## **EFM TIP: Password Changes in the Employ Florida Marketplace**

To increase the security of the Employ Florida Marketplace system, Geographic Solutions, Inc. will implement new password requirements for users in two phases.

### **Phase One**

The phase one change will prompt users with passwords that contain disallowed characters to change their current password to comply with a new set of guidelines. This phase will rollout within the next two days and will **only** affect users who currently have disallowed characters in their current password. Please view this [presentation](#) for additional information and screenshots of the affected EFM screens.

### **Phase Two**

Phase two will require that stronger passwords are created for all users. This phase is currently under discussion and advanced notice will be provided with an exact rollout date.
