;
- Perform working sessions to identify and document To-Be business processes and corresponding functional and non-functional requirements for the solution;

- Create an analysis of potential benefits from re-engineered business processes and technical functional and non-functional requirements;
- Create a To-Be report for Core Claims, Continued Claims, Employers/TPAs, and Initial Claims;
- Create a Final To-Be report;
- Create a requirements management plan;
- Create a transition plan; and
- Create an organizational change management report.

**Out of Scope**

- Software development work

**B. Project Objectives and Business Benefits**

<b>Project Objective</b>	<b>Business Benefit</b>
Conduct working sessions to identify, document, and analyze current As-Is and To-Be business processes for Core Claims, Continued Claims, Employers/TPAs, and Initial Claims in preparation for the CX/UX project.	Ensuring business process improvements are documented prior to determining functional system change needs.
Identify, document, and analyze To-Be technical functional and non-functional requirements for Core Claims, Continued Claims, Employers/TPAs, and Initial Claims in preparation for the CX/UX project.	Ensuring business requirements align with functional and CX/UX requirements before initiating transformation.

**C. Critical Success Factors**

- DEO personnel are available to attend working sessions;
- DEO personnel assigned to review project deliverables can perform those duties in the schedule time provided.

**D. Key Dates**

<b>Key Dates (anticipated)</b>	<b>Importance and Relevance to the Project</b>	<b>Status</b>
2/17/2022	Kick-off Meeting, Agenda, Presentation, and Minutes due	Completed
3/14/2022	Project Management Plan due Staffing Plan due	Completed
3/29/2022	Final day to conduct working session for As-Is processes for Core Claims	Completed
4/7/2022	Lessons Learned Collection Process due	Completed
4/8/2022	As-Is Report for Core Claims due	Completed
4/21/2022	Final day to conduct working session for As-Is processes for Continued Claims	Completed

<b>Key Dates (anticipated)</b>	<b>Importance and Relevance to the Project</b>	<b>Status</b>
4/26/2022	Final day to conduct working session for To-Be processes for Core Claims	Completed
5/2/2022	To-Be Processes and Requirements for Core Claims due	Completed
5/9/2022	As-Is Report for Continued Claims due To-Be Report for Core Claims due	Completed
5/19/2022	Final day to conduct working session for To-Be processes for Continued Claims	Completed
5/26/2022	Final day to conduct working session for As-Is processes for Employers/TPAs	Completed
5/27/2022	To-Be Processes and Requirements for Continued Claims due	Completed
6/3/2022	To-Be Report for Continued Claims due	Completed
6/13/2022	As-Is Report for Employers/TPAs due	Completed
6/24/2022	Final day to conduct working session for As-Is processes for Initial Claims Final day to conduct working session for To-Be processes for Employers/TPAs	Completed Completed
7/11/2022	To-Be Processes and Requirements for Employers/TPAs due	Completed
7/18/2022	Final day to conduct working session for all other items As-Is Report for As-Is processes for Initial Claims due	Completed
7/22/2022	Final day to conduct working session for To-Be processes for Initial Claims	Completed
7/25/2022	To-Be Report for Employers/TPAs due	Completed
7/29/2022	To-Be Processes and Requirements for Initial Claims due	Completed
8/5/2022	As-Is Report for All Other items due  To-Be Report for Initial Claims due	Completed Completed
8/12/2022	Final As-Is Assessment Report due Assessment Report due  To-Be Processes and Requirements for All Other items due	Completed Completed
8/19/2022	To-Be Report for All Other items due  Final day to conduct working session for To-Be processes for All Other items	Completed Completed
8/26/2022	Potential Benefits Analysis due	Completed

Key Dates (anticipated)	Importance and Relevance to the Project	Status
	Final To-Be Report due	Completed
	Updated As-Is business process requirements due	Completed
8/29/2022	Transition Plan due	Completed
9/28/2022	Requirements Management Plan due	Completed
9/28/2022	Organizational Change Management Report	Completed
9/28/2022	How to guide and Train the Trainer sessions	Completed

