Narratives

Disaster Damage:

Hurricane Irma was a Category 4 hurricane that made landfall in the middle of the Florida Keys, then turned northward making a second landfall near Marco Island and continued to progress north through the center of the state. Irma capped an active hurricane season by impacting nearly the entire Florida peninsula with strong winds, rain and storm surges. Hurricane Irma produced moderate rainfall across much of western and central portions of Florida. The maximum reported storm-total rainfall was nearly 16 inches in Fort Pierce and in Oviedo (north of Orlando) a measurement of 14.6 inches was recorded. The entire southwestern seaboard of Florida received between 6 – 14 inches of rain and localized heavy rainfall was seen through Pasco and Polk counties as Irma moved northward. The most significant concentration of damage occurred in the Florida Keys, where the hurricane made landfall. Hurricane Irma left this chain of islands connected by a span of 40 bridges with 1,200 homes destroyed and an additional 3,000 homes significantly damaged. Monroe and Miami-Dade counties also recorded storm surges over 15 feet in some locations. Storm surges in Duval County along the St. Johns River and its tributaries were extreme in some cases. The fresh water outflows from the rivers slowed the retreat of storm surges, which lengthened the flooding period over the days following Irma.

Recovery Needs:

The three core sectors of recovery – housing, infrastructure and economic development – forms the basis for the decisions on all recovery needs. Estimated total impacts from Hurricane Irma is about \$17.4 billion across the three sectors and total estimated unmet needs top \$10.9 billion. Evidence indicates that the housing sector has the most remaining unmet need (62.51 percent), followed by the economy (33.95 percent) and infrastructure (3.54 percent). Most of Florida's 20 million people (92 percent) reside in the impacted areas. The impacted areas of Hurricane Irma have a greater percentage of older residents (23 percent) per county than the entire state of Florida. These impacted counties also have more occupied housing units, more people with disabilities, lower median and per capita incomes and more people living in poverty than the state as a whole. Poverty is an indicator of places that might see greater impacts from disasters because of a general lack of ability to prepare for shocks and stresses. The recovery efforts must meet one of the program's three National Objectives: (1) benefiting low-and moderate- income (LMI) persons, (2) aiding in the prevention or elimination of slums or blight, or (3) meeting a need having particular urgency (urgent need).

Activity Description:

A Public Housing Authority with 544 1-4 unit structures situated on a multi-acre site. The PHA was built in 5 phases from 1974-2001. Construction of each unit consists of cement block. Hurricane Irma impacted the PHA, mostly due to wind damages. 423 units are eligible for repairs. Most repairs consist of roofing repair, minor exterior , replacement/repair of windows and/or limited interior repairs. This Project is not located in a Flood Zone.

Location Description:

Florida’s most impacted and distressed communities are divided into the following categories:

HUD Most Impacted counties and zip codes:

- Counties: Brevard, Broward, Clay, Collier, Duval, Hillsborough, Lee, Miami-Dade, Monroe, Orange, Osceola, Palm Beach, Polk, St. Lucie and Volusia counties;
- ZIP codes: 32084 and 32145 (St. Johns County), 32091 (Bradford County), 32136 (Flagler County), 32771 (Seminole County), 33935 and 33440 (Hendry County), 33523 (Pasco County), 33825 and 33870 (Highlands County) and 34266 (DeSoto County).

Activity Description:

The Housing Repair and Replacement Program is a centralized housing rehabilitation or replacement program for low- and moderate-income families impacted by Hurricane Irma. DEO will manage and complete the construction process for the rehab or reconstruction of damaged homes on behalf of eligible applicants. With the assistance of staff and vendors, the state will work with a pool of qualified contractors assigned to repair, reconstruct or replace damaged properties. The program will pay contractors directly and no funds will be paid to homeowners. Applicants will not select their own contractors. Applicants will be required to enter into agreements with DEO setting forth the terms and conditions of the program. This program is open to homeowners and owners of rental properties with the condition that it is agreed upon to meet affordability requirements. Rental units must be affordable as prescribed in the Federal Register notice. If currently occupied, the tenants will have the opportunity to move back into the unit or units created with other CDBG-DR activities. DEO proposes the following housing assistance activities under this program:

