## OVERVIEW

---

### Introduction and Purpose

The Internal Control Questionnaire and Assessment (ICQ) was developed by the Florida Department of Economic Opportunity (DEO), Bureau of Financial Monitoring and Accountability, as a self-assessment tool to help evaluate whether a system of sound internal control exists within the Local Workforce Development Board (LWDB). An effective system of internal control provides reasonable assurance that management's goals are being properly pursued. Each LWDB's management team sets the tone and has ultimate responsibility for a strong system of internal control.

The self-assessment ratings and responses should reflect the controls in place or identify areas where additional or compensating controls could be enhanced. When the questionnaire and the certification are complete, LWDB's submit them to DEO by uploading to SharePoint.

### Definition and Objectives of Internal Control

Internal control is a process, effected by an entity's board of directors, management, and other personnel, designed to provide "reasonable assurance" regarding the achievement of objectives in the following categories:

- Effectiveness and efficiency of operations
- Reliability of financial reporting
- Compliance with applicable laws and regulations

The concept of reasonable assurance implies the internal control system for any entity will offer a reasonable level of assurance that operating objectives can be achieved.

#### ***Need for Internal Control***

Internal control helps to ensure the direction, policies, procedures, and practices designed and approved by management and the governing board are put in place and are functioning as designed/desired. Internal control should be designed to achieve the objectives and adequately safeguard assets from loss or unauthorized use or disposition, and to provide assurance that assets are used solely for authorized purposes in compliance with federal and state laws, regulations, and program compliance requirements. Additionally, Title 2, Part 200, Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards, § 200.303 Internal controls, states:

The non-federal entity must:

- (a) Establish and maintain effective internal control over the federal award that provides reasonable assurance that the non-federal entity is managing the federal award in compliance with Federal statutes, regulations, and the terms and conditions of the federal award. These internal controls should be in compliance with guidance in “Standards for Internal Control in the Federal Government” issued by the Comptroller General of the United States and the “Internal Control Integrated Framework”, issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).
- (b) Comply with federal statutes, regulations, and the terms and conditions of the federal awards.
- (c) Evaluate and monitor the non-federal entity's compliance with statutes, regulations, and the terms and conditions of federal awards.
- (d) Take prompt action when instances of noncompliance are identified, including noncompliance identified in audit findings.
- (e) Take reasonable measures to safeguard protected personally identifiable information and other information the federal awarding agency or pass-through entity designates as sensitive, or the non-federal entity considers sensitive consistent with applicable federal, state, and local laws regarding privacy and obligations of confidentiality.

### ***What Internal Control Cannot Do***

As important as an internal control system is to an organization, an effective system will not guarantee an organization’s success. Effective internal control can keep the right people, such as management and the governing board members, informed about the organization’s operations and progress toward goals and objectives. However, this control cannot protect against economic downturns or make an understaffed entity operate at full capacity. Internal control can only provide *reasonable, but not absolute, assurance* the entity’s objectives can be met. Due to limitations inherent to all internal control systems, breakdowns in the internal control system may be caused by a simple error or mistake, or by faulty judgments made at any level of management. In addition, control may be circumvented by collusion or by management override. The design of the internal control system is dependent upon the resources available, which means there must be a cost-benefit analysis performed as part of designing the internal control system.

### ***Five Components of Internal Control***

- **Control Environment** – is the set of standards, processes, and structures that provide the basis for carrying out internal control across the organization. The board of directors and senior

management establish the tone at the top regarding the importance of internal control and expected standards of conduct.

- **Risk Assessment** – involves a dynamic and iterative process for identifying and analyzing risks to achieving the entity’s objectives, forming a basis for determining how risks should be managed. Management considers possible changes in the external environment and within its own business model that may impede its ability to achieve objectives.
- **Control Activities** – are the actions established by policies and procedures to help ensure that management directives mitigate risks so the achievement of objectives are carried out. Control activities are performed at all levels of the entity and at various stages within business processes, and over the technology environment.
- **Information and Communication** – are necessary for the entity to carry out internal control responsibilities in support of achieving its objectives. Communication occurs both internally and externally and provides the organization with the information needed to carry out day-to-day internal control activities. Communication enables personnel to understand internal control responsibilities and their importance to the achievement of objectives.
- **Monitoring** – are ongoing evaluations, separate evaluations, or some combination of the two used to ascertain whether the components of internal controls, including controls to affect the principles within each component, are present and functioning. Findings are evaluated and deficiencies are communicated in a timely manner, with serious matters reported to senior management and to the board of directors.

## Makeup of the ICQ

Subsequent sections of this document emphasize the “17 Principles” of internal control developed by the COSO and presented in the Internal Controls – Integrated Framework. The five components of internal control listed above are fundamentally the same as the five standards of internal control and reflect the same concepts as the “Standards for Internal Control in the Federal Government.”

The principles are reflected in groupings of questions related to major areas of control focus within the organization. Each question represents an element or characteristic of control that is or can be used to promote the assurance that operations are executed as management intended.

It should be noted that entities may have adequate internal control even though some or all of the listed characteristics are not present. Entities could have other appropriate internal control operating effectively that are not included here. The entity will need to exercise judgment in determining the most appropriate

and cost effective internal control in any given environment or circumstance to provide reasonable assurance for compliance with federal program requirements.

## Completing the Questionnaire

On a scale of 1 to 5, with “1” indicating the area of greatest need for improvements in internal control and “5” indicating that a very strong internal control exists, select the number that best describes your current operating environment. Please provide details in the comments/explanations column for each statement with a score of 1 or 2. **For questions requiring a narrative, please provide in the comments/explanations column.**