**E. Major Deliverables**

Major Deliverable	Deliverable Description	Deliverable Status
As-Is Working Sessions	Conduct on-site working sessions with subject matter experts, as identified by DEO, to review existing As-Is processes and Reemployment Assistance Claims and Benefits Information System artifacts.	Completed
As-Is Report(s)	Submit an As-Is Report for Core Claims, Continued Claims, Employers/TPAs, and Initial Claims in the order listed that includes all business processes and corresponding technical functional and non-functional requirements, the As-Is Business Process Map(s), and findings from a review of Federal and State laws, rules, guidelines, policies, and any other regulations to identify and document unnecessary or lacking procedure(s) not currently being followed in the As-Is business processes or corresponding technical functional and non-functional requirements.	Completed
Assessment Report	Create an Assessment Report that analyzes and evaluates the As-Is business processes and corresponding technical functional and non-functional requirements	Completed
To-Be Business Processes and Corresponding Technical Functional and Non-Functional Requirements for the Solution	Create and document the To-Be business processes and corresponding technical functional and non-functional requirements required by the Solution for the Incremental CX/UX Mobile-Responsive Software Transformation project.	Completed

Major Deliverable	Deliverable Description	Deliverable Status
To-Be Working Sessions	Conduct on-site working sessions with subject matter experts, as identified by DEO, to discuss and evaluate To-Be.	Completed
Potential Benefit Analysis	Develop and provide DEO with a quantitative analysis of potential benefits from re-engineered business processes and technical functional and non-functional requirements	Completed
To-Be Report(s)	Prioritize, develop, and provide DEO with a To-Be Report for Core Claims, Continued Claims, Employers/TPAs, and Initial Claims, in that order, which details the process gap between the current As-Is and redesigned To-Be business processes specifically for the modules listed above.	Completed
Requirements Management Plan	Update the previously developed As-Is business process requirements with greater details based on the Assessment Report	Completed
Transition Plan	DEO and Contractor must develop a Transition Plan for the orderly, effective transition of data and operations at the termination or expiration of this Contract.	Completed
Organizational Change Management Report	Provide an organizational change management report.	Completed
How to guide and Train the Trainer sessions	Provide a How to Guide for Organizational Change Management and training session.	Completed

## F. Major Milestones

Major Milestone	Milestone Description
Initiation Phase Complete	All initiation activities completed
Planning Phase Complete	All Planning activities completed
Execution Phase Complete	All Execution activities completed
Monitor and Controlling Phase Complete	All M&C activities completed
Closing Phase Complete	All Closing activities completed

## G. Key Stakeholders

Key Stakeholder	Project Interest
Dane Eagle	Secretary, Department of Economic Opportunity
Adrienne Johnston	Deputy Secretary, Division of Workforce Services
Domenic DiLullo	Chief Technology Officer

Allyce Moriak	Chief Financial Officer
Wendy Castle	RA Modernization Program Owner – Business
Paul Forrester	RA Modernization Program Owner – Information Technology
Nicole Sanislow	RA Modernization Program Manager – Business
Tom Richardson	RA Modernization Program Manager – Strategic Planning Office
Garrick Wright	RA Modernization Program Manager – Information Technology
Mark Miller	Project Owner
Steve Garrison	Project Manager

## H. Significant Project Assumptions and Constraints

### Project Assumptions

- The project will have access to the appropriate state management, staff, and related Program stakeholders (internal and external) and other resources as required and as needed without delay.
- The CX/UX procurement for Core Claims is released in May 2022
- The project experiences no delays in schedule.

### Project Constraints

None

**II. Work Breakdown Structure**

**III. Resource Loaded Project Schedule**

The schedule is in ServiceNow. Resources have been added to the project.

**IV. Project Spending Plan**

This project is fixed priced based on identified deliverable based invoice events. The spend plan is in ServiceNow.