- Repairs to, reconstruction or replacement of housing units damaged by Hurricane Irma, which may include bringing the home into code compliance and mitigation against future storm impacts, including elevation.
- The completion of work to homes that have been partially repaired.
- Repairs to, or replacement of, manufactured, modular and mobile homes impacted by Hurricane Irma.
- Temporary Housing Assistance based on individual homeowners needs and their participation in the Housing Repair Program.
- Temporary Housing Assistance based on individual tenant needs and their participation in the Housing Repair Program.
- Acquisition of substantially-damaged housing units for housing redevelopment or buyouts of substantially-damaged properties may also be considered.

The Housing Repair and Replacement Program is a grant program and requires applicants to be primary

resident homeowners or property owners of rental property at the time of the Irma storm event (September 10, 2017). HUD's regulations regarding the use of grant funding for Hurricane Irma recovery state that an alternative requirement for housing rehabilitation is assistance for second homes. HUD is instituting an alternative requirement to the rehabilitation provisions at 42 U.S.C. 5305(a)(4) as follows: Properties that served as second homes at the time of the disaster, or following the disaster, are not eligible for rehabilitation assistance or housing incentives. A second home is defined under this notice as a home that is not the primary residence of the owner, a tenant, or any occupant at the time of the storm or at the time of application for assistance. DEO may adopt policies and procedures that provide for limited exceptions to providing assistance to a second home in order to meet specific disaster recovery needs (e.g., adding affordable housing capacity); provided however that such exceptions are developed in consultation with and approved by HUD prior to implementation. DEO can verify a primary residence using a variety of documentation including, but not limited to, voter registration cards, tax returns, homestead exemptions, driver's licenses and rental agreements. Additionally, seasonal, short-term and vacation rental properties are not eligible for assistance.

Properties with rehabilitation and/or elevation cost estimates that meet or exceed 75 percent of a comparable reconstruction or replacement house as determined by standard operating procedures and policies will provide homeowners the option to select a reconstructed or replacement house. Properties with rehabilitation and/or elevation cost estimates that meet or exceed a comparable reconstruction or replacement house will be limited to reconstruction or replacement as a more cost reasonable option. Housing Repair and Replacement Program homeowner occupant participants household incomes cannot exceed 120 percent Area Median Income (AMI).

Location Description:

Florida's most impacted and distressed communities are divided into the following categories:

HUD Most Impacted counties and zip codes:

- Counties: Brevard, Broward, Clay, Collier, Duval, Hillsborough, Lee, Miami-Dade, Monroe, Orange, Osceola, Palm Beach, Polk, St. Lucie and Volusia counties;
- ZIP codes: 32084 and 32145 (St. Johns County), 32091 (Bradford County), 32136 (Flagler County), 32771 (Seminole County), 33935 and 33440 (Hendry County), 33523 (Pasco County), 33825 and 33870 (Highlands County) and 34266 (DeSoto County).

Activity Description:

The Housing Repair and Replacement Program is a centralized housing rehabilitation or replacement program for low- and moderate-income families impacted by Hurricane Irma. DEO will manage and complete the construction process for the rehab or reconstruction of damaged homes on behalf of eligible applicants. With the assistance of staff and vendors, the state will work with a pool of qualified contractors assigned to repair, reconstruct or replace damaged properties. The program will pay contractors directly and no funds will be paid to homeowners. Applicants will not select their own contractors. Applicants will be required to enter into agreements with DEO setting forth the terms and conditions of the program. This program is open to homeowners and owners of rental properties with the condition that it is agreed upon to meet affordability requirements. Rental units must be affordable as prescribed in the Federal Register notice. If currently occupied, the tenants will have the opportunity to move back into the unit or units created with other CDBG-DR activities. DEO proposes the following housing assistance activities under this program:

- Repairs to, reconstruction or replacement of housing units damaged by Hurricane Irma, which may include bringing the home into code compliance and mitigation against future storm impacts, including elevation.
- The completion of work to homes that have been partially repaired.
- Repairs to, or replacement of, manufactured, modular and mobile homes impacted by Hurricane Irma.
- Temporary Housing Assistance based on individual homeowners needs and their participation in the Housing Repair Program.
- Temporary Housing Assistance based on individual tenant needs and their participation in the Housing Repair Program.
- Acquisition of substantially-damaged housing units for housing redevelopment or buyouts of substantially-damaged properties may also be considered.

