

## Virtual OneStop® Staff & Administrator Privileges Release Notes in V14.0 R1 (from V12.1)

Significant features and enhancements to Virtual OneStop® are summarized in the Feature Enhancements Release Notes (FERN). This document is an Appendix to the 14.0 FERN document, and is intended specifically for Virtual OneStop System Administrators. It lists and briefly describes the new privileges in the recent version 14.0 Administration system, which are used in defining the Staff Access (access that each Staff member will have in Virtual OneStop), and the Admin Access (access that each administrator user will have in the Administration site for the Virtual OneStop system).

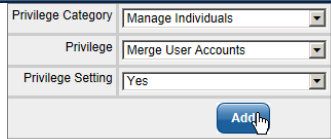

**Note:** In some instances, privileges associated with late version 12.1 deployment may be new to administrators upgrading from a 12.1 system. Therefore, some recent 12.1 privileges are also included in this document and indicated as 12.1 in the "Vers." column. For more thorough definitions of privileges and parameters, and their use in context to all privileges for a privilege group or a user type, refer to the complete version 14.0 VOS/VLMI System Administrator Guide.

### New Staff Privileges in the Admin Site

The following privileges are new privileges for Staff, which System Administrators access by:

- Selecting **Staff Administration ▶ Administer a Staff Account**
- Using the *Search for a Staff Member* screen to search for staff
- Selecting a staff member from the displayed search results

**Note:** New privileges for Administrators are covered in a separate table starting on page 10.

Section / Subsection (Privilege Name)	Default Value	Description of Staff Privilege	Vers.
<b>Search for a Staff Member</b>			
Username (Sign-in Name)	Blank Text field	No change to functionality. This field had "(Sign-In Name)" added to the label in v12.1 to differentiate it from the User Identifier or the System ID.	12.1
Email	Blank Text field	Users can search by the staff member's full email address . (Email address is a required field for a staff member record).	14.0
<b>Privilege Search Options</b>			
Privilege Category	No default value. [This row only displays if privilege options are set.]	The Privilege Search Options section provides additional search filters that let administrators modify search criteria to find staff members whose privilege settings match selected parameter values. Using a dynamic form that changes with each selection, administrators select, in order, the privilege category, the specific privilege, and the privilege setting, and then click the Add button to include this additional search criteria to the screen. For example, if you want to find staff members who have the "Merge User Account" privilege set to Yes, the you would select the parameter shown at right. Then the bottom of the search criteria would display the option with an options to remove that privilege. For, example... 	14.0
<b>Staff Member Privileges</b>			
<b>User Information</b>			
Password	Reset Password Check Box	This checkbox is the same as in 12.05, but it includes a listing, in red text, for the date, time and user who performed the last password reset. For example... 	12.1