Total Budgeted	FY 2021/22	FY2022/23
\$3,376,000.04	\$656,185.00	\$1,234,946.00

**V. Project Organization and Methodology**

**Project Organizational Chart**

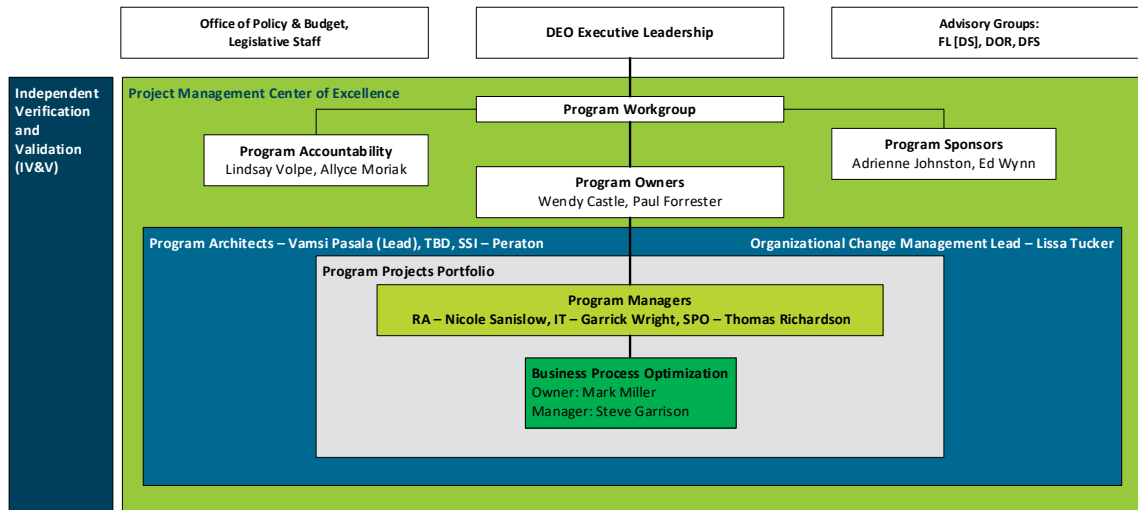

Figure 1: Project Organization Chart

**Project Roles and Responsibilities**

Project Role	Resource Name	Responsibilities
Program Owners	Wendy Castle	<ul style="list-style-type: none"> <li>- Provide guidance on overall strategic direction</li> <li>- Advise the Strategic Planning Office and project manager of risks that may impact the project</li> <li>- Facilitate resolution of significant issues in the project</li> </ul>
		<ul style="list-style-type: none"> <li>- Provide guidance on overall strategic direction</li> </ul>

<b>Program Managers</b>	Garrick Wright  Thomas Richardson  Nicole Sanislow	<ul style="list-style-type: none"> <li>- Advise the Strategic Planning Office and project manager of risks that may impact the project</li> <li>- Facilitate resolution of significant issues in the project</li> <li>- Review and sign off on key milestones</li> </ul>
<b>Project Manager</b>	Steve Garrison	<ul style="list-style-type: none"> <li>- Manage all aspects of the project and ensure compliance with PMP and vendor contract</li> <li>- Monitor project progress and schedule adherence</li> <li>- Complete all documents related to the project</li> <li>- Identify and manage risks according to the PMP</li> </ul>
<b>Project Owner</b>	Mark Miller	<ul style="list-style-type: none"> <li>- Review deliverables and project documents, identifying any deficiencies</li> <li>- Review and approve deliverables</li> </ul>
<b>DEO Enterprise Architects</b>	Vamsi Pasala  Roland Solvik  Mike George	<ul style="list-style-type: none"> <li>- Contribute subject matter expertise</li> <li>- Complete assigned project tasks in accordance with the Project Schedule</li> <li>- Identify risks and issues to the Project Manager in accordance with the Risk and Issue Management section of this PMP</li> <li>- Assist the Project Manager in responding to risks and issues</li> <li>- Assist the Project Manager in evaluating change requests</li> </ul>
<b>Business Analyst</b>	Todd Dzicek	<ul style="list-style-type: none"> <li>- Performs business analysis on project deliverables</li> <li>- Performs systems analysis and design</li> </ul>
<b>KPMG</b>		<ul style="list-style-type: none"> <li>- Performs the work as identified in the contract</li> <li>- Assists the PM in identifying and managing project risk</li> </ul>