The Housing Repair and Replacement Program is a grant program and requires applicants to be primary resident homeowners or property owners of rental property at the time of the Irma storm event (September 10, 2017). HUD's regulations regarding the use of grant funding for Hurricane Irma recovery state that an alternative requirement for housing rehabilitation is assistance for second homes. HUD is instituting an alternative requirement to the rehabilitation provisions at 42 U.S.C. 5305(a)(4) as follows: Properties that served as second homes at the time of the disaster, or following the disaster, are not eligible for rehabilitation assistance or housing incentives. A second home is defined under this notice as a home that is not the primary residence of the owner, a tenant, or any occupant at the time of the storm or at the time of application for assistance. DEO may adopt policies and procedures that provide for limited exceptions to providing assistance to a second home in order to meet specific disaster recovery needs (e.g., adding affordable housing capacity); provided however that such exceptions are developed in consultation with and approved by HUD prior to implementation. DEO can verify a primary residence using a variety of documentation including, but not limited to, voter registration cards, tax returns, homestead exemptions, driver's licenses and rental agreements. Additionally, seasonal, short-term and vacation rental properties are not eligible for assistance. Properties with rehabilitation and/or elevation cost estimates that meet or exceed 75 percent of a comparable

reconstruction or replacement house as determined by standard operating procedures and policies will provide homeowners the option to select a reconstructed or replacement house. Properties with rehabilitation and/or elevation cost estimates that meet or exceed a comparable reconstruction or replacement house will be limited to reconstruction or replacement as a more cost reasonable option. Housing Repair and Replacement Program homeowner occupant participants household incomes cannot exceed 120 percent Area Median Income (AMI).

Florida Housing Finance Corporation	State Agency	\$ 2,452,685.00

Location Description:

Florida's most impacted and distressed counties and ZIP codes including Brevard, Broward, Clay, Collier, Duval, Hillsborough, Lee, Miami-Dade, Monroe, Orange, Osceola, Palm Beach, Polk, St. Lucie and Volusia counties; and 11 separate ZIP codes outside of these areas (32084 and 32145 in St. Johns County, 32091 in Bradford County, 32136 in Flagler County, 32771 in Seminole County, 33935 and 33440 in Hendry County, 33523 in Pasco County, 33825 and 33870 in Highlands County and 34266 in DeSoto County).

Activity Description:

DEO will work in partnership with the Florida Housing Finance Corporation (FHFC) to manage a program that will result in the construction of new affordable rental housing in areas impacted by Hurricane Irma and in areas that experienced a population influx because of migration from Puerto Rico and the U. S. Virgin Islands due to Hurricane Maria. FHFC will serve as a sub-recipient to DEO, administering one or more competitive solicitations seeking applications from for-profit and not-for-profit developers and public housing authorities to build affordable housing in targeted areas of the state. The Workforce Affordable Rental New Construction Program

will provide two different funding mechanisms to facilitate the creation of quality, affordable housing units to help Florida build resiliency and alleviate the rental stock shortage caused by the storms in the most impacted areas of the state. The term “workforce” under this program is defined to represent LMI individuals. This affordable housing is also intended to serve vulnerable population and reduce the risk of homelessness by requiring certain funded developments to set aside at least 10 percent of units to serve extremely low income (ELI) households at area median incomes set by the Corporation, and to set aside at least 5 percent of those ELI units to serve Homeless and Persons with Special Needs as defined in Florida Statutes. CDBG-DR funds will be provided as zero-interest, non-amortizing loans (including forgivable loans) to qualified developers to leverage other sources of funds and as stand-alone financing to support development. Development will be new construction and may include re-development of uninhabitable dwellings. Any new rental housing will have an affordability period of 20 years. CDBG-DR funds will be awarded to eligible applicants through a competitive application process.

