3.38 Procedures for setting up OSST DW accounts

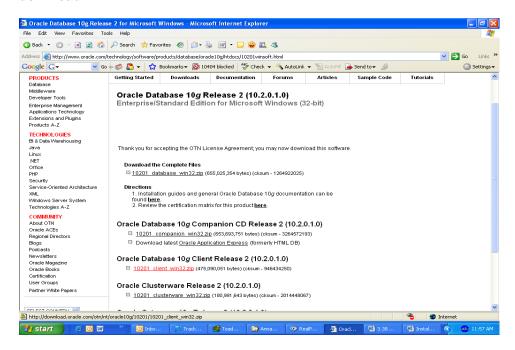

Install Oracle Client Software

 Navigate to the Oracle website http://www.oracle.com/technology/software/products/database/oracle10g/htdocs/10201winsoft.ht <u>ml</u> to download the oracle client software.

For Windows Vista users navigate to the Oracle website at this link http://www.oracle.com/technology/software/products/database/oracle10g/htdocs/10203vista.html to download the oracle client software for Windows Vista

Click the Accept License Agreement button.

Scroll down to Oracle Database 10*g* Client Release 2 (10.2.0.1.0) and click on the file to download.

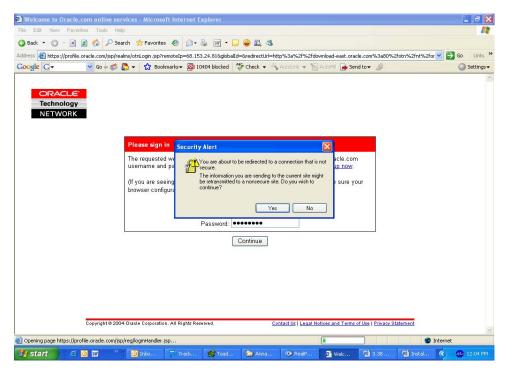

2) You will need to sign onto the OTN (Oracle Technology Network) using a username and password. If you do not have an account please create one by clicking on the sign up now link

Origin Date: 05/21/2007 Modified Date: 5/13/2009

 Once the username and password are entered click continue which will pop security alert window, Click yes to proceed

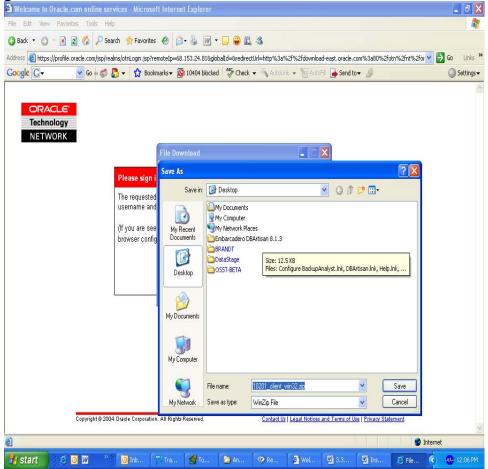

4) A window pops up with options to open / save file.

Origin Date: 05/21/2007 Modified Date: 5/13/2009

5) Select save option and select the location to save the file

Origin Date: 05/21/2007 Modified Date: 5/13/2009

- 6) Downloading this file will take some time depending upon the speed of internet connection
- 7) Once the download completes, unzip the file which will create a folder called client.
- 8) Navigate to the client folder and double click the file 'setup.exe' to begin the oracle client install

9) Once the installation begins you get the screen below. Select the option 'Runtime' and click next

Origin Date: 05/21/2007 Modified Date: 5/13/2009

- 10) Select the defaults for the remainder of the screens until you get a prompt for install.
- 11) After the installation finishes locate the file 'tnsnames.ora' which is present in the directory where the oracle client is installed under 'oracle\product\10.2.0\client_1\NETWORK\ADMIN'

For example if the oracle client software is installed on the C drive then the file can be located at C:\oracle\product\10.2.0\client_1\NETWORK\ADMIN

12) Open the tnsnames.ora file and add a new entry as shown below and save it.

```
OSSTDW =
(DESCRIPTION =
(ADDRESS_LIST =
(ADDRESS = (PROTOCOL = TCP)(HOST = osstdwh.awi.state.fl.us)(PORT = 1521))
)
(CONNECT_DATA =
(sid = osstprod)
)
```

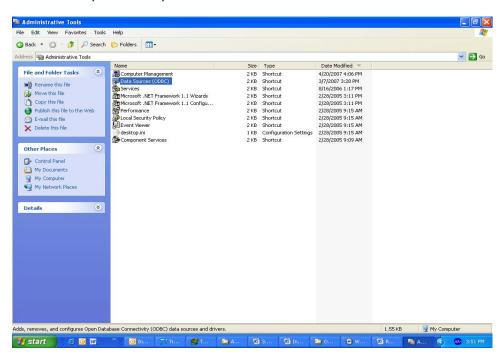

Note: Ensure that there are no spaces between the lines of the above entry when copied to the tnsnames.ora file.

13) Reboot the machine

TO RUN DATA WAREHOUSE QUERIES ALREADY CREATED

1) Find the QUERY file you wish to run by opening Windows Explorer (it doesn't matter where you have stored the file.

2) Right Click on the .dqy file

- 3) Click on Edit with Notepad
- Change the query parameters DATE PARAMETERS to the months you wish to use for your query

Examples of different DATE PARAMETER commands:

yyyymm = '200608' (August 2006) yyyymm between '200607' and '200609' (July 2006 and September 2006) j.jpdstartdate BETWEEN '01-JUL-2006' and '30-SEP-2006' (July 1, 2006 and Sept 30, 2006).

5) Once the correct date parameters are inserted, save query with new (hint: use date parameter in file name)

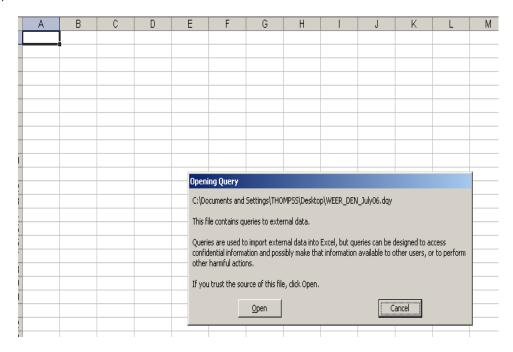

6) Run the new guery by double clicking on the new .dgy file

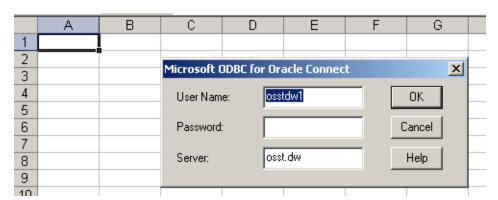

Origin Date: 05/21/2007 Modified Date: 5/13/2009

7) Click OPEN at the below screen

8) Insert OSST Data Warehouse Password assigned to your user account and click OK

9) Query Result set will appear in the excel sheet.