### **Project Management Methodology**

DEO will use a project management methodology in compliance with project management standard rule 60GG-2 F.A.C., project requirements and department experience with similar engagements. Predictability, accountability, and flexibility are key elements that must be embraced by the overall project management approach to ensure DEO’s satisfaction and project success. Successful project management must include active and visible leadership, multiple controls and checkpoints with measurable outcomes, and engagement with all stakeholders. DEO believes strong project management is critical throughout the life of any successful project.

For this project, DEO's project management will include the following specific elements, in addition to our standard methodology:

- The project management team will advise leadership on areas of concern and will propose solutions to mitigate risk.
- Vendors will respond to inquiries or requests from DEO within one business day from receipt.
- In the case where additional time is needed for a task, vendors will provide an estimate, which must be approved by the DEO Project Manager.
- At the end of the contract, vendors will provide final copies of all reports in electronic format for archive purposes.

DEO's project management approach will utilize the technical skills, tools, and techniques needed to succeed, as well as the dedication to accountability, resource commitment, and organizational focus. Project success will be the result of active communication among all individuals, understanding everyone's role in the project, and clear delineation of responsibilities.

DEO believes successful project management hinges on the following:

- Clearly established project goals and requirements
- Ongoing assessment of quality against established standards
- Constant measurement of success against established deliverables and milestones
- Personal presence and commitment of key project leadership
- Proactive identification and communication of risks and issues

### **Weekly Status Reporting**

Vendors will be required to submit status reports throughout the project at several levels. The primary source of status information is the weekly written status report, which will communicate at minimum, the following information.

- **Project Status.** This section depicts the project status at a summary level using a red/yellow/green method supported by two to three essential questions that are answered to determine summary status. The red/yellow/green method is not meant to be a grading system but instead it is a way to easily identify the areas of the project that need the most attention to make the project successful.
- **Overview of Project Progress.** This section describes significant accomplishments achieved in the reporting period.
- **Overall Status.** This section provides a high-level overview of whether the project is on schedule, on budget, and on scope. A yellow or red status should be explained here in detail.
- **Project Milestones, Deliverables, and Latest Tasks.** This section contains the major deliverables of the project, their planned and actual completion dates, and their status.
- **Risks, Action Items, Issues, and Decisions.** This section will link to the project risk, action item, issue, and decision tracking tool. The project tracking tool contains all items tracked during the project.

**Project Tracking**

This section describes the “RAID” methodology for tracking risks, action items, issues, and decisions. DEO will follow a centralized approach that minimizes miscommunication or misinformation among project stakeholders. The Department will diligently maintain a project tracking log for each project, and a master log for the System Modernization project overall, a Microsoft Excel workbook with multiple tabs intended to capture the details and the latest attributes of items tracked by Project Managers.

**VI. Project Risk Management Plan**

**Risk & Complexity Assessment**

The Risk & Complexity Assessment will be completed at the end of every Phase in the Project lifecycle. The Project Manager is responsible to complete this assessment with the assistance of project team members.

Risk & Complexity Assessments	Category
Pre-Charter Risk & Complexity Category	3
Initiation Gate Risk & Complexity Category	2
Planning Gate Risk & Complexity Category	2
Event Driven Risk & Complexity Category	2

**Project Risk Management**

This project will follow the risk management processes outlined in the RA Modernization Program Risk Management Plan.

The master copy of this document is available in the RA Modernization Program Library in the Central Repository.

The risk management process helps the project team anticipate and respond to emerging risks throughout the duration of the project. The risk management process occurs throughout all phases of the project, from planning through execution and closeout. Project risks are logged and tracked in the Project Log Workbook (RAID Logs).