Where appropriate in the HUD-identified most-impacted and distressed communities, CDBG-DR funds can be effectively leveraged with 4 percent Low Income Housing Tax Credits, local or state Tax-Exempt Bond Financing, 9 percent Low Income Housing Tax Credits in limited high-cost areas or other local financing to produce new affordable housing rental units. High-cost areas are locations where development costs are so high that a bond/non-competitive 4 percent LIHTC/CDBG-DR approach (or CDBG-DR alone) will not be enough. The primary leveraging of funds will be tax credits. The CDBG-DR funds will be provided as zero-interest forgivable loans to eligible private for-profit and nonprofit housing developers, and public housing authorities.

For units developed using funding under the minimum set aside in the Florida Keys, leveraging of CDBG-DR funds with other sources of financing to build larger developments is not always the best approach due to the unique land use issues in Monroe County. Therefore, in addition to traditional rental developments, other varied rental development types will be allowed and prioritized. These can include single family rental, scattered site rental developments and rental developments that are part of a Community Land Trust (CLT). For these developments, CDBG-DR funds may be used to provide stand-alone financing or may be the primary source of funds needed to finance the development.

Maximum subsidy limits will follow the applicable HOME Investment Partnership Program per-unit limits and will target low and moderate-income households. The units created under this program, at a minimum, will follow the established HOME Program Rent schedule or any other funding source used to finance the development with a more restrictive rent schedule and will be set-aside for the required CDBG-DR affordability period plus the longer affordability periods required by the additional financing source (such as FHFC or local Tax-Exempt Bonds and/or Low-Income Housing Tax Credits for example). In the event one program has less restrictive requirements, the more stringent program requirements will apply to ensure all requirements are met. To be considered for funding, eligible applicants will be required to show ability to proceed with construction, demonstrate experience in developing and managing affordable housing in size and scope of the proposed development and have a financing structure that leverages CDBG-DR funding. To ensure feasibility, the proposed development will be underwritten in accordance with underwriting standards in place at FHFC.

Any new housing construction will meet elevation requirements per the February 9, 2018, Federal Register Notice and the NFIP purchase requirements prior to the commencement of construction activities in compliance with page 61 and page 65 of the Federal Register Notice. Detailed policies and procedures will be developed later by FHFC.

City of Jacksonville	Local Government	\$ 5,000,000.00

Location Description:

City of Jacksonville

Activity Description:

The City will acquire and demolish homes located within the Washington Heights Neighborhood that are also within the Special Flood Hazard Area. Actions include conducting environmental reviews and testing, appraisals of the properties, real estate closings and subsequent demolition of the property. All individuals who are impacted by the acquisition of properties through this Program will receive assistance in relocating to an affordable property outside of the floodplain. This includes tenants and homeowners as well as assistance in finding suitable rental properties for landlords interested in purchasing rental property to be used for LMI purposes.

\$ 5,000,000.00

Location Description:

City of Marathon

Activity Description:

The home buyout program is a rare opportunity to remove Hurricane Irma impacted unsafe structures, which threaten public health and safety. It will allow us to permanently remove the highest risk homes in the FEMA designated Velocity Zones that received up to 9 feet of storm surge. The NFI P designated repetitive loss structures and severe repetitive loss structures, mobile homes, as well as, non-code compliant aging structures which were destroyed by Irma. In the Florida Keys, these aging structures and mobile homes represented the workforce housing. By removing these non-code compliant vulnerable structures, we hope to create safer and resilient living environments for all City of Marathon and Monroe County residents. The City has received twenty (20) confirmed and as yet unranked applicants for the VHBP.

Responsible Organization

City of Palm Bay

Organization Type

Local Government

Proposed Budget

\$ 694,179.00

Location Description:

City of Palm Bay

Activity Description:

The proposed project is the acquisition and demolition of 13 single-family homes located at Cimarron Circle NE in Palm Bay. These 13 properties have a historic record of repetitive loss claims to the National Flood Insurance Program, experience flooding and damage resulting from Hurricane Irma, and a local Ordinance currently prohibits any additional building permits for repairs to these homes unless the repairs bring the entire structure up to current building code, including elevation above current floodplain. Once acquired and demolished, the City will perpetually retain ownership of the land and no future development will be permitted.

