TOPIC: Timeline for the impending Employ Florida Marketplace version 10 upgrade

Employ Florida Marketplace (EFM) Update

The purpose of this EFM TIPS is to notify the Regional Workforce Boards of the timeline for the impending Employ Florida Marketplace version 10 upgrade. The site will be placed in “read only” mode starting at 5 p.m. Friday 6/26 and will remain so for approximately 24 hours. As in the past, while in “read only” mode the site is available for use by individual and employers researching. However, users cannot apply for jobs, create/edit resumes, create job orders, send messages to applicants, etc. Staff will be able to log in to view files but should NOT create case notes or any other type of records. Data will NOT be saved to the database. There will be a large red text message announcing this on the home page. We have also attached a copy of the “Release Notes for EFM Version 9.2 to 10 Upgrade” that was provided to the Agency of Workforce Innovation by Geographic Solutions. There is also an attachment for the Regional Security Officers on the Administrative Site changes for group privileges.

If you have any questions, please contact [Ken McDonald](#).

Thank you.