Figure 2 below illustrates the major activities associated with the key risk management process.

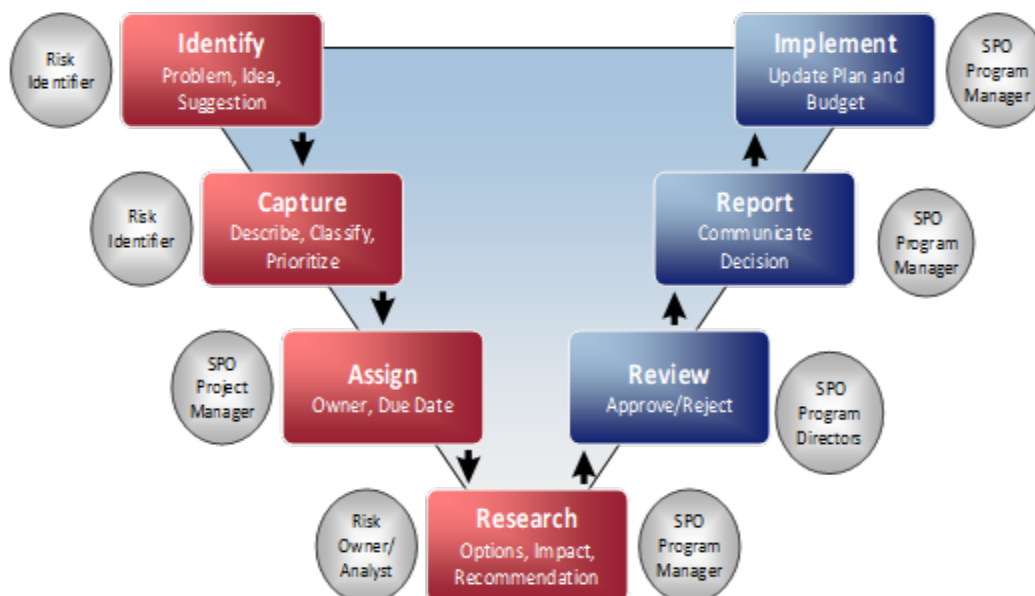

Figure 2: RA Modernization Program Risk Management Process

## VII. *Project Action Items*

Action items are unplanned tasks that occur during a project that are too small to be added to the schedule. These items must be within the scope of the project and are often tasks that support scheduled tasks, issue resolution, risk management, or some other aspect of the project. The action item log is created and maintained as part of the project tracking log.

Action items will be managed in the following manner:

- During status meetings, any stakeholder can raise an action item for discussion.
- The Project team will discuss the action item and determine if it warrants being monitored in the action item log.
- The project manager will enter the item in the log.
- The team will set the priority for the action item (high/medium/low), assign an action item owner, and set a planned completion date.
- At each subsequent status meeting, the action item(s) will be reviewed until they can be closed.

## VIII. *Project Issue Management*

This project will follow the issue management processes outlined in the RA Modernization Program Issue Management Plan.

The master copy of this document is available in the RA Modernization Program Library in the Central Repository.

An issue is an immediate problem that needs resolution. Acknowledging and addressing issues quickly ensures that they do not impact the scope of the project. Project issues are logged and tracked in the Project Log Workbook (RAID Logs).

### **Decisions**

Decisions are leadership answers to questions that arise during the project. The decision log is created and maintained as part of the project tracking log.

Decisions will be managed in the following manner:

- During status meetings, any stakeholder can raise a question that requires a decision.
- If the team determines a decision needs to be made, the project manager will enter it in the decision log.
- The team will discuss the impact to the project, assign a decision maker, and set a date for when the decision is needed.
- At each subsequent status meeting, the decision item(s) will be reviewed until they can be closed.

## **IX. *Project Change Management***

This project will follow the change processes outlined in the RA Modernization Program Change Management Plan.

The master copy of this document is available in the RA Modernization Program Library in the Central Repository.