Proposed Budget

\$ 5,000,000.00

Location Description:

Clay County

Activity Description:

Clay County's long-term community planning efforts encompasses proactive measures to protect its residents from the negative impacts from natural disasters. These efforts include improving community safety by encouraging residents to relocate out of the flood plain and removing existing structures within the flood plain and returning them to greenspace. By returning these areas to greenspace, the natural floodway is restored; future flood events will have increased areas for natural water flow reducing the strain on emergency services during an active emergency event as well as overall emergency management for the county. These resources can be directed to focusing on other impacted areas of a disaster and allow for the development for additional mitigation and long-term resiliency measures.

Columbia County

Proposed budgets for organizations carrying out Activity:

Responsible Organization

Columbia County

Organization Type

Local Government

Proposed Budget

\$ 281,968.25

Location Description:

Columbia County

Activity Description:

The County's goal is to prioritize assistance to the most vulnerable community members who have faced repetitive loss within the targeted low- and moderate- income (LMA) project area. Due to the age of the structure and repetitive losses, many of these homes are less resilient (e.g. not elevated or up to code). As a result, these households are burdened with significantly higher recovery costs compared to residents in newer homes that are built to more current standards. These financial burdens reduce the overall economic resiliency for these households; for example, it reduces funds available for other critical areas such as healthcare. By offering buyout to these community members, the program will not only relocate these homeowners into safer neighborhoods that are more resilient to natural disasters, but will also foster secondary benefits, such as reduced flood-related incidents of illness, post-storm.

Location Description:

Flagler County

Activity Description:

This project, which is in the 32136 most impacted and distressed area, would involve purchasing two homes for the pre-event market value of her house (less any duplication of benefits), demolishing the structure, hauling off the debris, and returning the land to open space. Per grant requirements, this land would be deeded to remain open space in perpetuity.

Proposed Budget

\$ 0.00

Location Description:

Islamorada

Activity Description:

The proposed project entails the purchase of one (1) property substantially damaged by Hurricane Irma. The property is located at 82192 Old Highway on Upper Matecumbe Key; Following the purchase of the property, the Village will demolish the structures, clear the land, revegetate the property and maintain the property as open space and possibly as part of future stormwater management system. The homeowner would purchase new residential property pursuant to the terms of the housing replacement assistance program.

Miami-Dade County

Proposed budgets for organizations carrying out Activity:

Responsible Organization	Organization Type	Proposed Budget
Miami-Dade County	Unknown	\$ 4,521,161.00

Location Description:

Miami-Dade County

Activity Description:

Through this funding program, Miami-Dade County would acquire ten properties damaged during Hurricane Irma. The County plans to convert the land into open space for stormwater retention and enhance each parcel with additional stormwater infrastructure. The acquisition of damaged homes would provide sorely needed relief to interested residents, allowing them to relocate to a safe and sanitary home. Some residents are still displaced from their home as it is not safe to inhabit the structure after damages sustained from Hurricane Irma, causing hardship well beyond the immediate aftermath of the storm. Restoring flood-prone parcels to open space would also provide flood mitigation benefits to the surrounding properties during storms. Having the ability to increase stormwater detention within these watersheds will increase the community's resilience in future hurricanes and heavy rainfall events. This project would also benefit surrounding communities between storms because it could provide a recreational space as an additional co-benefit. The acquisition projects could improve public health and water quality in the neighborhoods by removing the septic system that are compromised by high groundwater levels or by flooding events.

Proposed Budget

\$ 15,000,000.00

Location Description:

Monroe County

Activity Description:

The voluntary home buyout program was created to encourage risk reduction through the purchase of residential property in high floodrisk areas impacted by Hurricane Irma. This project allows Monroe County to purchase private residential properties at the pre-Hurricane

Irma fair market value for both the land and the structure. Priority properties are located in highly flood and storm surge vulnerable areas, low- and moderate-income areas. Any existing structures will be demolished, and the property will be used for permanent open space. Most of the homes identified for the Voluntary Home Buyout Program are homes that were substantially damaged or destroyed as a result of Hurricane Irma. Many of the homeowners were either non-insured or under insured due to the very high cost of wind and flood insurance in Monroe County. Removing these high-risk structures will reduce risk for the community.

