TOPIC: Employ Florida Marketplace (EFM) Notification to Jobseekers

Employ Florida Marketplace (EFM) Update

Background

The service code 590 - ****"Notification to Jobseeker of potential job" was created to notify qualified job-seekers of a potential job that matches their particular skill set. The intent of service code 590 is to notify the most qualified candidates of a potential job. Care should be taken to verify that potential candidates meet **all** the qualifications for a specific job prior to notification. Matching sources should include documented job skills, work experience listed on the individual's background or resume', educational background information, wage requirements and any other information that would screen out a person from referral for the job. The code should not be used as a mass matching effort.

Code 590 - ****"Notification to Jobseeker of potential job" is a reportable service which commences or extends participation. Care should be exercised when using this service code. When a thorough screening is not conducted it may result in negative responses by both employers who receive a flood of unqualified applicants and job seekers who are notified of a job for which they do not qualify for.

Thank you.