The *RA Modernization Change Management Plan*, defines the approach and provides the processes for initiating, defining, researching, evaluating, reviewing, prioritizing, managing cost, approving or rejecting the change requests (CRs), and communicating the status of the change that may affect the success of the BPO project.

## **X. *Project Schedule Management***

The project schedule for this project will be stored in the Central Repository 19 – BPO – Business Process Optimization Project Deliverables folder.

### **Schedule Maintenance**

The project schedule maintenance is an on-going activity that tracks the work performed, the timeframes for when the work has been or will be completed and progress against the baseline work estimates and timelines. To effectively track the program progress, the project schedule is kept current, and reflects all work that needs to be performed, in accordance with the RA Modernization Program Schedule Management Plan.

If a change to the project schedule or scope is needed, the Project Manager may pursue a change request as described in the *RA Modernization Change Management Plan*.

***XI. Project Cost Management***

The attached file contains the KPMG deliverables per the contract and their associated costs. The project costs are tracked in ServiceNow.

C3256 - RA MOD  
(BPO) - Amendment

***XII. Project Organizational Change Management***

An initial impact analysis was performed, and the project did not require organizational change management.

REEMPLOYMENT ASSISTANCE SYSTEM MODERNIZATION

FROM GENERAL REVENUE FUND . . . . 36,000,000

From the funds in Specific Appropriation 2202A, \$36,000,000 in nonrecurring funds from the General Revenue Fund is provided for the modernization of the reemployment assistance system that complies with section 282.206, Florida Statutes. Of these funds, \$19,320,000 is provided for increased maintenance and operations of the system, \$15,510,000 is provided for system modernization, and \$1,170,000 is provided to competitively procure a private sector provider with experience in conducting independent verification and validation (IV&V) services of public sector information technology projects to provide IV&V services for all department and vendor staff working to modernize and maintain the system. From these funds, \$31,170,000 shall be held in reserve, and \$4,830,000 is released to the department for ongoing maintenance and operations. The department is authorized to submit quarterly budget amendments requesting release of these funds pursuant to the provisions of chapter 216, Florida Statutes, and based on the department's planned quarterly expenditures. Release is contingent upon the procurement of the IV&V vendor and the approval of a detailed operational work plan and monthly spend plan that identifies all work activities and costs budgeted for Fiscal Year 2021-2022.

Quarterly IV&V reports shall include technical reviews of project deliverables submitted or accepted within the reporting period and assessments of the department's project management and governance. The IV&V contract shall require that all deliverables be simultaneously submitted to the executive director of the department, the Executive Office of the Governor's Office of Policy and Budget, the chair of the Senate Appropriations Committee, the chair of the House Appropriations Committee, and the Florida Digital Service. The contracted provider shall be made readily available to provide all project related data to the Florida Digital Service in support of their project oversight responsibilities pursuant to section 282.0051, Florida Statutes. The department shall provide monthly project status reports to the Executive Office of the Governor's Office of Policy and Budget, the chair of the Senate Appropriations Committee, the chair of the House Appropriations Committee, and the Florida Digital Service. Each status report must include ongoing system maintenance activities and progress made to date for each project milestone, deliverable, and task order, planned and actual completion dates, planned and actual costs incurred, and any current project issues and risks.

Federal Coronavirus State Fiscal Recovery Fund

REEMPLOYMENT ASSISTANCE SYSTEM MODERNIZATION

The nonrecurring sum of \$56,400,000 from the General Revenue Fund is appropriated to the Department of Economic Opportunity for the modernization of the Reemployment Assistance system that complies with section 282.206, Florida Statutes. **These funds shall be held in reserve.**

**Release of these funds is contingent upon the full release of funds provided for system modernization in Specific Appropriation 2202A.** The department is authorized to submit quarterly budget amendments requesting release of these funds pursuant to the provisions of chapter 216, Florida Statutes, and based on the department's planned quarterly expenditures. Release is contingent upon the approval of a detailed operational work plan and monthly spend plan that identifies all work activities and costs budgeted for Fiscal Year 2021-2022.