Location Description:

Town of Orange Park

Activity Description:

The Town of Orange Park - Voluntary Home Buyout (TOP-VHB) program includes 18 properties within the town limits, located in floodplain areas that impact many low- to moderate-income areas (Project Site Map, Attachment B and Floodplain Map, Attachment K) that were impacted by Hurricane Irma. The town will acquire these properties from owners who have signed a Voluntary Acknowledge Form (Attachment A). The TOP-VHB plan will include demolition of structures on the acquired properties and ensure that these properties will be held by the town for conservation, recreation, or storm water management purposes in perpetuity. This is the first time the Town of Orange Park has participated in the VHB program and the opportunity will greatly assist the town in resolving excess storm water runoff issues which have plagued the Town for many years.

State Agency

Proposed Budget

\$ 40,839,905.00

Location Description:

At least 80% of funds will be utilized to provide services within the HUD-identified most-impacted and distressed areas. Up to 20% of funds will be utilized to provide services within state-identified most-impacted and distressed areas.

Activity Description:

Small businesses are the lifeblood of local economies across Florida. Many of these small businesses were impacted by Hurricane Irma and continue to require assistance recovering from the storm. To assist these businesses, DEO will create a program providing grants to for-profit and non-profit small businesses that still require assistance to fully recover. Businesses may use funds for the replacement of equipment and inventory damaged by Hurricane Irma. By assisting small businesses in impacted areas, DEO will support job creation and job retention in local communities to keep Florida's economy strong. Program design is currently in progress. At least 80% of funds will be provided to businesses within the HUD-identified most-impacted and distressed areas. Up to 20% of funds will be provided to businesses within state-identified most-impacted and distressed areas.

Activity Description:**HRRP Mutlifamily Activity Deliverable**

The Housing Repair and Replacement Program is a centralized housing rehabilitation or replacement program for low- and moderate-income families impacted by Hurricane Irma. DEO will manage and complete the construction process for the rehab or reconstruction of damaged homes on behalf of eligible applicants. With the assistance of staff and vendors, the state will work with a pool of qualified contractors assigned to repair, reconstruct or replace damaged properties. The program will pay contractors directly and no funds will be paid

to homeowners. Applicants will not select their own contractors. Applicants will be required to enter into agreements with DEO setting forth the terms and conditions of the program. This program is open to owners of rental properties with the condition that it is agreed upon to meet affordability requirements of fifteen (15) year. Rental units must be affordable as prescribed in the Federal Register notice. If currently occupied, the tenants will have the opportunity to move back into the unit or units created with other CDBG-DR activities. DEO proposes the following housing assistance activities under this program:

- Repairs to, reconstruction or replacement of housing units damaged by Hurricane Irma, which may include bringing the home up to program standards and mitigation against future storm impacts, including elevation.
- The completion of work to homes that have been partially repaired.
- Repairs to, or replacement of, manufactured, modular and mobile homes impacted by Hurricane Irma.
- Temporary Housing Assistance based on individual homeowners needs and their participation in the Housing Repair Program.
- Temporary Housing Assistance based on individual tenant needs and their participation in the Housing Repair Program.
- Acquisition of substantially-damaged housing units for housing redevelopment or buyouts of substantially-damaged properties may also be considered.

The Housing Repair and Replacement Program is a grant program and requires applicants to have owned the rental property at the time of the Irma storm event (September 10, 2017). HUD’s regulations regarding the use of grant funding for Hurricane Irma recovery state that an alternative requirement for housing rehabilitation is assistance for second homes. HUD is instituting an alternative requirement to the rehabilitation provisions at 42 U.S.C. 5305(a)(4) as follows: Properties that served as second homes at the time of the disaster, or following the disaster, are not eligible for rehabilitation assistance or housing incentives. A second home is defined under this notice as a home that is not the primary residence of the owner, a tenant, or any occupant at the time of the storm or at the time of application for assistance. DEO may adopt policies and procedures that provide for limited exceptions to providing assistance to a second home in order to meet specific disaster recovery needs (e.g., adding affordable housing capacity); provided however that such exceptions are developed in consultation with and approved by HUD prior to implementation. DEO can verify a primary residence using a variety of documentation including, but not limited to, voter registration cards, tax returns, homestead exemptions, driver’s licenses and rental agreements. Additionally, seasonal, short-term and vacation rental properties are not eligible for assistance.

Properties with rehabilitation and/or elevation cost estimates that meet or exceed 75 percent of a comparable reconstruction or replacement house as determined by standard operating procedures and policies will provide homeowners the option to select a reconstructed or replacement house. Properties with rehabilitation and/or elevation cost estimates that meet or exceed a comparable reconstruction or replacement house will be limited to reconstruction or replacement as a more cost reasonable option. Housing Repair and Replacement Program homeowner occupant participants household incomes cannot exceed 120 percent Area Median Income (AMI).

Location Description:

Florida's most impacted and distressed counties and ZIP codes including Brevard, Broward, Clay, Collier, Duval, Hillsborough, Lee, Miami-Dade, Monroe, Orange, Osceola, Palm Beach, Polk, St. Lucie and Volusia counties; and 11 separate ZIP codes outside of these areas (32084 and 32145 in St. Johns County, 32091 in Bradford County, 32136 in Flagler County, 32771 in Seminole County, 33935 and 33440 in Hendry County, 33523 in Pasco County, 33825 and 33870 in Highlands County and 34266 in DeSoto County).

Activity Description:

DEO will create a voluntary program to encourage risk reduction through the voluntary purchase of residential property in high flood-risk areas. The Voluntary Home Buyout Program will be a state-managed buyout program that leverages FEMA Hazard Mitigation Grant Program (HMGP) funding where possible. Once the program launches, DEO will work with eligible local governments to pursue home buyout projects. Cities and counties that are interested in participating will have two potential funding options for pursuing home buyouts:

- Leverage CDBG-DR funding as match for projects that are also eligible for the HMGP.
- Use stand-alone CDBG-DR funds, located in low- and moderate-income areas, to buyout residential areas in support of permanent open space, supporting green infrastructure or other floodplain management systems.

Location Description:

At least 80% of funds will be utilized to provide services within the HUD-identified most-impacted and distressed areas. Up to 20% of funds will be utilized to provide services within state-identified most-impacted and distressed areas.

Activity Description:

The impacts of Hurricane Irma continue to pose significant challenges for residents of impacted communities to recover, including the ongoing need for construction activities to support housing repair and reconstruction. In order for residents of Florida to be able to continue to live and thrive in the state, skilled labor to support increased construction activity is vital. This identified unmet need for skilled labor is an opportunity for DEO to provide job training to assist Floridians looking for work in the construction field as well as providing a new labor force to support the increased construction needs of the Hurricane Irma recovery effort.

To ensure that there are resources to support the high demand of recovery work caused by Hurricane Irma, DEO will implement a workforce recovery training program focused on providing training in construction occupations. Job search and job placement services will also be provided to assist graduates of training to successfully obtain employment.

Location Description:

Services will be provided in the Tampa Bay area, Central Florida, and Southeast Florida.

Activity Description:

Hurricane Maria left devastating impacts on the island communities of Puerto Rico, forcing many families to flee to other parts of the United States seeking shelter and new opportunities. The State of Florida has served as a refuge for many of those displaced by Hurricane Maria. As new Floridians, these individuals are seeking out assistance in assimilating to the business climate and practices of the state. To ensure that there are resources to support these new Floridians, DEO will implement a public assistance program for new businesses and entrepreneurs who have migrated from Puerto Rico. These services will be provided in Spanish and will target specific communities that have received an influx of population following Hurricane Maria. Through this program, families impacted by storms in Puerto Rico will be able to establish thriving businesses and rebuild their lives in Florida.
